

US TUBING LEAK-FREE INDUSTRIAL AIR HANDLING

- 100% LEAK-FREE GUARANTEE**
- CONTROL NOXIOUS FUMES**
- KEEP PRODUCTION RUNNING**

★ **PROUDLY MANUFACTURED IN THE USA** ★

A NOTE FROM OUR CEO

THE REAL PRODUCT WE SELL ISN'T IN THIS BROCHURE

If you read only one page in this brochure, this is it. Make it this one.

Because the most important thing I can tell you about US Duct is simple: **We don't sell ductwork. And we don't sell dust collectors.**

Yes, we manufacture one of the industry's broadest selections of industrial ductwork, tubing, dust collection, fume collection, mist collection, separators, and waste management solutions.

And yes, we build clamp-together ductwork. Flanged systems. Leak-free tubing. Elbows. Branches. Gates. Valves. Stainless. Galvanized. Dust collectors. Separators. Hoppers. Accessories. Spark Traps.

But those products are not why our customers choose us. Nobody wakes up in the morning hoping to buy ductwork.

- ✓ Dealers want to grow profitably.
- ✓ Engineers want designs that perform.
- ✓ Contractors want installations that go smoothly.
- ✓ Facility operators want production running efficiently with less downtime.

What our customers are really buying is productivity, reliability, and profitability. It's that simple.

That's where US Duct is different.

Steve McDaniel
CEO, US Duct

Every product we design, engineer, and manufacture starts with a simple question:

How will this help our customers operate more efficiently and make them more profitable?

That philosophy influences EVERYTHING we do.

For Dealers, it means complete system solutions, faster quoting through DuctQuote, dependable lead times, proven products, and dealer programs designed to improve their margins.

For Engineers, it means configurable solutions, broad product availability, responsive technical support, and performance-focused designs that help them deliver successful projects.

For Contractors and Installers, it means systems that fit correctly, install faster, require fewer field modifications, install without need for specialized labor and are backed by knowledgeable support when it matters most, delivering profitable projects.

For Facility Operators, it means solutions engineered to maximize airflow performance, reduce maintenance requirements, simplify compliance, keep production moving, and improve their bottom line.

The ductwork, collector, separator, or tubing system is simply the final physical product; it is the means to these ends.

The real value is the thinking behind it and how we put them together to deliver performance solutions.

For more than three decades, US Duct has helped customers across North America solve complex industrial air handling and waste collection challenges. Our mission has never been to manufacture more ductwork.

Our mission is to help our customers make their business safer, more productive, and more profitable.

I invite you to explore our product lines and discover how US Duct can help your business **ACHIEVE EXACTLY THAT.**

For more than three decades, we have helped keep your 'ducks' in a row 😊 by delivering American-made industrial tubing, ductwork, and waste management solutions that solve real manufacturing challenges. With end-to-end support, the US Duct team helps dealers grow profitably, engineers design with confidence, contractors install with ease, and facility operators minimize downtime.

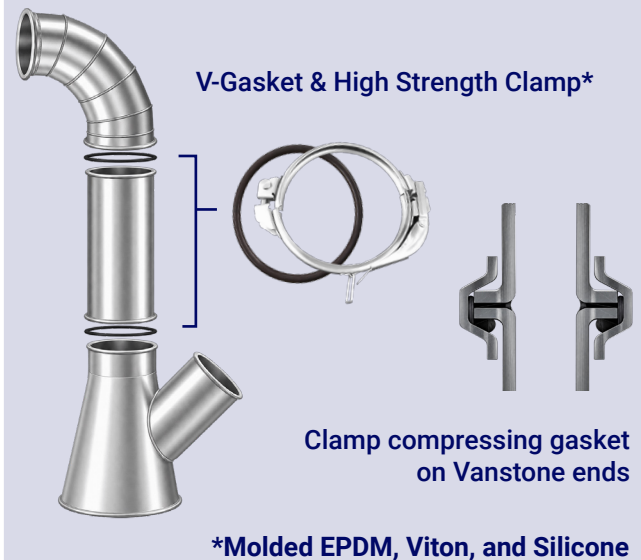

WHY US TUBING?

When safety is a priority, where standard ductwork fails, get peace-of-mind with The Ultimate Seal ®

- 100% Leak-Free Guarantee
- Easy installation with infinite adjustability and Clamp-Together connections
- Galvanized and stainless steel
- Ideal for oil mist applications, battery manufacturing, chemical processing, pharmaceutical and high containment applications

ANYWHERE IT MUST NOT LEAK!!

LEAK-FREE INDUSTRIAL DUCTWORK

BATTERY MANUFACTURING

CONTAINMENT IS THE REQUIREMENT.

One leak in a battery manufacturing cleanroom or dry room isn't an inconvenience — it's a shutdown, a contamination event, or worse. US Tubing keeps corrosive exhaust, fine particulate, and moisture exactly where it belongs, so your line keeps running and your controlled environments stay dry.

OIL MIST / AEROSOL CONTROL

Keep facilities cleaner and equipment running longer.

CORROSIVE CHEMICAL EXHAUST

Handle aggressive chemical fumes and mist safely and reliably.

MOISTURE-SENSITIVE DRY ROOMS

Maintain strict environmental control.

FINE PARTICULATE AND PROCESS EXHAUST

Capture harmful particulates at the source.

**AIR- AND LIQUID-TIGHT
DESIGNED BY OUR ENGINEERS
FOR EFFICIENT AIRFLOW.**

- ✓ CLEANER PROCESSES
- ✓ SAFER FACILITIES
- ✓ CONTINUOUS OPERATION

CHEMICAL PROCESSING

KEEP VAPORS, MIST & PARTICULATE WHERE THEY BELONG.

A single leak in a corrosive exhaust line puts people, product, and your reputation at risk. US Tubing's vanstone connections and chemical-resistant gaskets are built to seal under pressure — so vapors, mist, and hazardous particulates stay contained, not circulating in your production area.

CORROSION-SENSITIVE EXHAUST

Engineered to contain and transport caustic chemicals in harsh environments.

HAZARDOUS PARTICULATE CONTAINMENT

Keep harmful materials contained and your workers, employees, personnel, and team protected.

PROCESS VAPOR AND MIST CONTROL

Reliable performance for continuous operation without costly shutdowns.

DID WE MENTION?

We offer airtight and liquid-tight solutions, blast gates, butterfly valves, oil mist solutions, and more.

**LEAK-FREE = CLEANER,
SAFER, MORE RELIABLE,
DESIGNED FOR EFFICIENT AIRFLOW.**

- ✓ **PRIORITIZE EMPLOYEE SAFETY**
- ✓ **CLEANER OPERATIONAL ENVIRONMENT**
- ✓ **OPTIMIZE PRODUCTION**

PHARMA + CLEAN PROCESS

PROTECT PRODUCT. PROTECT PROCESS.

Contamination doesn't announce itself — it shows up in a failed batch or a failed audit. US Tubing's fully gasketed, leak-free system keeps powder and fine particulates contained and your process air clean, so your product stays protected and your product integrity stays intact.

CONTAMINATION PREVENTION

Maintain clean, controlled environments.

POWDER & FINE PARTICULATE CONTAINMENT

Keep product and people safe.

CLEAN-PROCESS AIRFLOW

Designed for high-purity applications.

MODULAR SYSTEM

Easier installation and future changes.

**CLEANER ENVIRONMENT.
HIGHER CONFIDENCE.
DESIGNED FOR EFFICIENT AIRFLOW.**

- ✓ BETTER PRODUCT PROTECTION
- ✓ CONTROLLED CLEAN ENVIRONMENTS
- ✓ RELIABLE CONTAINMENT
