

Performance Where You Need It. Capacity Where You Don't.

JetStor infrastructure paired with StorONE Real Time Tiering and Virtual Storage Platform keeps active data on high-performance media while automatically moving colder data to lower-cost tiers, all within one unified platform.

One platform. Smarter data placement.

Automatically place the right data on the right tier at the right time. Reduce wasted flash. Avoid rigid architectures. Get more value from every byte.

Why it Works

- ✓ Flexible drive mix
- ✓ Automatic data tiering
- ✓ Built-in data protection
- ✓ One unified platform

Ideal for

- 🧠 AI / ML
- 🗄️ Backup & Archive
- ⊕ PACS / Medical Imaging
- 🎥 Video & Enterprise Workloads
