

PROCUREMENT COMPLIANCE ATTRIBUTES (PCAs)

Certificates used by jurisdictions for SB 1383 compliance

EASILY MEET YOUR SB PROCUREMENT 1383 TARGETS

Count your current electricity towards SB 1383

OPTIONS FOR MEETING YOUR GOALS:

A. MULCH

Too difficult to produce qualifying product

B. COMPOST

Availability limitations, not enough space to spread

C. RENEWABLE NATURAL GAS (RNG)

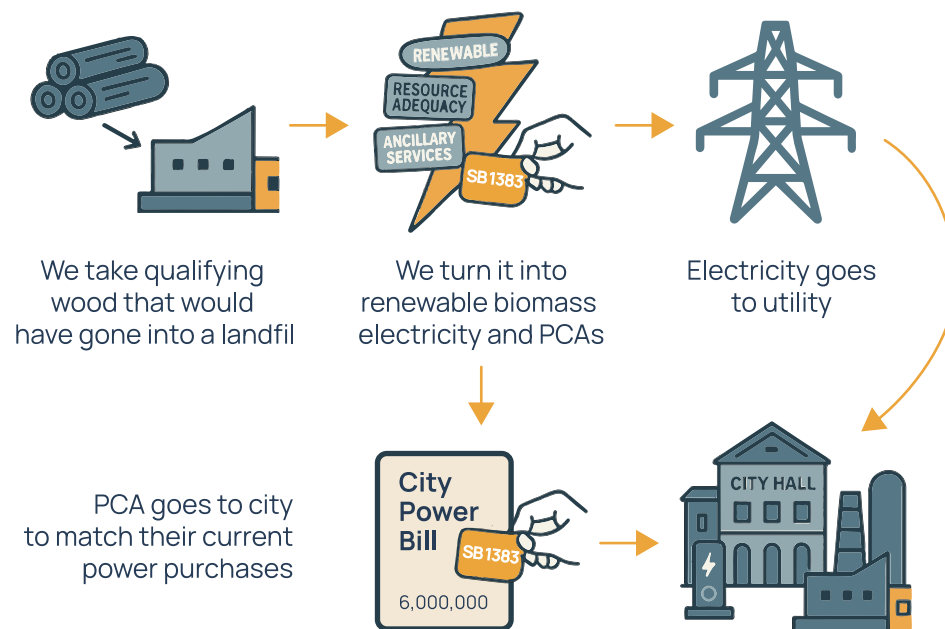

Hard to find producers or end-users of RNG

D. BIOMASS ELECTRICITY

Perfect solution!

HOW WE MAKE BIOMASS ELECTRICITY

TWO OUTCOMES WHEN GENERATING BIOMASS ELECTRICITY

NEEDS

Power is sold to the power grid in their local area of the state for general use.

GOALS

By generating renewable energy from qualifying wood we create PCAs. PCAs can be sold to anyone, anywhere in the state to benefit SB 1383 compliance.

HOW DO PCAs WORK?

1 PCA = 650 kW

For every 650 kW of power sold to the local grid, we can sell 1 PCA to anyone in the state.

Do I need to buy the electricity with the certificates?

No! Most of our power is used by customers that do not need the certificates. This leaves the certificates for you!

OTHER BENEFITS

1. **Money-back guarantee** that the PCAs will be compliant
2. **Works anywhere** and with any electricity provider in the state
3. **Fully auditable** – we handle the compliance paperwork
4. **Pairs well** with compost, mulch, and RNG you may already be buying
5. **Approved and used by other jurisdictions** in the state
