

* ECSTRA PUTTY+

Waterproof, Breathable Wall Putty

5 kg

EcstraPutty+ is a high-quality waterproof white cement-based wall putty designed for both internal and external walls. It's specially formulated to provide a smooth, glossy finish, durability and a strong bond with the base plastered surface. The DeepDry™ technology ensures its waterproof properties while allowing trapped moisture to evaporate, keeping your walls dry and healthy.

PERFECT FOR

Exterior and interior walls | Living rooms | Bedrooms | Hallways | Kitchens | Building facades | Balconies

ECSTRA ADVANTAGES

Smooth Finish | 100% Waterproof | Breathable - no trapped moisture | Durable | Crack Resistant | Easy to Apply | DeepDry™ technology

HOW TO USE

Surface Preparation:

Clean the surface thoroughly, removing dust, oil, and other contaminants. Ensure the surface is even and repair any cracks or holes. Pre-wet the surface before application for better adhesion.

Mixing:

Mix EcstraPutty+ with clean water (400-500 ml per kg of putty) to form a consistent paste. Use a mechanical stirrer for best results. Let the mixture rest for 10 minutes before use.

Application:

Apply the first coat using a putty blade or trowel, maintaining a 1-2 mm thickness. Allow drying for 3-4 hours. Apply the second coat to achieve the desired finish. Sand the surface lightly after drying for a smooth finish.

COVERAGE

Approximately 1 kg/m² for 1 mm thickness. Actual coverage depends on surface condition, substrate profile, application method, and wastage.

SPECIFICATIONS

Appearance & Colour	White/ Powder
Type of Product	WBD component, PP fibers
Bulk Density @27oC kg/m ³	1350±50
Particle Size	≤ 44 µm
Pot Life @27°C	>3 Hours
Recommended Thickness for 2 Coats	2 – 3 mm
Max. Depth of water penetration	<1mm

ALWAYS BE SAFE

Use appropriate protective equipment | Ensure adequate ventilation during application | Avoid contact with skin and eyes

SHELF LIFE

12 months | When stored in unopened containers in normal warehouse conditions
