Total Pathology Data Solution
Achieving your goals in optimizing the pathology lab

Roche

The pathology lab is by nature manual and complex. Our Total Pathology Data Solution provides you with the data and control for decisive actions that lead to operational optimization and excellence.

As your pathology partner, we can integrate across multiple systems, create rich datasets, and provide an easier way to track, manage, and identify trends and challenges. Ultimately, helping to enable a faster time to reliable diagnosis.

navify® Pathology Lab Advantage*

As part of the Total Pathology Data Solution, **navify Pathology Lab Advantage** mitigates the potential for errors in your specimen workflow, resulting in total processing visibility and increased patient safety. This empowers you to efficiently and confidently reduce errors for an accurate diagnosis.

Optimize workflow
Workflow consulting
Streamlined workflow improves efficiency, reduces cost, and empowers you to do more with less.

Track tissue
Specimen management
Comprehensive workflow coverage increasing patient safety while minimizing risk.

Manage operations
Laboratory management
Integrated solutions provide actionable insights giving you more control of your data.

navify Analytics for Pathology Lab**

Utilizing data from navify Pathology Lab Hub*** and navify Pathology Lab Advantage, **navify Analytics** is a data analytics solution that tracks trends in operational metrics including:
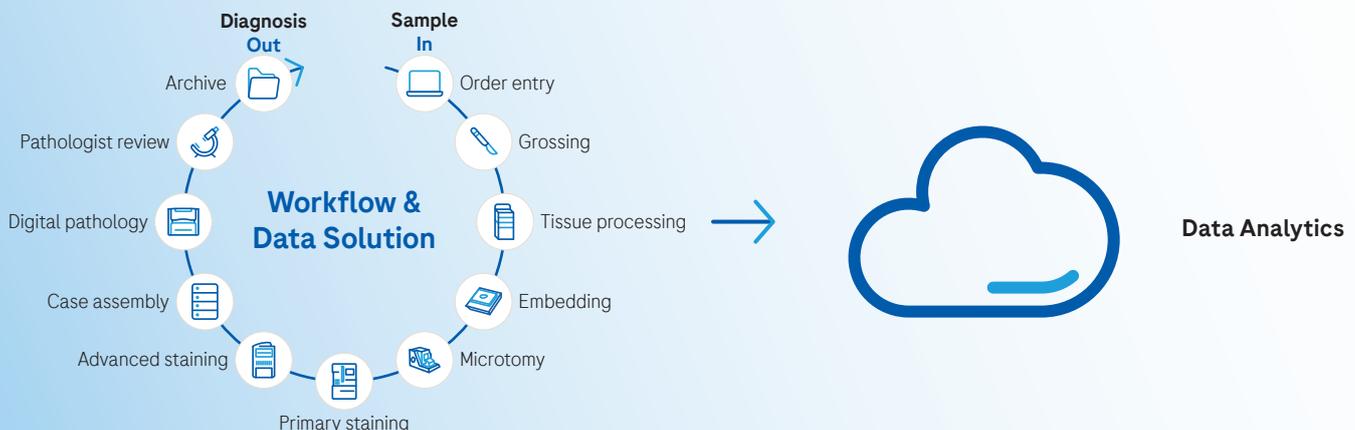

Count Summary

Quality Issues

Performance (TAT)

Instrument Utilization

It keeps you informed, so that data-driven decisions can be made to optimize your lab's resources.

navify®

One Solution, Total Transparency

Operational data empowers you to take evidence-driven actions to improve efficiencies within your lab

By integrating the Total Pathology Data Solution in your pathology lab, operational data is collected and analyzed.

In real-time:
Efficiently track and manage samples as they move through your pathology laboratory while reducing errors, delays, and missed slides with **navify Pathology Lab Advantage**. navify Pathology Lab Advantage wallboards allow you to showcase your lab's analytics on a grand-scale in near real-time.

Retrospectively:
Review TAT, volumes, and capacity trends with **navify Analytics** and anticipate changes to plan for resources and upgrades.

Lab requirements

Calculate lab TAT

Prepare for quality and/ or performance audits and certifications

Determine lab capacity

Allocate resources e.g. Staffing and budgets

Visibility to compare performance of other labs in your network

Our solution

Easily view average TAT at each workflow step by physician, tissue, stains.

Filter your data by quality issues, activity, and workstations to support your accreditation needs.

View volume trends in correlation with TAT to see how much more capacity the lab has while meeting customer needs.

View volume trends from cases accessioned to slides assembled across all order types. Anticipate changes and plan for resources and maintenance.

Compare metrics site-to-site. See which sites are working smarter and faster to help you set standards, reduce costs, and have consistent standard of care.
