

Phishing Tackle: Managed Service Offering

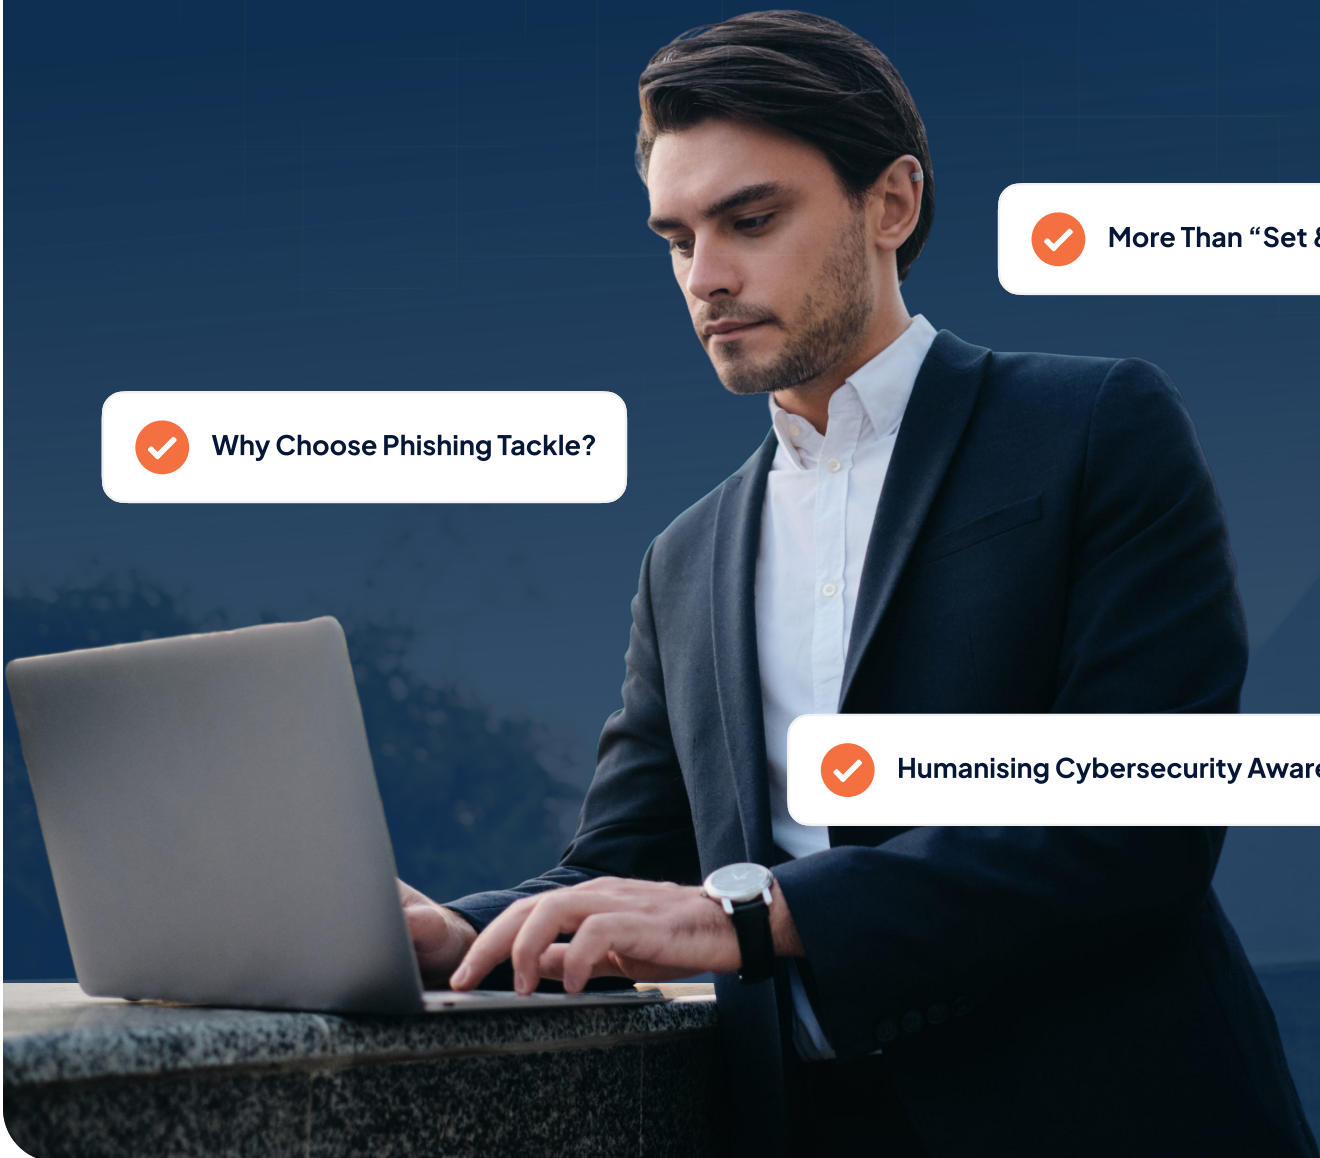

Why Choose Phishing Tackle?

More Than “Set & Forget”

Humanising Cybersecurity Awareness

Humanising Cybersecurity Awareness

With human error causing over 90% of all data breaches, educating users and building a solid human risk strategy can be a challenge for organisations.

Time, resources, and expertise often prevent a consistent and effective awareness strategy. That's why Phishing Tackle provides a fully managed service: combining innovative tools, automation, and dedicated expertise to deliver measurable results, fast.

More Than “Set & Forget”

Many providers run automated phishing and training campaigns, tick a compliance box, and walk away. With Phishing Tackle's Managed Service, you gain an expert account manager who:

- ✓ Designs a complete human risk strategy tailored to your needs.
- ✓ Continuously refines campaigns based on data and user risk scores.
- ✓ Actively reduces user risk across your organisation quickly.

We don't just automate, we partner with you to make sure the strategy works.

Smarter Insights, Immediate Action

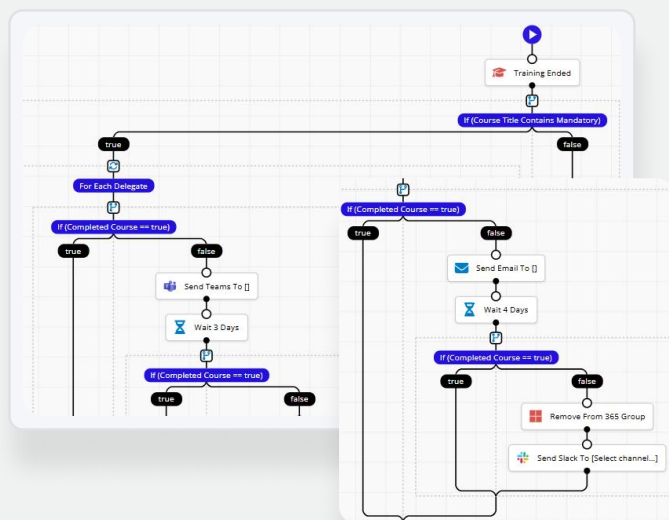

PhishEye: Human Risk Manager

PhishEye allows us to build risk parameters based on your internal policies:

- ✓ The department's users sit in
- ✓ Their role or position
- ✓ Whether they've completed training
- ✓ How they interact with simulations

Place	Risk Level	Name	Risk Score	Phishing Profile	Department
1	High	Brenda Dayson	114.01	● ● ● ● ● ● ● ●	Sales
2	High	Riley Terrance	104.1	● ● ● ● ● ● ● ●	Product Management
3	Moderate	Ricky Brothwood	88	● ● ● ● ● ● ● ●	Sales
4	Moderate	Brian Dickson	87.9	● ● ● ● ● ● ● ●	Sales
5	Low	Cynthy Racher	78.18	● ● ● ● ● ● ● ●	Engineering
6	Low	Ray Finkle	78.14	● ● ● ● ● ● ● ●	Sales
7	Low	Jim Phish	77.92	● ● ● ● ● ● ● ●	Office Technology

This data is fed into PhishEye to produce immediate risk profiles, allowing us to build and refine strategies around these live scores.

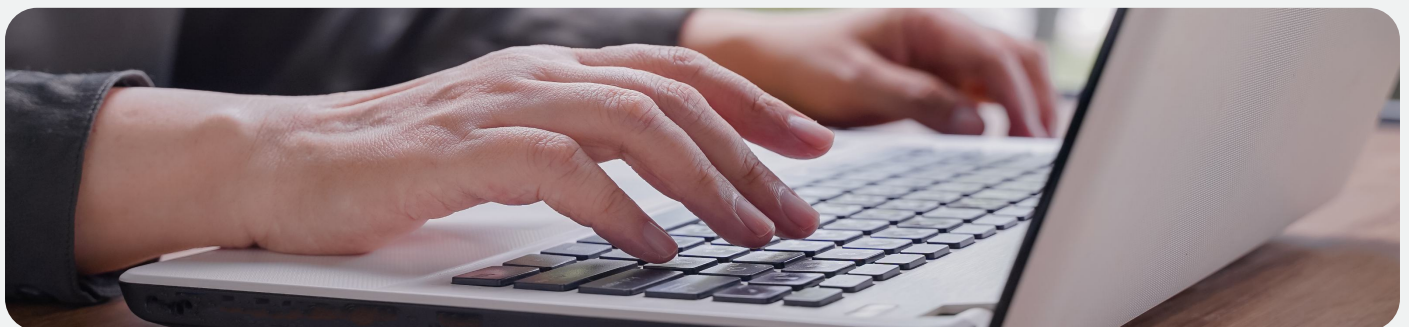

Starphish: Automated Workflows

With Starphish, we then build automated workflows to act on these insights. For example, we can:

- ✓ Alert managers via Teams, Slack, or Google Chat about high-risk behaviour
- ✓ Flag non-completion of mandatory training
- ✓ Escalate repeated risky actions
- ✓ Even remove privileged access rights if required

With Phishing Tackle's Managed Service, you have an expert on your team, working with you and for you to ensure we build the strategy exactly as you want it.

What's Included in **Managed Service**

Your dedicated Customer Success Manager ensures you get results. Each month, we:

Run 4+ bespoke phishing campaigns

Create custom phishing templates

Monthly testing and training campaigns

Monthly one-to-one calls

Provide live breach data reports

Build custom quizzes/surveys

Analyse user behaviour & risk patterns

Granular reports with campaign stats, overview & Click Prone® metrics

Why Choose **Phishing Tackle**?

- Drive risk down to **3% Click-Prone® within weeks**
- Analyse real-time user behaviour to guide decisions
- Get clear ROI reporting that proves a measurable reduction
- A true partner, not just software, your dedicated expert builds the strategy with you

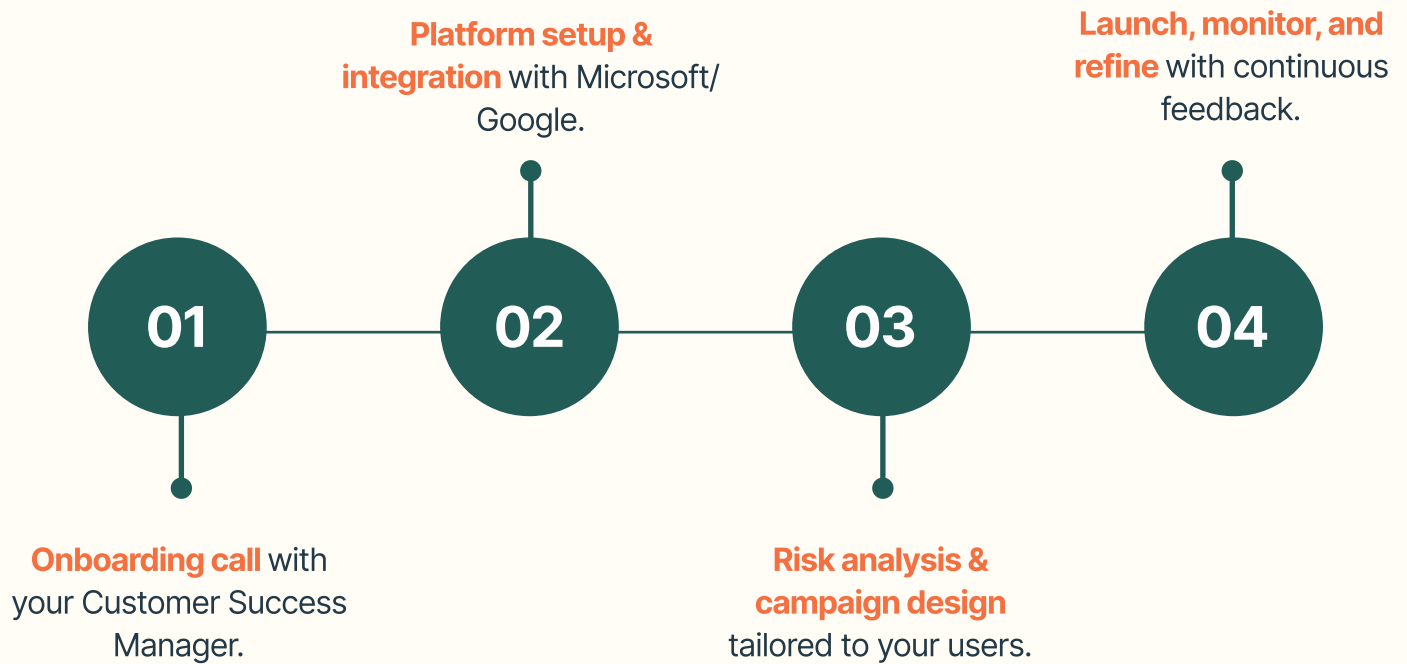

Pricing
