A NOTE FROM OUR CEO

THE REAL PRODUCT WE SELL ISN'T IN THIS BROCHURE

If you read only one page in this brochure, this is it. Make it this one.

Because the most important thing I can tell you about US Duct is simple: **We don't sell ductwork. And we don't sell dust collectors.**

Yes, we manufacture one of the industry's broadest selections of industrial ductwork, tubing, dust collection, fume collection, mist collection, separators, and waste management solutions.

And yes, we build clamp-together ductwork. Flanged systems. Leak-free tubing. Elbows. Branches. Gates. Valves. Stainless. Galvanized. Dust collectors. Separators. Hoppers. Accessories. Spark Traps.

But those products are not why our customers choose us. Nobody wakes up in the morning hoping to buy ductwork.

- ✓ Dealers want to grow profitably.
- ✓ Engineers want designs that perform.
- ✓ Contractors want installations that go smoothly.
- ✓ Facility operators want production running efficiently with less downtime.

What our customers are really buying is productivity, reliability, and profitability. It's that simple.

That's where US Duct is different.

Every product we design, engineer, and manufacture starts with a simple question:

How will this help our customers operate more efficiently and make them more profitable?

That philosophy influences EVERYTHING we do.

For Dealers, it means complete system solutions, faster quoting through DuctQuote, dependable lead times, proven products, and dealer programs designed to improve their margins.

For Engineers, it means configurable solutions, broad product availability, responsive technical support, and performance-focused designs that help them deliver successful projects.

For Contractors and Installers, it means systems that fit correctly, install faster, require fewer field modifications, install without need for specialized labor and are backed by knowledgeable support when it matters most, delivering profitable projects.

For Facility Operators, it means solutions engineered to maximize airflow performance, reduce maintenance requirements, simplify compliance, keep production moving, and improve their bottom line.

The ductwork, collector, separator, or tubing system is simply the final physical product; it is the means to these ends.

The real value is the thinking behind it and how we put them together to deliver performance solutions.

For more than three decades, US Duct has helped customers across North America solve complex industrial air handling and waste collection challenges. Our mission has never been to manufacture more ductwork.

Our mission is to help our customers make their business safer, more productive, and more profitable.

I invite you to explore our product lines and discover how US Duct can help your business **ACHIEVE EXACTLY THAT.**
