1. Uptime during GO TIME
2. GVE ProCheck Guarantee
3. Warranty on Parts & Labour
4. Increased Resale Value

Professional Technicians

Quality Assurance

Checked and Good-to-Go

Why ProCheck

- GVE's comprehensive ProCheck program is a **proactive** approach to equipment maintenance, ensuring **uptime** during **Go Time**. Our trained technicians conduct a multipoint inspection and identify all failed and worn parts. Repairs are reviewed and quoted and only completed with your approval.

Total Fleet Solution

- Book 3 ProChecks and get the 4th free!
- Book your ProCheck before January 30th, 2026 and save 10% on parts installed by GVE as a result of a ProCheck Inspection.
- Take advantage of John Deere Financials' No Payment / No Interest program and enjoy NPNI until November 15, 2026* on parts and service completed through a ProCheck.

*(subject to approval by JDF)

GVE ProCheck Guarantee

- When you purchase a ProCheck inspection for your combine, tractor or sprayer, and **ALL** identified critical repairs are completed by GVE, you receive the GVE ProCheck Guarantee:
If your machine experiences mechanical failure during the first season of use and GVE cannot repair it within 24 hours, we will provide you with a similar rescue machine at **NO** rental cost. The rescue machine is available to you until GVE completes the necessary repairs.

*Mechanical failure excludes Software, Air Conditioning, Electrical, non-inspectable Internal Component failures, and operator damage.

* You are required to insure the Rescue Machine for the duration of use and are responsible for any equipment damage or ingestion of foreign material.

Parts & Labour Warranty

- Genuine John Deere Parts installed by GVE are backed with a 1 year parts and labour warranty.

SPRAYER

00, 10, 20, 30 & 40 Series Sprayers

\$2,500

+ Add a Wash for \$300

SPRAYER

R Series Sprayers

\$2,600

+ Add a Wash for \$300

FLOATER

\$1,500

+ Add a Wash for \$700

GVE will address areas of concern where rust can form

*Includes cost for winterization valued at \$700

SPRAYER INSPECTION INCLUDES:

(190-POINT INSPECTION)

- OPERATION AND CONDITION CHECK OF ALL FUNCTIONS INCLUDING:
 - OPERATOR STATION CONTROLS AND HVAC SYSTEM
 - ENGINE AND AUXILIARY DRIVES
 - COMPLETE WET SYSTEM AND SPRAY BOOM
 - HYDROSTATIC DRIVE, WHEEL HUBS AND TIRES
 - SUSPENSION AND STEERING
 - HYDRAULIC AND ELECTRICAL SYSTEMS
 - AMS EQUIPMENT AND OPERATION (IF EQUIPPED)
- MAINTENANCE CHECKS:
 - ENGINE OIL AND FILTER
 - ENGINE COOLANT/ANTIFREEZE FREEZE POINT AND CONDITION
 - HYDRAULIC OIL AND FILTER(S)
 - ENGINE AND CABIN FILTERS

FLOATER INSPECTION INCLUDES:

(150-POINT INSPECTION)

- OPERATION AND CONDITION CHECK OF ALL FUNCTIONS INCLUDING:
 - OPERATOR STATION CONTROLS AND HVAC SYSTEM
 - ENGINE AND AUXILIARY DRIVES
 - DRY BOX AND AIR BOOM
 - DRIVETRAIN AND TIRES
 - SUSPENSION AND STEERING
 - HYDRAULIC AND ELECTRICAL SYSTEMS
 - AMS EQUIPMENT AND OPERATION (IF EQUIPPED)
- MAINTENANCE CHECKS:
 - ENGINE OIL AND FILTER
 - ENGINE COOLANT/ANTIFREEZE FREEZE POINT AND CONDITION
 - HYDRAULIC OIL AND FILTER(S)

PLANTERS

SAVE YOUR MONEY

No need to install precision planting. Go with ProMax!

OVER 90% OF ROW UNITS TESTED BY GVE CAN ACHIEVE AT LEAST 95% SINGULATION OR HIGHER, WITH NO PARTS NEEDED!

WITH GVE OPTIMIZATION, 99% SINGULATION IS NO PROBLEM FOR YOUR JOHN DEERE PLANTER!

PLANTER INSPECTION

INCLUDING METER TESTING

\$70/row

PLANTER METER TESTING

\$35/row

- LET US REVIEW YOUR MACHINE FOR FAILED AND WORN PARTS AS WELL AS PERFORM METER TESTING WITH YOUR SEED TO ENSURE OPTIMUM PERFORMANCE IN THE FIELD NEXT SEASON
- WE CAN PERFORM INSPECTION AND METER TESTING AT OUR SHOP OR ON YOUR FARM

PLANTERS:

- **PLANTER INSPECTION CHECKLIST:**
 - Row Cleaners (if installed)
 - Parallel Arm Bushings
 - Row Unit Mounting - U-bolts, etc
 - Seed Firmers (if installed)
 - Seed Tube and Seed Tube Guards
 - Disk Openers - Wear and Contact
 - Depth Adjustment Linkage
 - Closing Wheel Bearings
 - Closing Wheel Springs
 - Closing Wheel Tail
 - Meter Drive System - Drive Dogs, Chains, etc
 - Planter Bar - Level and Correct Height
 - Downforce Spring Condition
 - Wiring Visual - Pinch, Damage, etc
 - Vacuum - Fold Connection/Plugs

IMPROVE PLANTING PERFORMANCE WITH PROMAX 40-, 64- AND 90-HOLE SEED DISKS – MAJOR PLAYERS IN GVE'S TOTAL PLANTING SOLUTION!

The **ProMax 40** Flat Disk accurately singulates a wide variety of corn seed sizes and shapes – for exceptional seed spacing and population control. The ProMAX 40 disk is made up of forty, 4.5mm holes, each one perfectly designed for pulling in and retaining a large variety of seed shapes and sizes. (Disks with fewer holes have more trouble picking up seed). The **ProMax 40** is even more effective when used with the double eliminator - a factory installed device that prevents more than one seed from being planted at a time. Altogether, the **ProMax 40** Flat Disk and double eliminator metering system deliver 99% singulation of today's seed sizes or types along with world-class spacing. No other meter offers the level of repeatability.

Even with all that, the ProMAX 40 disk offers you more:

- Its sturdy design gives you unmatched wear life to last through tough planting seasons.
- **ProMax 40** is less expensive than comparable flat seed disks.

Use the **ProMax** single row **64-hole** soybean disk for better seed spacing and singulation when working on 15 inch spacing. For planting rates up to 50 seeds/second, the 64-holes soybean disk may reduce Seed Spacing Coefficient of Variation (COV) up to 50%.

The **ProMax 90** makes planting canola with a row crop planter possible! This disk features agitator pockets for consistent seed pickup, shallow holes for a more uniform seed release, special static dissipative material to prevent seed from sticking to the disk and a flexible knockout wheel to reduce wear and breakage.
