

# About the game

This is a crypto game with simple rules. You have a playing field and choose a bet and a target multiplier. Your win or loss depends on whether the value you chose is greater or less than that appeared on the game field. The game has some interesting features allowing to build your own playing strategy. Despite its simplicity, the game will catch you for a long time.

## How to play

Choose a bet in the **Bet amount** field. Choose a multiplier in the **Target multiplier** field. Press the **Bet** button. The bet amount will be charged off from your account. After that the value in the center of the field starts to increase and stops at a moment. If the value chosen by you is less than that on which the game stopped, it is a win, and the winning amount (your bet value multiplied by the value of the multiplier chosen by you) goes to your balance. If the value chosen by you is larger than that on which the game stopped, it is a loss.

The maximum winning amount in the game is 10000x.

## Automode

Automode is available in the game. In this mode apart from a bet amount and a target multiplier a player can choose bet behavior when winning or losing, and there is the option of a game stop when a certain amount is won or lost.

## Features

**Profit on win.** Is available only in the manual mode. Shows the player the winning amount at the current parameters.

**On win.** Is available only in the automode. Allows to choose the bet change in case of a win. The variants of the changes are: to remain the bet unchanged, to increase the bet.

**On loss.** Is available only in the automode. Allows to choose the bet change in case of a loss. The variants of the changes are: to remain the bet unchanged, to increase the bet.

**Stop on profit.** Is available only in the automode. Allows to stop the game when a certain winning amount is reached.

**Stop on loss.** Is available only in the automode. Allows to stop the game when a certain loss amount is reached.

**Win chance.** Shows a player a chance of a win at the current value of a target multiplier.

**Number of bets.** Is available only in the automode. Allows a player to choose the number of rounds.

## Return to Player

The overall theoretical Return to Player (RTP) is {RTP.main}%.

## RNG

The game is based on a certified random number generator. For more information, visit <https://www.bgaming.com/>.

## Additional information

Malfunction voids all plays and pays! All unfinished rounds will be terminated every six hours. If the game requires “Collect” - “Collect” will take place and the win from the round will be added to the player balance. If the game requires action from a player, the result is counted assuming that the player has chosen the action with no risk without raising the initial bet.
