PRODUCT DESCRIPTION

Instructions

Read carefully this instruction for use. Make sure that you know how to use moveUP, but also understand the limitations of moveUP before you start using our service.

If you do have any questions on the use, contact moveUP.

In the final chapter of this document you find our contacts, which you can use during the use of our service, in case you would have technical problems with the application (moveUP dashboard or patient app) or when expertise is required about a care path.

The Healthcare practitioner can't give access to third parties to access the moveUP dashboard. Every other person can, even by accident, send out wrong information or adapt the patient profile, with the result that the advice sent by moveUP no longer corresponds with the needs of the patient.

In case the application is use while moveUP & b.clinic is not asked to do the follow-up of patients, the individual healthcare provider or the health care facility is responsible for the follow-up of the patient and the action that are carried out.

In compliance with the medical device legislation, you are required to report any complaints towards the application, any alteration regarding characteristics/specifications of the application and incidents/complications potentially linked to the use of the application to support@moveup.care. The AFMPS can also be contacted in case of incident via https://www.famhp.be/en/human_use/health_products/medical_devices_acce ssories/materiovigilance/how_notify

In compliance with the GDPR legislation, please report eventual data leaks linked to the use of moveUP.

Please, read the entire privacy policy: https://www.moveup.care/legal/privacy-policy

Intended use

For healthcare providers, moveUP provides efficient clinical management of pathologies and treatments. With the use of moveUP, valuable insights are given to the HCP/care team of the status of the patient and its evolution.

For patients, moveUP provides personalised information and instructions to help them managing their symptoms and progress in their rehabilitation. The intensity of follow-up is adapted based on patients' needs and timepoint in the patient pathway:

moveUP companion = monitoring and information, no active follow-up

moveUP companion offers targeted information and evolution reports to patients. Their care team takes the evolution reports into account in their further recovery when appropriate.

moveUP coach = active follow-up by healthcare team

moveUP coach offers targeted information and evolution reports to patients. Their care team is more actively involved and takes the evolution reports into account and can provide advice and exercise suggestions through the digital platform.

moveUP therapy = active follow-up by healthcare team, with data driven validated care protocol

moveUP therapy offers a data-driven validated care protocol with certain category and level of exercises and activities, specifically targeted to the individual patient. Their care team can manually adapt the data driven validated protocol when needed. Patients can fully rehabilitation with moveUP without leaving their home environment.

* Optional functionality that can be enabled: interoperability with Class IIa continues passive motion (CPM) medical device. For knee and hip patients who are using a Class IIa CPM medical device, moveUP can interoperate with the Class IIa CPM software. moveUP acts as a facilitator to easy assign a designated CPM exercise protocol chosen by a physician to a patient and to display the performed CPM exercises in the medical dashboard

Intended users

moveUP is intended to be used by patients and healthcare providers. The main user of the mobile app and patient website is the patient.

Inclusion:

- Age: minimum 18 years / maximum no limit
- Health & condition: capable of performing basic activities of daily living
- Language: understanding one of the available languages of the app (Dutch, French, German, English)

Exclusion:

- Patients who are mentally incompetent or having troubles to express what they are feeling (for instance, mentally diseased people, people staying in elderly care centres, ...) are excluded.
- Patients who are not capable of operating a tablet/smartphone and activity tracker.
- Patients who can't understand one of the available languages of the app (Dutch, French, German, English)

The main user of the medical web interface is a healthcare practitioner (group) or clinical researcher (group), named the care team. The care team is able to operate a web interface via web browser on PC/tablet/smartphone. The healthcare practitioner needs to understand one of the available languages of the web interface (today only available in English)

Target population / indication for use

moveUP companion & coach is used by Musculo-skeletal, oncologic, respiratory, gastro-intestinal, cardiovascular, and neurologic patients, such as patients:

- who underwent or planning a gastric bypass or gastric sleeve operation
- who have or had a stroke, multiple myeloma, covid, familial hypercholesterolemia
- who have or had back or joint problems or operations
- moveUP therapy is used by knee & hip arthroplasty patients.
- moveUP is used for rehabilitation but is possible to include a patient before an
 intervention to know the previous state of health and establish goals for the
 rehabilitation.

Claims

moveUP companion/coach/therapy

The intensity of follow-up is adapted based on the needs of the patient, via the moveUP Symptom & QoL monitoring tool.

moveUP enhances the clinical management of the patients, because early detection & management of complications is possible via the symptom & QoL monitoring tool

More efficient clinical management, such as the number of consultations, can be reduced

Enforces therapy compliance/adherence

The correct information is provided at the right time

moveUP therapy

With the use of moveUP therapy knee & hip arthroplasty patients can fully rehabilitate via the in-app care team without leaving their home environment

moveUP app & devices

The move UP app runs on:

- iPhones/iPads (iOS 11.0 or newer)
- Android systems (Android 7.0.0 and newer).

If the patient has no compatible tablet/smartphone, moveUP can lease these devices to the patient.

- Garmin Vivofit 3 and Vivofit 4
- Nokia Withings Go
- All the devices compatible with HealthKit (IOS)
- All the devices compatible with Google Fit (IOS and Android)

The moveUP application needs an internet connection when in use.

The moveUP application is compatible with the following browsers:

- Chrome
- Safari
- Edge
- Firefox

We strongly recommend to use the latest version of the browser.

For your data safety please enable the 2-factor authentication (2FA) and use a safe network

Warnings and precautions

moveUP is not intended to monitor/treat vital parameters of critical diseases.

moveUP companion is not a replacement of any treatment you need to follow, but is used as an addition.

Patients need to be aware if questionnaires are not filled out on frequent basis or not filled out trustworthy, the care team has more difficulty to know their health situation & evolution.

The moveUP App offers personalized healthcare based on the patient's profile and therefore can not be shared, borrowed or traded between users. The information and advice of the moveUP application do not apply to a patient other than the one whose profile is stored in the application. The patient may not grant access to the moveUP App to third parties. Any

other person can, even accidentally, send wrong information or change the profile of the patient, with the result that the moveUP-guided advice no longer corresponds to the needs of the patient

• With software, there is always a residual risk for bugs. If you have the feeling something is wrong or you don't get a response in the app, please reach out to us via support@ or call 0800 88 008.

The moveUP IFU are only supplied in electronic format. If you need a full printed version plase contact us at the e-mail address info@moveup.care. This mail is available 24/7.

Contra-indications and potential side effects

There are no contra-indications or known side effects

Notification of serious incidents

A serious incident means any incident that directly or indirectly led, might have led or might lead to any of the following:

- the death of a patient, user or another person,
- the temporary or permanent serious deterioration of a patient's, user's or other person's state of health that resulted in any of the following:
 - o life-threatening illness or injury,
 - o permanent impairment of a body structure or a body function, hospitalisation
 - o prolongation of patient hospitalisation, medical or surgical intervention to prevent life-threatening illness or injury
 - o permanent impairment to a body structure or a body function,
 - o chronic disease,
- a serious public health threat;

If you detect any of these cases please send an email to info@moveUP.care and your competent authority:

- Netherlands: meldpunt@igj.nl
- Belgium: meddev@fagg.be
- France: dedim.ugsv@ansm.sante.fr
- Germany: zlg@zlg.nrw.de

Human body contact

No human body contact with the patient or user, due to the nature of the product (software).

Accessories/products used in combination

There are no accessories. If the patient has no compatible tablet/smartphone or activity tracker, moveUP can lease these devices to the patient. The leased devices are CE marked devices that meets the compatibility criteria outlined in the IFU for the app.

Device lifetime

2-years, depending on the willingness of the user to update the app. We sent out a notification with the recommendation to update the app, to make sure the app will keep the performance & recently included features.

MEDICAL MODULE

HEALTHCARE PLATFORM ACCOUNT CREATION

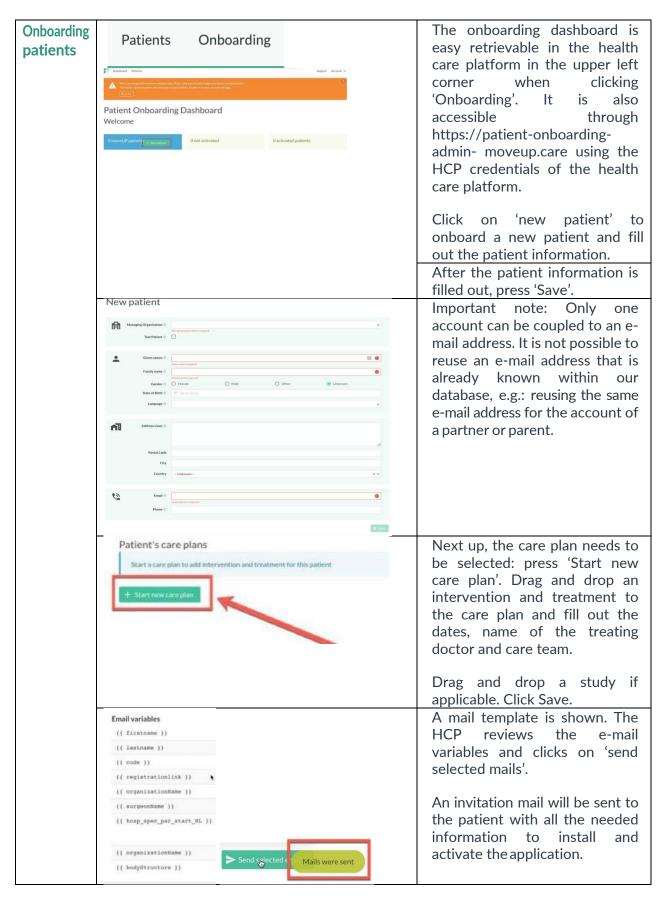

Step 1: The HCP registers on the healthcare platform on https://v1.medical.moveup.care/	Login
Step 2: moveUP will contact the HCP to add his/her profile to the correct organization. Step 3: Security measures: It is important to enable 2FA as you have access to sensitive health data.	Username or Email Username Password Login Request password reset Login using an electronic identity No account? Register here NAME Enable 2FA
E-learning: For HCPs who will provide care through the use of the healthcare platform it is recommended to follow the e-learning courses for the indications listed on https://moveup.talentlms.com . We ask the HCPs to register for the e- learning course in their applicable language.	Click on course catalog in the top bar to see some example courses and get started. Subscribe for free. Orthopaedics Belgium English (English) Français (French) The Netherlands English (English) Français (French) Français (French) Germany Deutsch (Germany)

ONBOARDING OF PATIENTS

Onboarding is the process of registering a new patient in the healthcare platform.

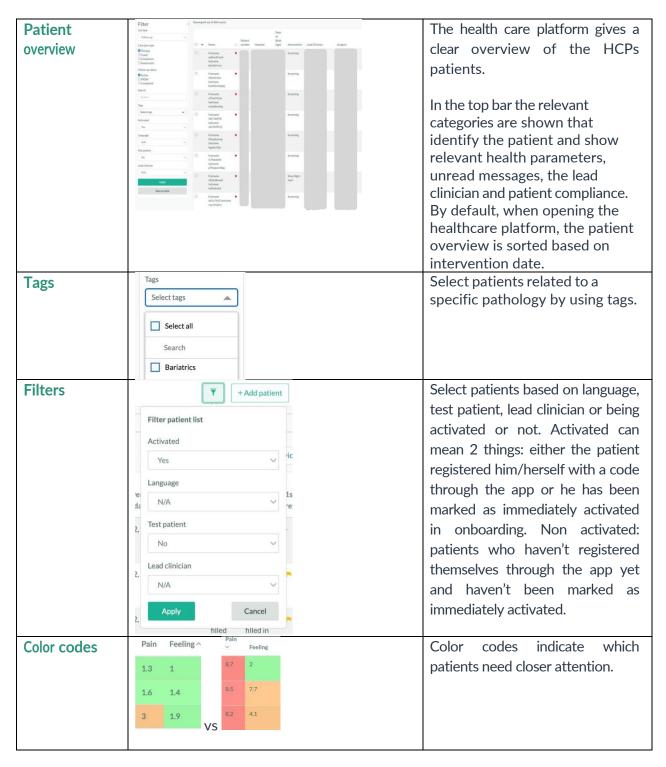

A crucial part is adding a care plan to the patient's profile. A care plan determines what will be visible for the patient in the application, e.g.: type of exercises, information modules, message functionality, etc. A care plan usually consists out of an intervention, a treatment and (a) care

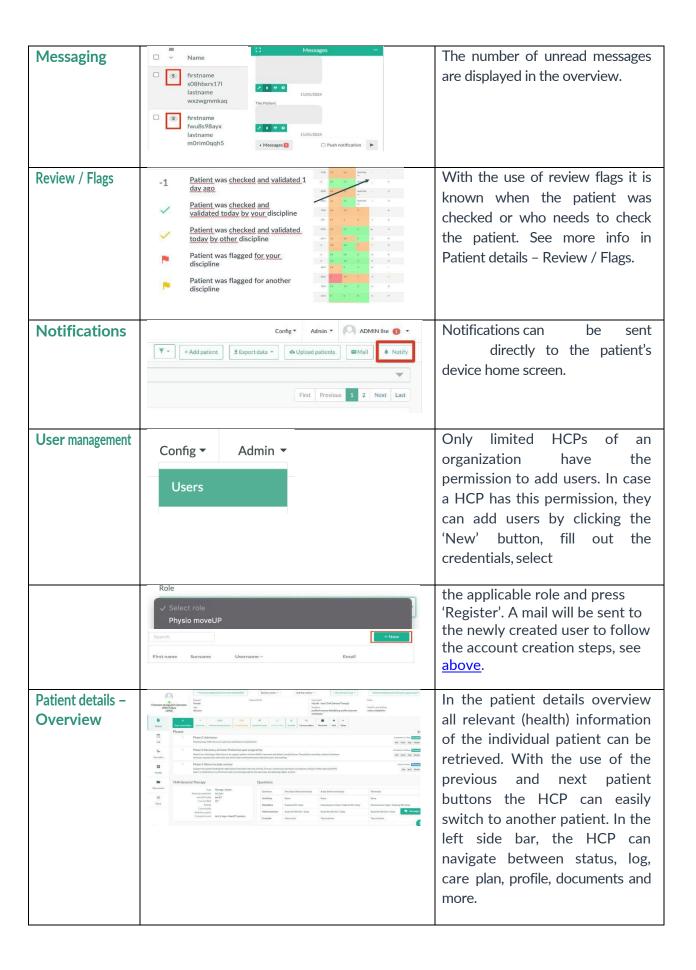

team(s).

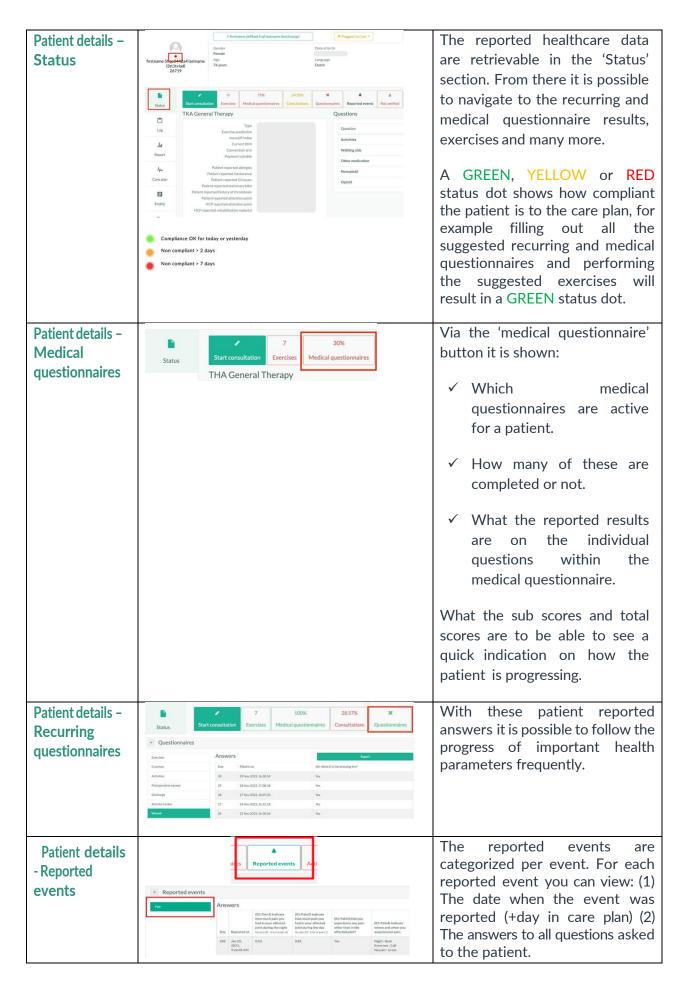

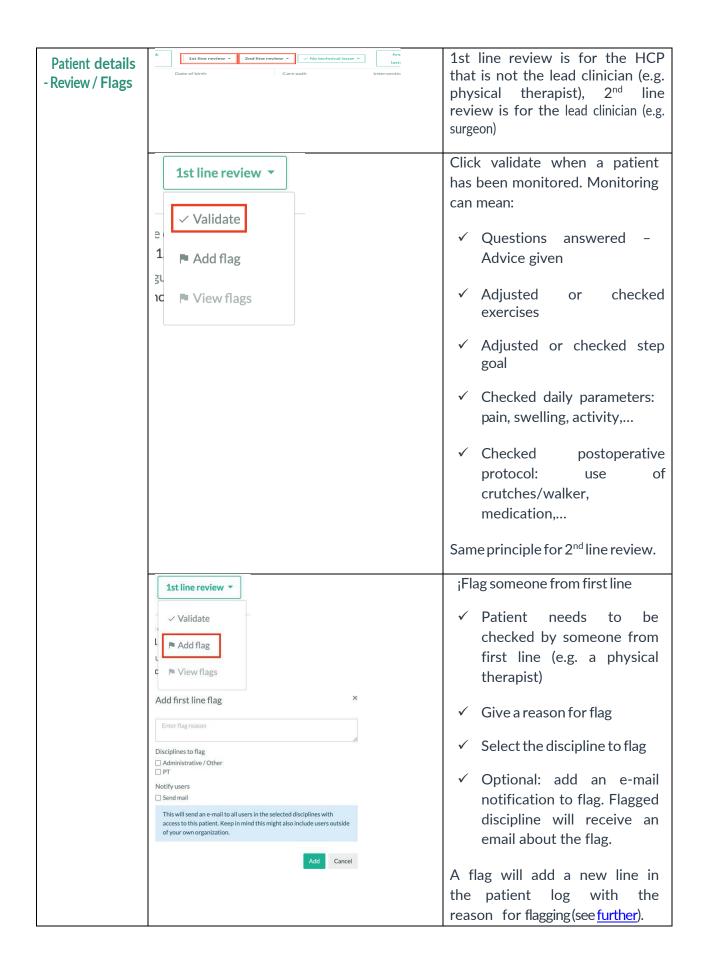

HEALTHCARE PLATFORM GENERAL FUNCTIONS

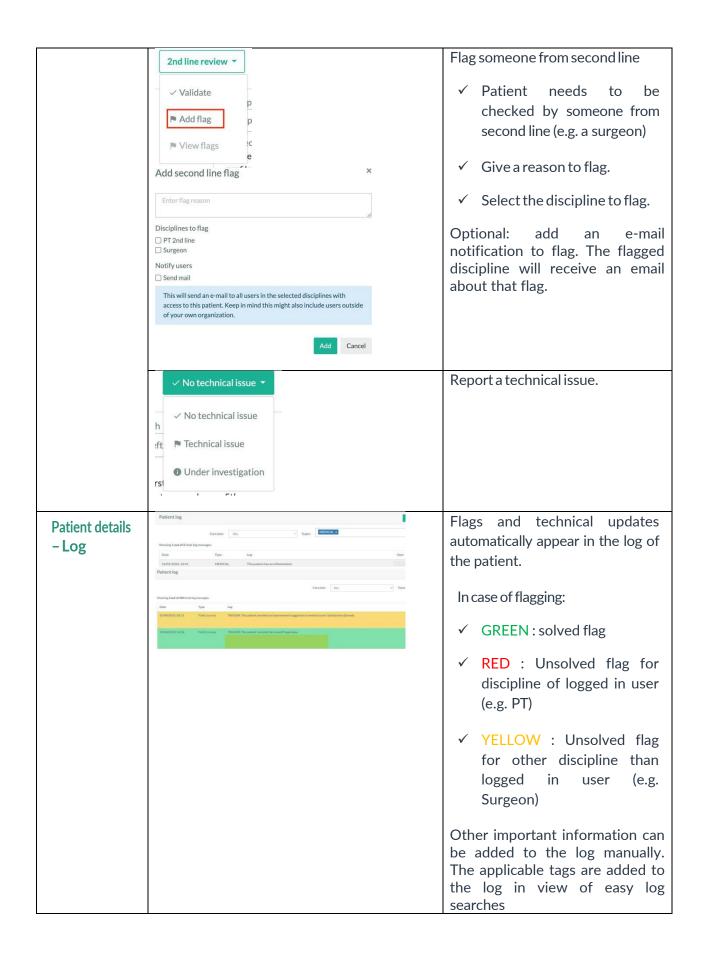

Below the HCP can retrieve all functions of the healthcare platform. The applicable functions will be shown based on the HCPs subscription. The extent of the available patient information is based on the patients subscription & his/her compliancy rate.

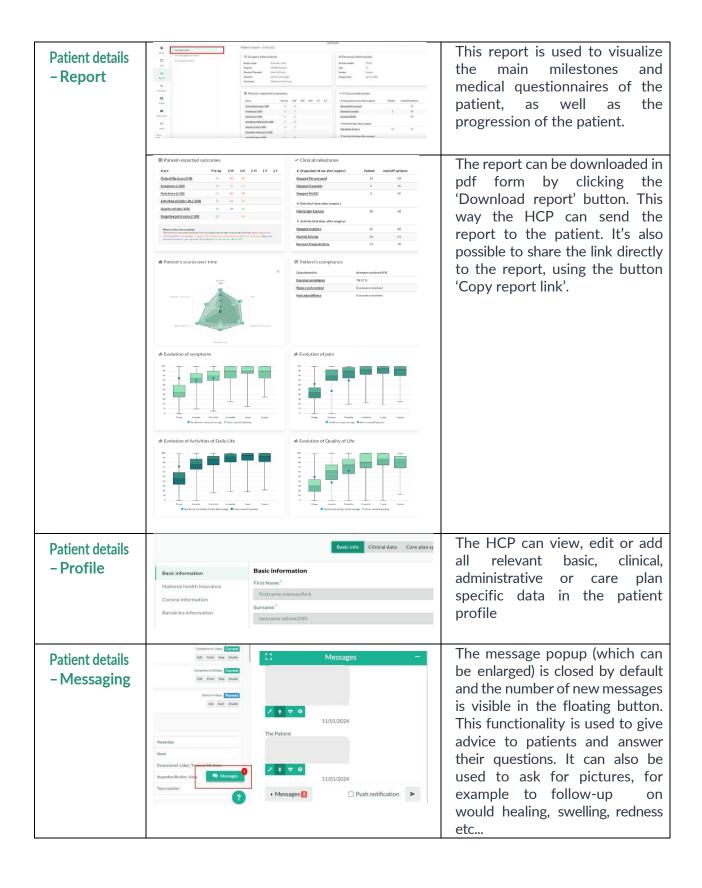

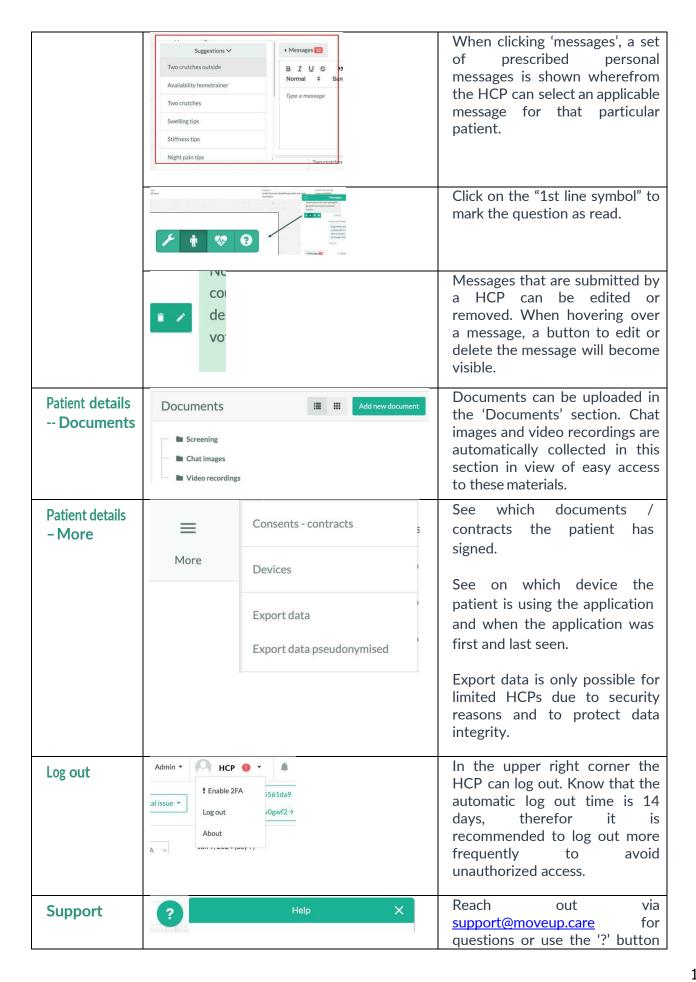

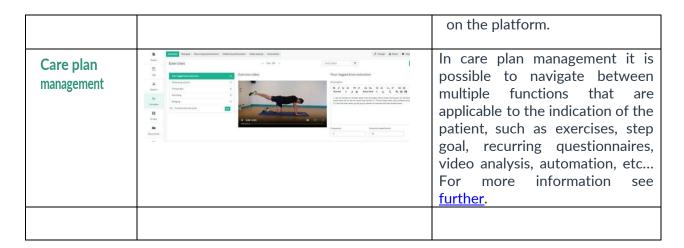

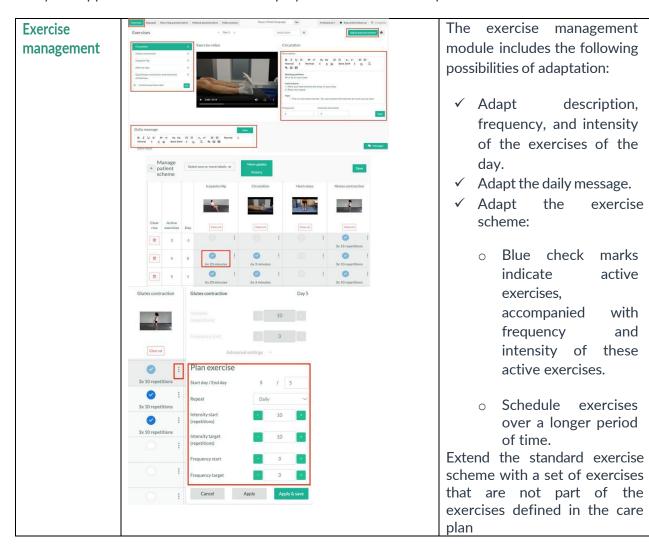

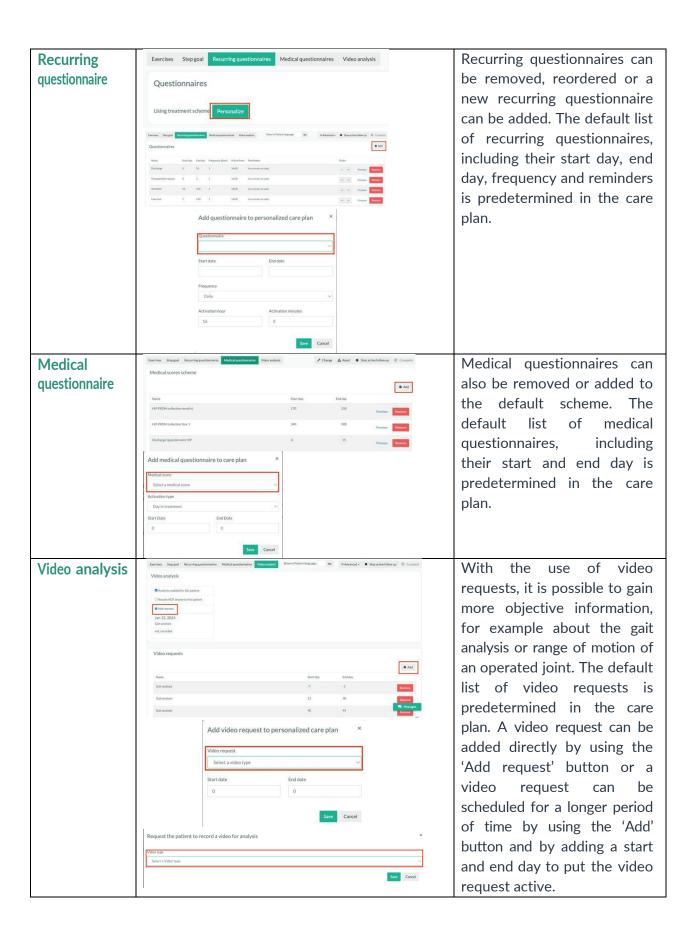

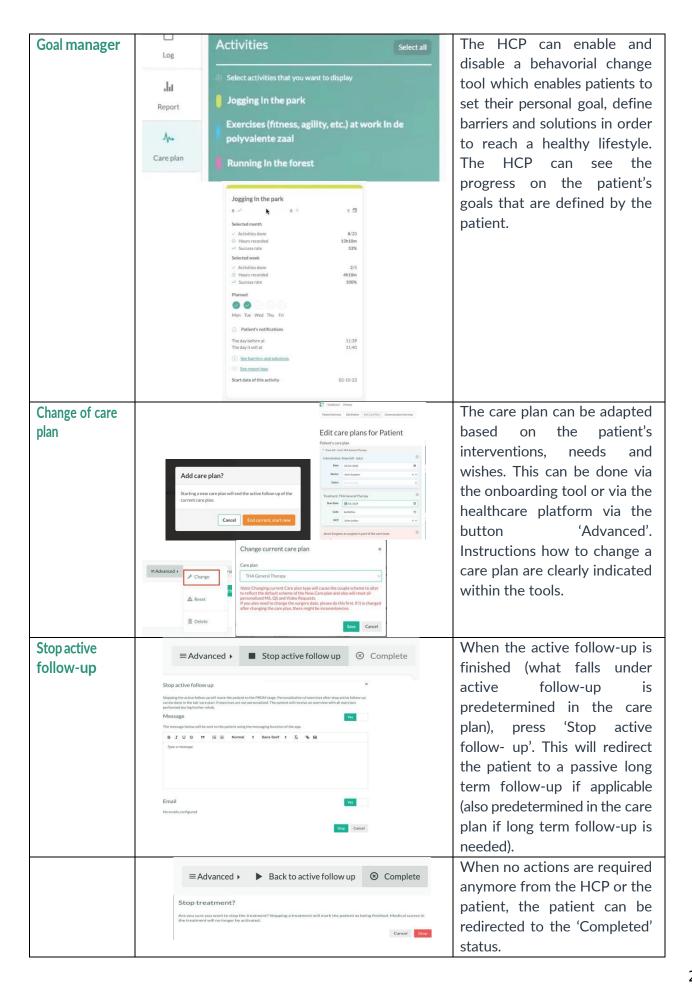

HEALTHCARE PLATFORM CARE PLAN FUNCTIONS

It is possible to provide care through the use of the healthcare platform. With the functions below the HCP can adapt the default treatment plan of their individual patient.

Only the applicable functions will be displayed conform the care plan.

WELLNESS MODULE

The wellness module is an optional non-medical device module and therefore the data shown is not intended to be used for clinical decision making.

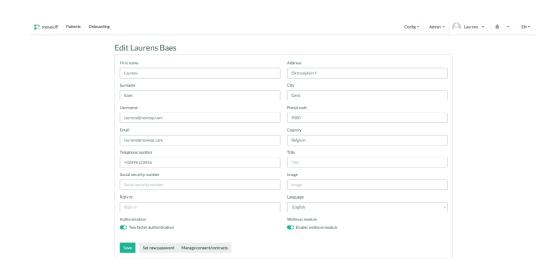

This data gives an overview of the general wellbeing of the patient.

The wellness module by default is blurred and needs to be activated to check the patient's wellness data.

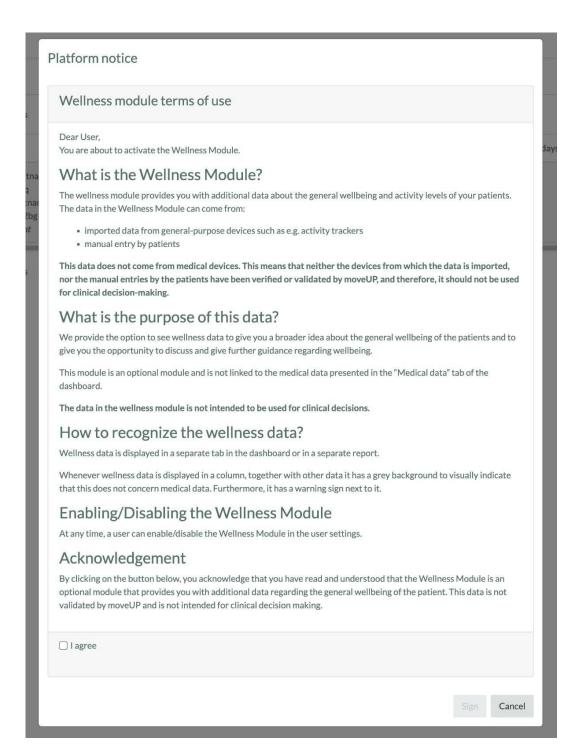

WELLNESS MODULE ACTIVATION

To activate the wellnes module you need to enter your profile settings and activate the option:

Enable wellness data

Upon activation, a mandatory acknowledgment pop-up is displayed. It informs you that the data from the Wellness Module must not be used to support clinical decision-making.

Once acknowledged, you gain access to the wellness data. This actication allows you to view the wellness data and export the wellness reports.
