End Caps

Closed Caps

End Caps connect easily with the Rolled Lip Clamp and are used to cap-off an unused ducting port or they are ideal to put in place for future expansion or when a machine has been removed, and Installation only take a few seconds

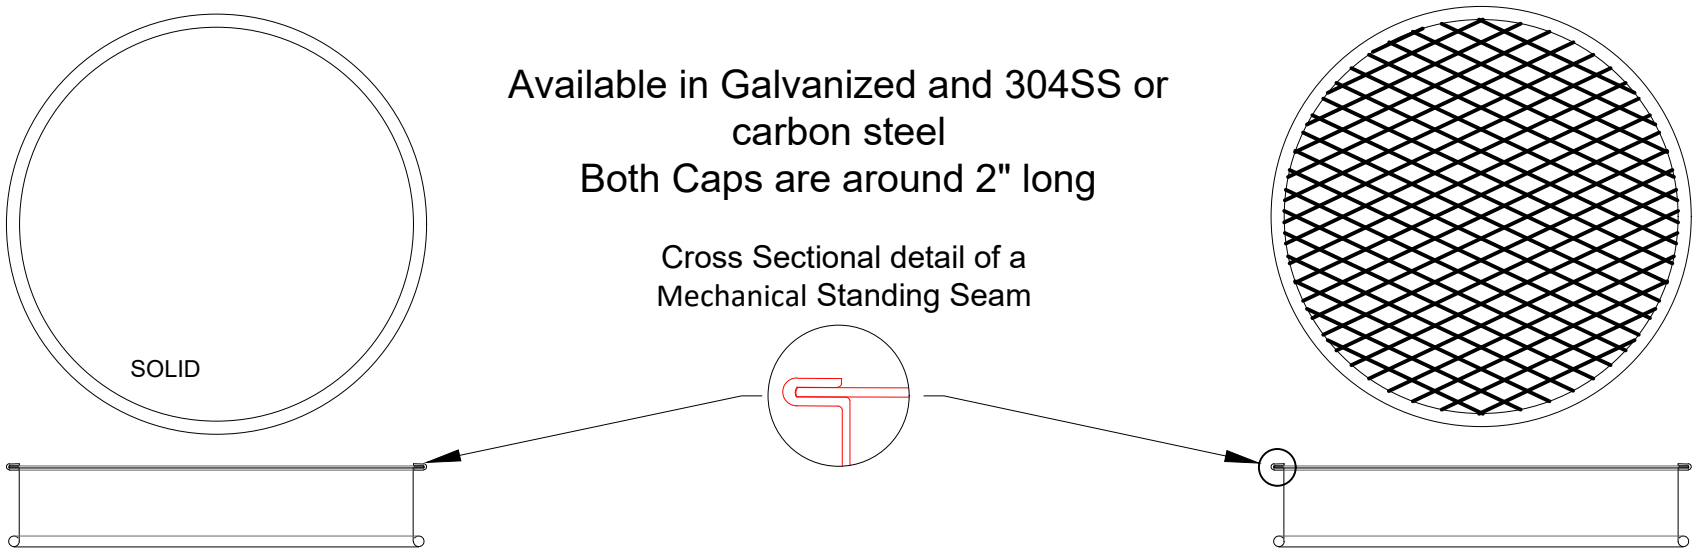

Closed Cap PN. RNCxx.G18
xx will be size needed

Screen Caps

End caps with bird screen connect easily with a Rolled Lip Clamp and are used in situations where openings are needed to allow air to enter or exit a system. The screen keeps foreign objects from entering the system.

Available in Galvanized and 304SS or carbon steel.

Screen Cap PN. RNSxx.18
xx will be size needed

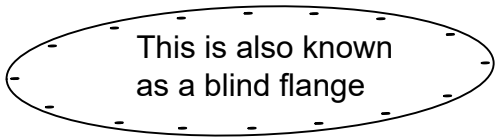

Available in Galvanized and 304SS or carbon steel
Both Caps are around 2" long

Cross Sectional detail of a Mechanical Standing Seam

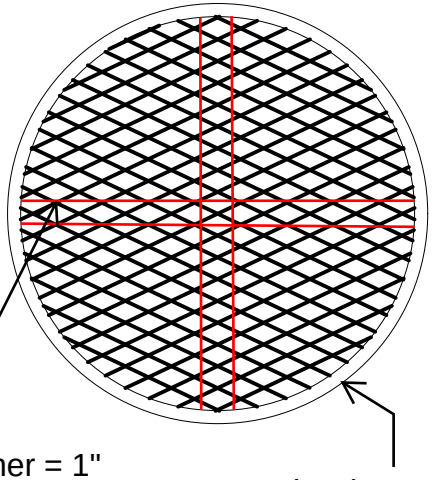

All of the Flanged End caps will be constructed with a flat plate with holes.

Screen end caps over 24" will be a Angle Flange and a piece of screen.

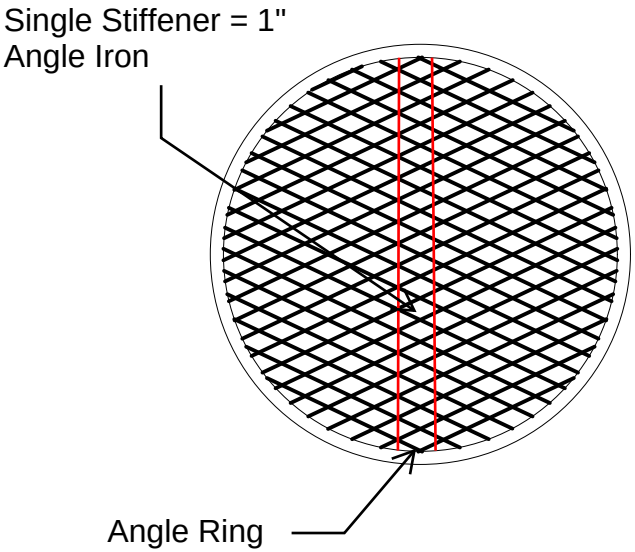

Closed Flange End Cap PN. FNxx.Glv18
Screen Flange End Cap PN. FNSxx.Galv18
xx will be size needed

Flanged Screen End Cap 36"+

Flanged Screen End Cap 25"-34"

Standard RL - End Cap / Screened End Caps			
	Collar Gauge	Cap Gauge	Welded/Mechanically Locked
