 LEADERS OF AI

# Use your first AI assistants in everyday life

Want to move beyond just talking about AI and finally get real support in your job?

In **the AI Survival Program**, you'll learn how to not only delegate tasks to AI, but also how to create your first AI assistants.

They will immediately start helping you with all the things that stress you out.

For example: prioritizing and pre-formulating emails, coordinating meetings, filling out forms, or handling your travel expense reports.

You don't need any prior knowledge – we start from scratch and go straight into implementation.

In the end, you'll have your **first 5 assistants** up and running and the ability to create many more.

We will not ignore the dangers of AI or the most important legal rules in order to deal with it professionally.

Start today – and equip yourself with the skills **of the modern working world**.

## Program highlights

### Certificate

In partnership with **Fresenius University of Applied Sciences** and **Microsoft**, the quality of the program is guaranteed. Upon successful completion, you will receive a certificate that meets the requirements of the EU AI Act.

### Lifetime access

You will also have **lifelong access to all content** after the program. In addition, the program will be continuously updated so that you will still be up to date tomorrow.

### Alumni community

You have the opportunity to become part of an **exclusive community**. You will benefit from monthly AI expert talks with companies such as Microsoft or EY and exchange experiences to further your development.

### Quality standards

We are committed to the highest standards. Our programs are **state-certified**, were awarded the E-Learning Award 2025 in the AI category, and we are rated "Excellent" with 4.9/5 stars on Trustpilot.

"Excellent"

4,9/5 Sterne auf TrustPilot

# Tools

In the program, we work with the Agent Builder in **Microsoft Copilot**.

We also take a look at **Copilot Studio** for more complex AI assistants, as well as the German AI platform **Langdock**.

This will put you in an ideal position to create AI assistants and write successful prompts for them, regardless of the technical infrastructure setup.

## Copilot

The perfect introduction to  
the world of AI

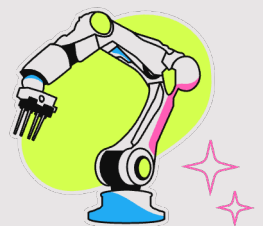

## Copilot Studio

Sophisticated AI assistants  
for all needs

## Langdock

Outstanding German  
AI platform

# Mission overview

| Module                           | Content                                                                                                                                                                    |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>The company of the future</b> | <p>Organizations will increasingly work in symbiosis with artificial intelligence. This will fundamentally change the world of work.</p>                                   |
| <b>Delegation of tasks</b>       | <p>Effective collaboration begins with the right "prompting." This can be achieved with our <b>ACTION® method</b>.</p>                                                     |
| <b>Your new assistants</b>       | <p>Based on the ACTION® method, the first AI assistants can then be created to take on tasks in the future.</p>                                                            |
| <b>Everything that is right</b>  | <p>Professional use also requires an understanding of the legal framework and the risks involved in using ChatGPT &amp; Co.</p>                                            |
| <b>Final exam</b>                | <p>At the end of the program, you can take a short exam, which will be rewarded with a certificate from Fresenius University of Applied Sciences and <b>Microsoft</b>.</p> |

# Learning principles

## Gaining experience through challenges

You learn best when you dive right into practice. Our challenges show you how to immediately.

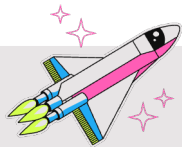

## Learning in a community

You learn in a community with **like-minded people**, exchange ideas, and support each other. AI requires learning from each other and growing together.

## Flexibility with 10-minute units

The course is structured in **10-minute learning units** so that you can learn in a condensed, focused, and, above all, flexible way. Whether during your lunch break or between meetings.

## Materials and checklists

Our program combines videos, methods, and checklists with tried-and-tested frameworks. This provides you with the ideal conditions to achieve your AI goals.

A black and white photograph of four people in a modern office environment. On the left, a man in a dark sweater and light trousers stands next to a woman in a black dress. In the center, a man with a beard and tattoos, wearing a white blazer and dark trousers, stands with his hands in his pockets. On the right, another man in a light blazer and trousers stands with his hands in his pockets. They are all smiling and appear to be in a positive conversation.

# The best upgrade for your career

Join us in an era where **humans and AI** work hand in hand.

And take your career to **the next level**.
