

Unlock the Value of Your Banking Data—Securely and Compliantly

Financial institutions thrive on data—but they're also inundated by it. Sensitive customer PII, transactional data, and compliance records flood banking systems, creating a unique mix of opportunity and risk. Itouch.io gives banks and financial services firms the clarity, precision, and control they need to secure data, ensure compliance, and transform operations.

How Itouch.io Solves Financial Services's Biggest Data Challenges

See Everything with Total Contextual Visibility

Financial data doesn't live in silos—but too often, your tools treat it that way. Itouch.io changes the game by providing:

A Unified View: See your entire data landscape—structured, unstructured, or semi-structured—across all environments.

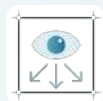

Real-Time Context: Understand not just what data you have but who is accessing it, and what risks it carries in real time.

Continuous Discovery: Stay ahead of evolving data sprawl with always-on monitoring and insights, ensuring no data is overlooked.

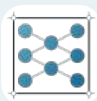

Built for Financial Services' Complex Data Ecosystem

From legacy mainframes to multi-cloud infrastructures, financial systems are varied and diverse. Traditional DLP, data catalogs, and DSPM solutions struggle to keep pace, but Itouch.io integrates seamlessly, delivering visibility and governance across even the most challenging environments.

Broad Coverage

Scan cloud, on-prem, and hybrid environments effortlessly.

Flexible Deployment

SaaS, on-prem, or air-gapped—we fit your operational and regulatory needs.

Deep Integration

Plug-and-play compatibility with platforms like Guardium, Collibra, Microsoft Purview, and more.

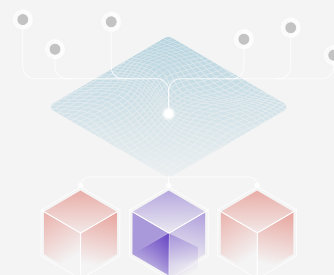

Precision That Drives Better Decisions

Financial leaders can't afford to waste time on false positives or irrelevant alerts. Itouch.io offers unmatched accuracy, enabling your teams to focus on what truly matters. Powered by AI and machine learning, our platform evolves as your data landscape grows.

Unmatched Accuracy Industry-leading 98.6% accuracy for structured data and 100% for unstructured data.

Adaptive AI Our platform evolves with your business to deliver smarter, more relevant insights.

Actionable Intelligence Empower teams with reliable, detailed insights that drive faster, smarter decisions.

Automate Compliance and Governance

Governance shouldn't be a burden. Itouch.io automates policy enforcement, compliance monitoring, and audit readiness, so you can stay audit-ready for GLBA, PCI DSS, Dodd-Frank and more without overextending your team. By embedding governance into your operations, we make compliance seamless and efficient.

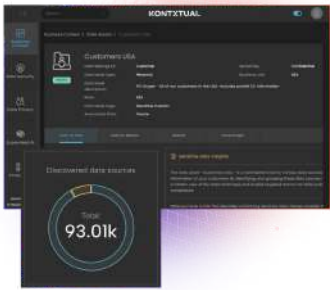

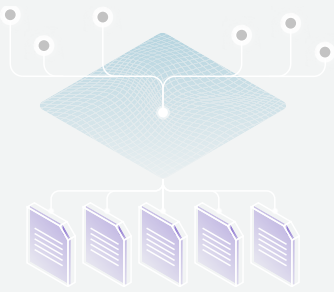

Simplify Regulatory Reporting Meet PCI DSS, GDPR, SOX and other compliance standards effortlessly.

Embed Governance Operationalize governance without disrupting workflows.

Ensure Audit Readiness Streamline reporting and eliminate manual headaches.

Control Access with Advanced Intelligence

Understanding data access is critical. Itouch.io's access intelligence identifies dormant accounts, over-permissioned users, and non-human identities, enabling you to:

- Enforce least-privilege policies confidently.
- Reduce breach risks by revoking unnecessary permissions.
- Mitigate insider threats and unauthorized access.

Use Cases: Transforming Financial Data

Financial data comes with unique complexities: sensitive customer information, stringent compliance demands, and sprawling hybrid systems. Itouch.io transforms these challenges into opportunities by:

Unifying Hybrid Security & Compliance

Financial data spans diverse infrastructures. Itouch.io unifies data visibility, ensuring compliance across cloud, on-prem, and legacy systems while addressing hidden risks.

Enhancing AI and LLM Governance

Predictive analytics and AI are critical to financial services innovation. Itouch.io secures sensitive data in AI/ML workflows, ensuring ethical operations and compliance with evolving regulations.

Reducing Data Risks

Sensitive data is a prime target for breaches. Itouch.io reduces these risks by delivering contextual insights, enabling proactive decisions, and automating protections

Advancing Data Governance

Move beyond discovery. With dynamic policy enforcement and real-time monitoring, Itouch.io ensures financial data is secure, compliant, and responsibly managed across your organization.

Proven Success: Financial Leaders Trust Itouch.io

Global 100 Financial Services Leader

A credit card and payment powerhouse faced mounting compliance challenges and operational inefficiencies. By adopting Itouch.io, they:

- **Achieved Enterprise-Wide Visibility:** Gained contextual visibility across mainframes, on-prem systems, and cloud platforms.
- **Streamlined DSAR Processing:** Reduced processing times from days to minutes, allowing analysts to focus on strategic priorities.
- **Simplified Compliance Workflows:** Consolidated disjointed tools into a unified governance platform, improving efficiency and reducing costs.

Fortune 500 Investment & Insurance Firm

This major investment and insurance provider struggled with regulatory gaps and rising cyber risks. With Itouch.io, they:

- **Enhanced NIST Compliance:** Delivered board-level audit reports ahead of schedule.
- **Improved Data Risk Mitigation:** Identified and remediated sensitive data in non-production environments, reducing exposure.
- **Integrated Seamlessly:** Worked with Guardium Data Protection and Collibra to enhance workflows and ensure comprehensive governance processes.

Your Data Is Your Greatest Asset—If You Master It

Financial data isn't just a responsibility; it's a strategic advantage. With Itouch.io, you gain the visibility, security, and governance you need to innovate fearlessly, protect what matters, and lead with confidence.
