

Cape Equity Moonshots Portfolio

Actively Managed Certificate (AMC)

Portfolio strategy

The Cape Equity Moonshots Portfolio is a global equity strategy that invests in publicly listed companies at the forefront of breakthrough innovation. It focuses on themes with the potential to solve major global challenges and reshape industries over the next decade, including transportation, clean energy and electrification, quantum and advanced computing, the future of AI, robotics, privacy and digital trust, human enhancement, smart cities, space, and environmental sustainability.

The portfolio consists of 100 stocks selected from a global universe of over 2,000 companies, using a disciplined combination of data-driven screening and systematic AI evaluation. This is implemented through annual vintages and a 10-year buy-and-hold approach.

This strategy reflects the belief that a small subset of innovative companies may emerge as category leaders or true “moonshots,” capable of delivering outsized returns through scalability, adaptability, and sustained innovation. The product is designed to offer a high-risk, high-growth return profile, complementing traditional equity allocations within a diversified portfolio.

Performance (%)

Current month	YTD	1Y (p.a.)	3Y (p.a.)	Since inception
19.55	18.14	N/A	N/A	13.03

Information

Date	30 April 2026
