Virtual Childcare Security Package

At SEC, we recognize that ensuring the safety and security of your childcare facility is more critical than ever. We also understand the financial challenges many childcare providers face, requiring careful allocation of resources. To address these needs, we've developed a comprehensive, cost-effective virtual solution designed to help you maintain the highest standards of safety and security while staying within budget.

Step 1: Virtual Needs Assessment

SEC is committed to helping every organization stay safe. Our roots began in the childcare industry and have pivoted quickly to support clients across the country, who face unprecedented challenges when it comes to the safety of their clients and staff.

We believe planning is key. The first step to establishing a safe and secure facility requires a baseline understanding of the internal environment, including current strengths, capabilities, and resources that could support a safe learning environment. SEC will begin by conducting a virtual needs assessment with your leadership team, reviewing existing policies and procedures such as onboarding, employment screening, alert systems, training, and physical security. SEC will provide a 60-90 minute exploratory consultation, along with a key findings overview report.

Real live support, guidance, and expertise.

With SEC, a team of former Secret Service agents, Homeland Security agents, FBI agents, Green Berets, Navy SEALs and law enforcement officers come together to provide you with realistic recommendations.

Step 2: eSEC Online Training Courses

You take your protective responsibilities seriously but may not always have the time or the resources to provide the training your employees need. With the eSEC online training platform, your employees receive access to our comprehensive library of training courses and resources, available at any time and from anywhere.

With the Virtual Childcare Security Package, your school will begin with a virtual needs assessment and can then choose up to (3) annual courses within the eSEC Online platform to train new and existing staff member throughout the year.
