General Medicine

This project focuses on providing medical supplies and other medical materials to healthcare facilities in the Kharkiv region.

As part of the program, over 30 medical institutions in the city of Kharkiv and Kharkiv Oblast received medications and equipment, and more than 60,000 patients received assistance. The aid was delivered in-kind from private philanthropists.

Patient Feedback

Men, from Valky

My condition is now satisfactory, thanks to the treatment I've received. After completing six courses of chemotherapy, I was prescribed a two-year course of targeted therapy with Rituximab to prevent a relapse. It is through CO 'Mission Kharkiv' that I receive this vital medication.

I consider their work to be outstanding: everything is timely, clear, and accessible for everyone who needs help. I am sincerely grateful for the assistance I've been given. Without their help providing this medication for free, I would not have been able to afford such an expensive treatment.

Thank you for helping people like me receive not only treatment but also hope and faith in the future. The support from my family, and the help from your organization, is what gives me hope.

Men, IDP, from Kharkiv

My name is Oleksandr V. Before the full-scale Russian invasion, I lived in Kharkiv. I am now an internally displaced person (IDP) living in Dnipro. Currently, I am unable to work due to my health condition.

From Mission Kharkiv, I received essential medication (5-fluorouracil and oxaliplatin) completely free of charge. I am incredibly grateful for the prompt and free assistance. The staff always treats you with immense care and kindness, helping to resolve any issue quickly.

My love for my family and faith in our country are what give me hope.

Thank you for your compassionate support during this difficult time in my life

Woman, 70 year old, from Dovzhyk village

For me personally, in these difficult times, help is priceless.

Thank you for the existence of a foundation like Mission Kharkiv and for the people who come to the aid of those who are ill. Without you, I would not have been able to receive my treatment in full. Thank you, you kind people. My deepest gratitude to you!

What gives me hope is that, thanks to your foundation, Mission Kharkiv, I can get treatment and have a chance to live a little longer on this beautiful land, in our wonderful Ukraine!"

Woman, 38 years old

When I was diagnosed with cancer, the oncology center told me that medications were currently unavailable and said I had to find them on my own. Thank you to the Mission Kharkiv hotline for being so responsive, and thank you for helping me get the medication.

Women, 49 years old, from Sheludkivka village

I am unable to work right now because I am undergoing treatment at the Regional Hematology Department. The medications that Mission Kharkiv provides are Rituximab and Endoxan.

I rate your organization's work as excellent. In times like these, I simply don't have the money for treatment, yet Mission Kharkiv provides such significant help for free.

I wish your entire team goodness, health, a swift victory, and peace. Thank you sincerely for giving me a chance at life

Overall project cost

Bunker Project

In December 2022, Mission Kharkiv designed and began construction of a cold storage warehouse for medical preparations requiring a temperature regime of +2 to +8°C.

To ensure the maximum secure storage of medications, an underground shelter was chosen to protect against missile and artillery strikes. The facility is also equipped with a security system, video surveillance, and uninterrupted power supply.

Surviving the Winter

Providing households with high-quality solid fuel boilers, each valued at UAH 14,000, in areas of the Kharkiv region significantly affected by occupation and military operations.

During the preparation for winter and the winter period of 2022-2023, approximately 70 households in the Velykyi Burluk and Derhachi communities of Kharkiv Oblast, which suffered from military actions, were provided with these boilers.

Financial Statistics 2022

Broad facts about expenditure

TOTAL PROJECT EXPENDITURE

€5,767,772.37

Project Expenses	€57,763.16	1.0%
Oncological Drug Distribution	€4,913,596.62	85.2%
General Medicine	€743,399.75	12.9%
Charitable Aid	€53,012.84	0.9%

The vast majority, 85.2% (€4,913,596.62), was dedicated to Oncological Drug Distribution via the "Ukraine Cancer Relief" project, providing vital free anti-tumor drugs and chemotherapy to cancer patients, especially near combat zones.

General Medicine received 12.9% (€743,399.75), enabling support to over 30 medical institutions in Kharkiv and assisting over 60,000 patients, showcasing systemic primary healthcare support.

Charitable Aid comprised 0.9% (€53,012.84), covering humanitarian efforts like providing high-quality solid fuel boilers to around 70 households through the "Surviving the Winter" project.

Crucially, Total Project Expenses accounted for a minimal 1.0% (€57,763.16), highlighting Mission Kharkiv's high operational efficiency and maximizing resources directed to beneficiaries.
