Emergency Operation Plans

Most organizations have emergency plans, but they are often out of date or too generic and can be ineffective during a critical incident.

Emergencies can create a variety of hazards and risks for employees. Preparing before an emergency happens is vital to ensuring that employers and their teams have the necessary equipment, know where to go, and know how to keep themselves safe when an emergency occurs. Emergency preparedness planning is the foundation of any secure organization. SEC consultants will work with your team to design a customized Emergency Operations Plan that will support your organizational initiatives at each individual facility.

Why Choose SEC?

Our team has over 100 years of combined expertise at the highest level of security and law enforcement.

SEC has partnered with thousands of different workplaces, schools and childcare centers across the US.

We provide ongoing support for implementing recommendations up to one year after your initial site assessment.

The SEC team includes experts from the Secret Service, FBI, Homeland Security, Navy Seals, Green Berets and law enforcement.

SEC has no financial affiliations with any security brands or products.

Emergency Operation Plan Options

To best fit your needs, we offer the Digital Emergency Operation Plan template with up to two hours of personal consultation or our Full-Service Emergency Operation Plan Development.

Full-Service Emergency Operation Plan Development

SEC will work closely with your team to fully develop a comprehensive and tailored Emergency Operation Plan in support of your organization's safety goals. By creating a best practice Emergency Operation Plan across your organization, standards can be established, supported, and monitored.

SEC will establish the following key components:

- Identify internal emergency response from key personnel.
- Document roles and responsibilities for internal emergency response personnel.
- Provide response procedures aligned with the emergency response objective for evacuation, shelter-in-place, lockdown, and lockout.
- Establish response protocols for a variety of emergencies or critical incidents, such as natural disasters or medical emergencies.
- Designate alerts and notification protocols to internal and external resources.
- Allow each building or site to insert information, where noted, to ensure customized, site-specific plan(s).

Digital Emergency Response Plan Template

Starting with an SEC master template, built from decades of collective experience, a unique EOP digital master is created for your workplace with the intent that it can be modified by each facility. This ensures each building has a customized EOP based on the site's physical structure and environment. The EOP digital master template requires approximately 20% customization for each site.

The Digital Emergency Operation Plan is delivered in Word format so that each building or site can modify the plan for its own needs. SEC includes up to two hours of consulting to answer questions, provide best practices and review the completed Emergency Operation Plan.
