

Transforming Financial Services Through

Intelligent Technology Solutions

We engineer the technology backbone for modern financial services.

Algorithmic Trading Platform

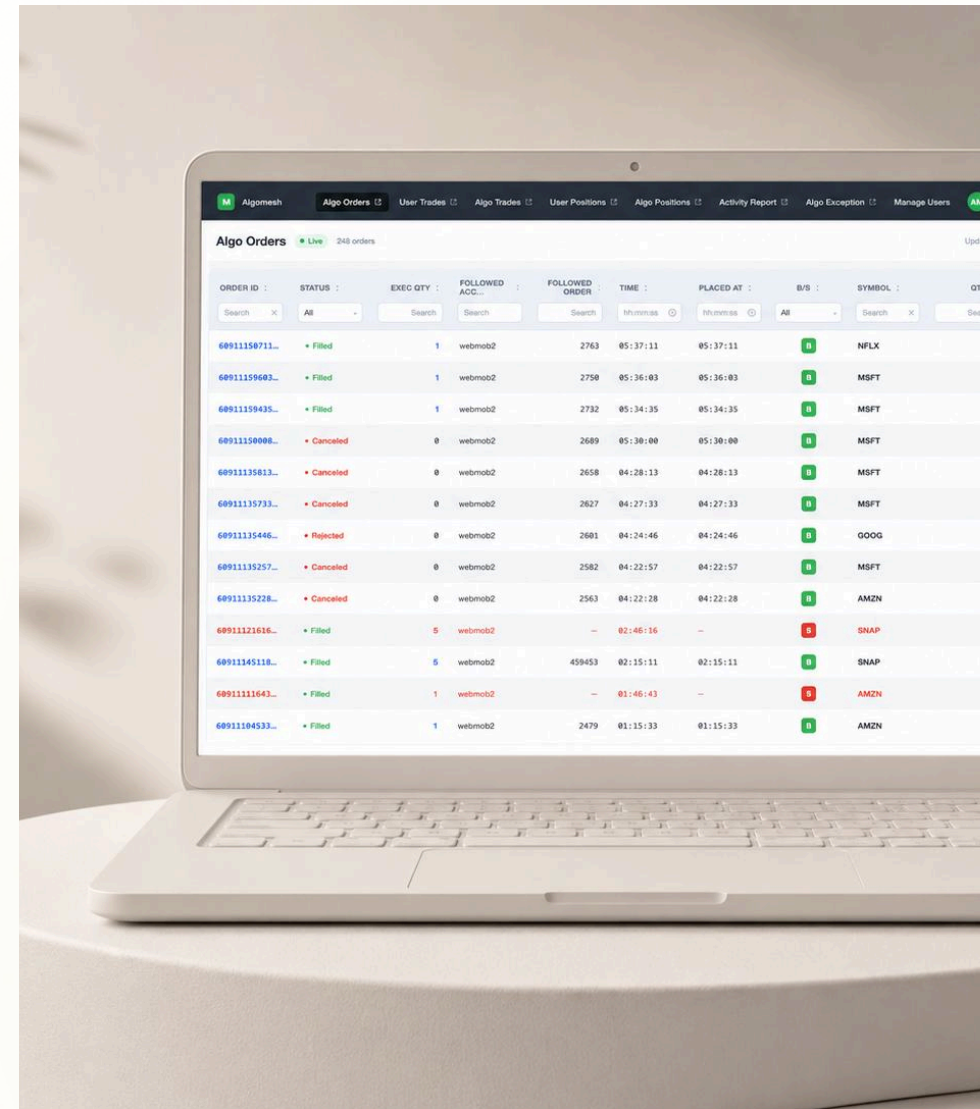

Empower your trading business with a high-performance Algorithmic Trading Platform designed for speed, reliability, and scalability.

It acts as the central trading hub, seamlessly connecting trading applications with global execution venues. From real-time order validation and risk checks to FIX connectivity and intelligent order routing, it ensures efficient execution with minimal latency.

Key Business Benefits:

- Faster trade execution and improved market access.
- Centralized risk management and order processing.
- Scalable architecture for growing trading volumes
- Complete visibility into orders, positions, and account activity

Whether you're launching a new brokerage or scaling an existing trading operation, we deliver the foundation for a robust and competitive trading ecosystem.

Transaction Monitoring System (TMS)

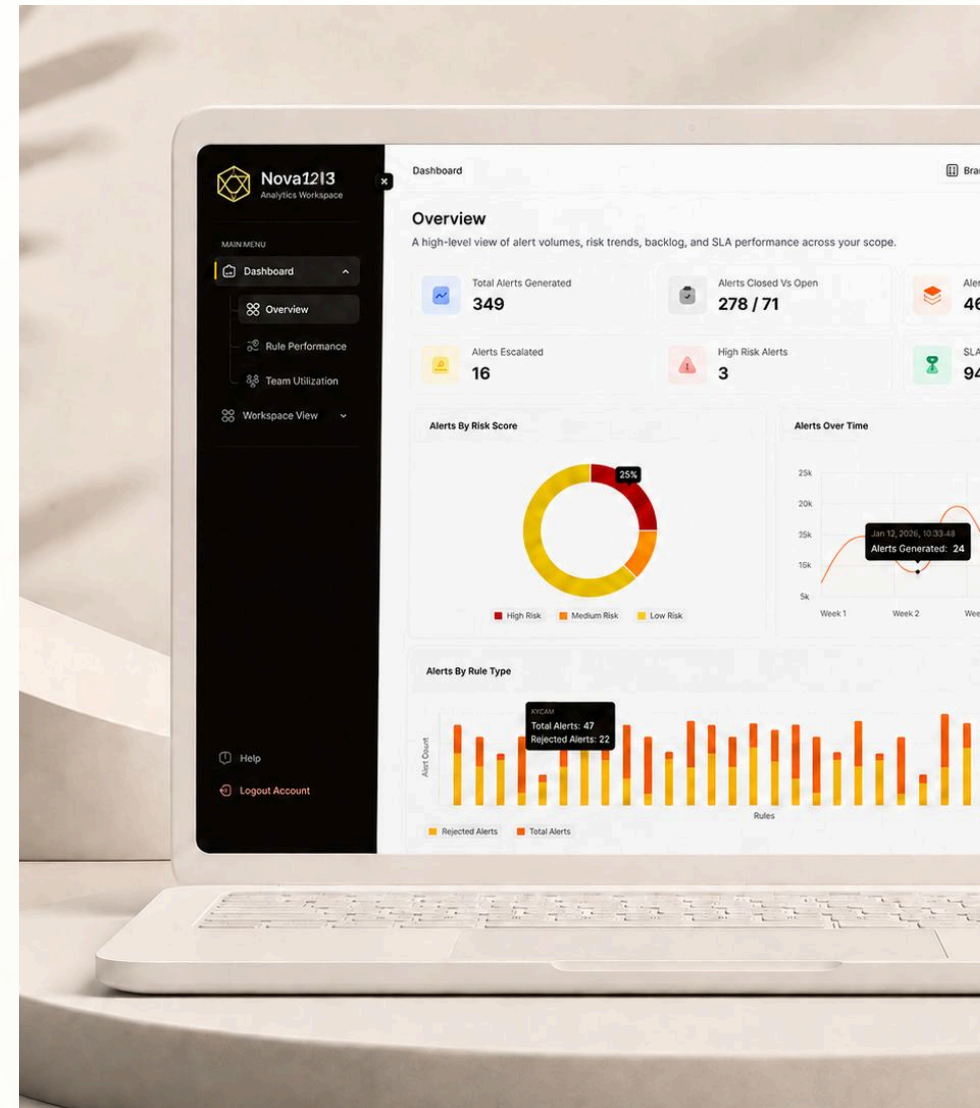

Stay ahead of regulatory requirements and financial crime risks with an Intelligent Transaction Monitoring System.

The system continuously analyzes transactional activity, identifies suspicious patterns, and generates actionable alerts, enabling compliance teams to focus on high-risk activities rather than manual reviews.

Key Business Benefits:

- Enhanced AML and compliance monitoring.
- Reduced false positives through intelligent alert management.
- Faster investigations with integrated case management.
- SLA-driven workflows for operational efficiency.
- Fully auditable compliance processes.

Designed to adapt to evolving regulations, TMS provides the flexibility and scalability required by modern financial institutions.

TradingView Broker Integration

Expand your trading offering and reach a global audience by integrating your brokerage platform with TradingView.

We enable seamless synchronization between TradingView and your trading infrastructure, allowing clients to execute trades directly from one of the world's most popular charting and analysis platforms.

Key Business Benefits:

- Access to a large TradingView user community.
- Enhanced client trading experience.
- Real-time order and position synchronization.
- Reliable and scalable order execution framework.
- Faster time-to-market for brokerage services.

We integrate TradingView into your stack so clients trade from a platform they already trust, while you keep full control of your backend.

ClearBank Integration Platform

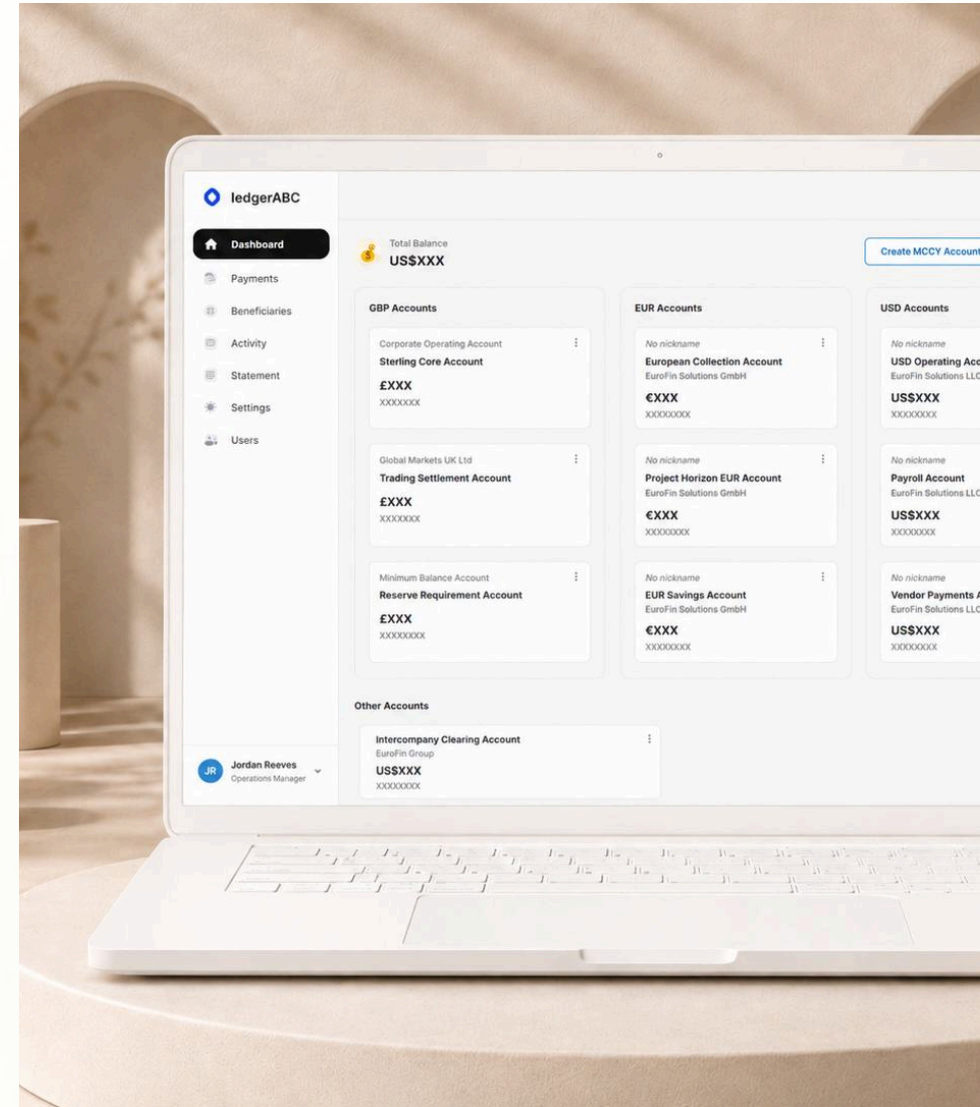

Modernize your banking and payment operations with direct integration into ClearBank's real-time banking infrastructure.

We centralize payment processing, account management, and financial controls, helping organizations streamline operations while maintaining complete visibility over cash flows.

Key Business Benefits:

- Faster GBP and multi-currency payment processing.
- Automated approval and reconciliation workflows.
- Improved financial governance and control.
- Reduced operational costs and manual effort.
- Real-time visibility into banking operations.

Enable your finance teams to operate with greater confidence, efficiency, and scalability.

Reporting & Analytics Platform

Turn complex trading and operational data into actionable business intelligence.

We give decision-makers real-time visibility into performance, profitability, client activity, payouts, balances, and operational metrics through intuitive dashboards and customizable reports.

Key Business Benefits:

- Real-time business insights.
- Improved decision-making through data-driven intelligence.
- Automated report generation and distribution.
- Enhanced transparency and auditability.
- Scalable reporting for growing operations.

Gain the visibility needed to optimize performance and drive sustainable growth.

Management Operations Portal (MOP)

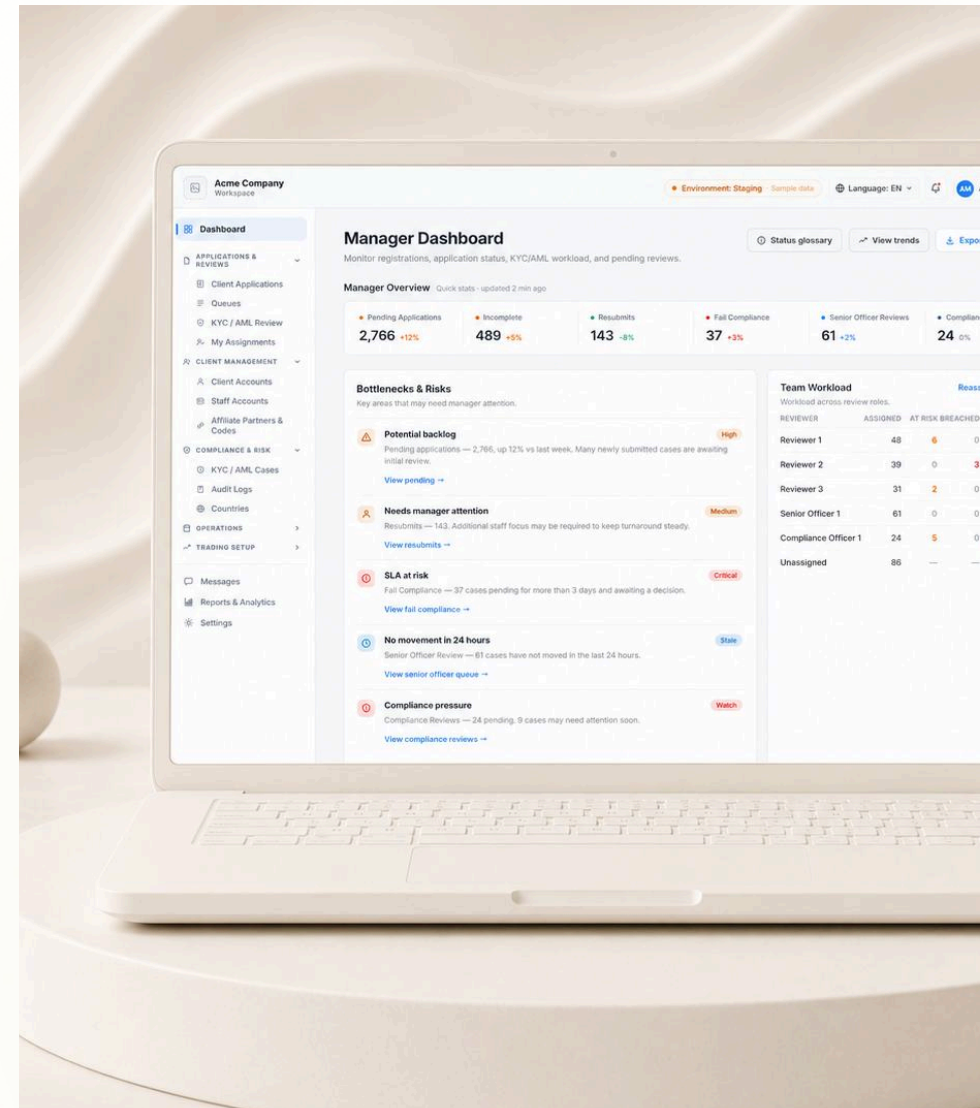

Simplify brokerage operations with a centralized platform for onboarding, compliance, and operational management.

The Management Operations Portal streamlines every stage of the client lifecycle, from KYC reviews and account provisioning to funding operations and ongoing account administration.

Key Business Benefits:

- Faster onboarding and operational workflows.
- Stronger regulatory compliance and governance.
- Centralized management of client operations.
- Support for multiple jurisdictions and regulatory frameworks.
- Increased operational efficiency and scalability.

Empower your operations teams with the tools needed to manage growth without increasing complexity.

Client Operations Portal (COP)

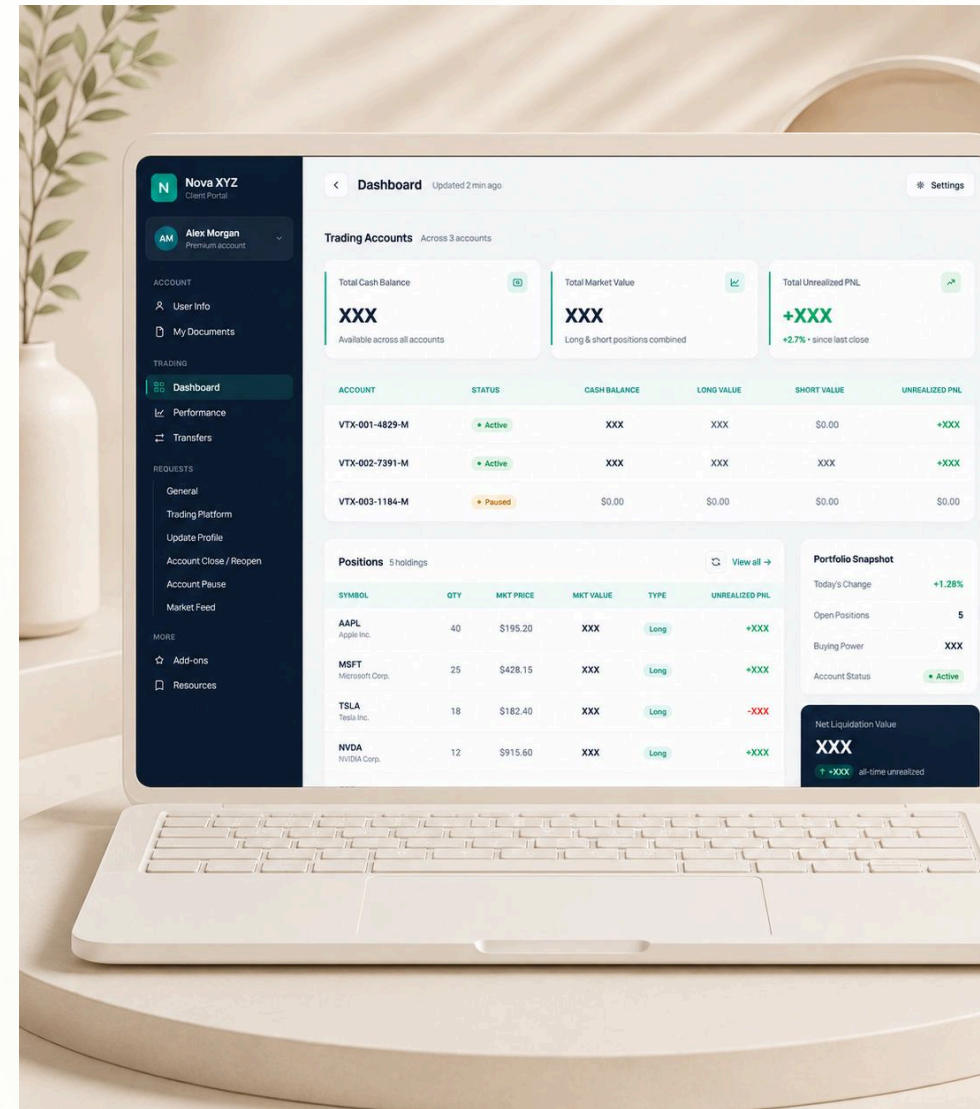

Deliver a seamless digital experience that enhances client satisfaction and accelerates onboarding.

The Client Operations Portal serves as a self-service gateway where clients can register, complete verification requirements, manage accounts, submit documentation, and access essential services through a modern and intuitive interface.

Key Business Benefits:

- Reduced onboarding friction.
- Improved client retention and engagement.
- Faster account activation.
- Increased self-service capabilities.
- Consistent user experience across multiple regions.

Create a client journey that differentiates your brokerage and drives long-term loyalty.

AI-Powered KYC Verification

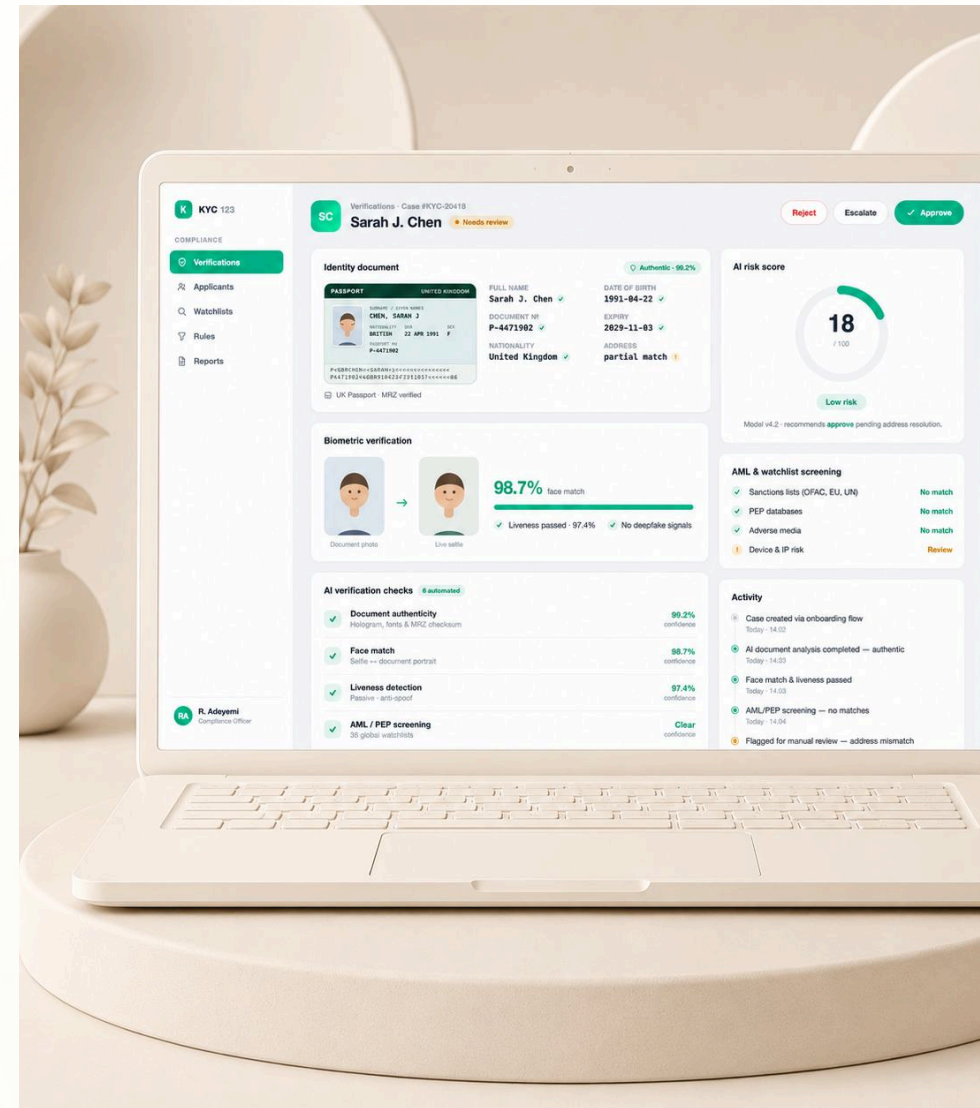

Accelerate customer onboarding while strengthening compliance with AI-driven KYC.

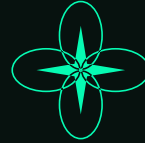

Using advanced AI and document intelligence, the platform automatically extracts, validates, and verifies customer information from identification and proof-of-address documents, significantly reducing manual effort and onboarding delays.

Key Business Benefits:

- Faster customer verification and onboarding.
- Reduced manual review effort.
- Improved data accuracy and consistency.
- Enhanced compliance and fraud prevention.
- Better customer experience.

Transform KYC from a time-consuming compliance process into a competitive advantage.

Why Organizations Partner with Us?

We don't sell off-the-shelf products - we work as a **technology partner** to help organizations build, modernize, and scale **complex financial technology solutions**.

Our Expertise Spans:

 Fintech & Brokerage Platforms.

 Trading Systems & FIX Connectivity.

 Banking & Payment Integrations.

 AML, KYC & Compliance Solutions.

 AI & Intelligent Automation.

 Data Analytics & Reporting.

 Cloud-Native & Scalable Architectures.

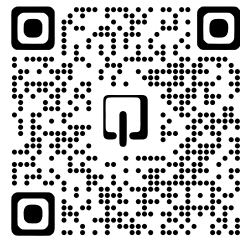

Whether you're building a new platform from the ground up, modernizing legacy systems, integrating third-party services, or scaling an existing solution,

We provide the **engineering expertise** needed to transform ideas into **secure, scalable, & production-ready platforms.**

Thank You 🙌
