

Unlock Data. Enable AI. Drive Growth—Securely.

1touch.io
Data Aware Security

Accelerate Growth with AI-Ready Data

Many teams want to move faster with AI—but they're hitting a wall. Whether it's data stuck in silos, compliance risks, or shadow AI projects, the path to scaling AI is rarely straightforward. Getting to value means balancing speed with trust, innovation with oversight, and access with accountability.

1touch.io helps data and security leaders get in front of these challenges, so they can unlock AI opportunities without creating new risks.

Why Trusted Data is the Foundation of AI Growth

AI runs on data. But if that data isn't trusted—if it contains PII, PHI, trade secrets, or isn't governed properly—it creates risk, not value. Shadow AI efforts, disconnected from compliance, only make things worse. Meanwhile, new rules like the EU AI Act and the U.S. AI Executive Order raise the bar for transparency.

Security alone isn't enough. You need a smarter way to discover, prepare, and manage data so it can power AI responsibly.

How 1touch.io Enables Secure, Scalable AI Adoption

End-to-End Contextual Intelligence

1touch.io provides a unified view of how data flows across the business—from cloud and SaaS to on-prem and mainframe. It doesn't just classify data—it connects it to users, policies, and workflows, giving teams the context to make smarter decisions. Security, governance, and AI teams can now work from the same data map and context—reducing friction and speeding up delivery.

Deliver Clean, AI-Ready Data from the Start

Our platform continuously discovers and classifies data at rest and in motion. With AI-specific tagging, it identifies PII, PHI, trade secrets, entitlements, and even non-human identities. This ensures only trusted data fuels training pipelines, enabling teams to move faster without compliance setbacks.

Gain the Visibility to Scale Confidently

1touch.io shows you where sensitive data lives, how it's used, and where it may be overexposed. You can spot red flags early—like test environments holding production data—before they derail an initiative. That kind of visibility helps teams validate their datasets and move forward with confidence.

Govern Data at the Source

Governance shouldn't be an afterthought. With 1touch.io, policy enforcement happens at the data layer. Attribute-Based Access Controls (ABAC) and identity-aware policies ensure only the right users and systems can access sensitive assets. This keeps AI projects aligned with both security mandates and business goals.

Plug into Your Existing Stack

Itouch.io integrates seamlessly into your existing infrastructure with over 100 connectors, including:

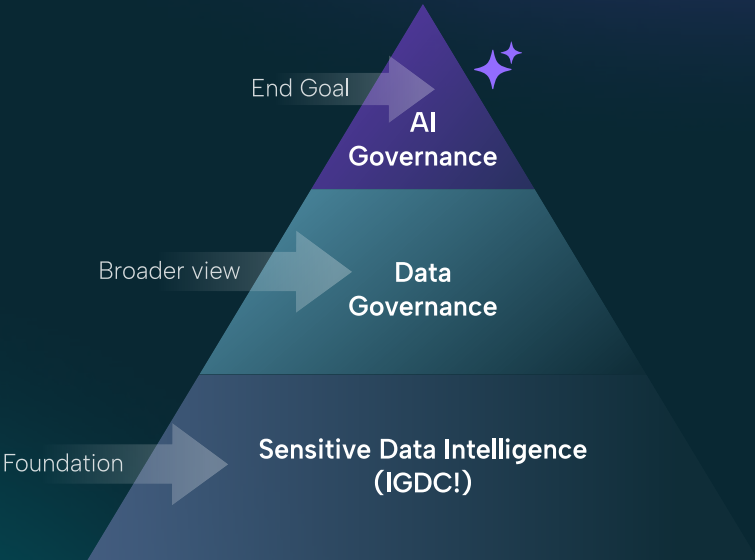

**Data Protection:** Enrich Guardium Data Protection and Guardium Data Security Center with AI context.

**Data Platforms:** Support for Snowflake, BigQuery, Databricks, and other lakes and warehouses.

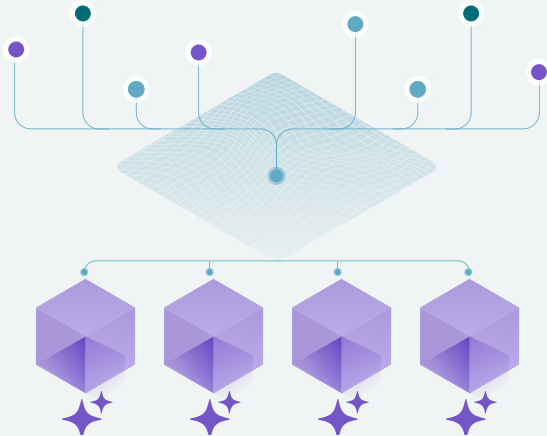

**SIEM & SOAR:** Route high-risk alerts to Splunk, QRadar, Microsoft Sentinel.

**Governance Tools:** Feed AI-relevant metadata into Collibra and Alation.

**MLOps & Security:** Open APIs for full pipeline integration

Use Cases: Unlock AI Value

Itouch.io supports teams across the AI lifecycle:

**Model Red Teaming**
Surface sensitive data before it gets exposed in training or fine-tuning.

**Governed GenAI Deployment**
Ensure RAG pipelines pull only from approved, compliant sources.

**Ethical AI Compliance**
Track and document data sourcing to support fairness, explainability, and bias detection.

**Faster Data-to-AI Pipelines**
Reduce the time from raw data to trusted training sets.

**Empowered Data Teams**
Equip your data and AI teams with the insight they need to innovate responsibly.

Results That Drive Growth

Itouch.io helps organizations adopt AI with confidence—without compromising security, compliance, or privacy.

Security

Eliminate AI-specific risks while fueling models with safe, trusted data.

Compliance

Maintain audit-ready controls, even as regulations evolve.

Privacy

Align with internal policies and protect personal and business-sensitive information.

Data Enablement

Deliver clean, compliant datasets that accelerate innovation.

Operational Efficiency

Audit teams can now get what they need in hours—not weeks. AI deployments move without backlogs.

Enterprise Results You Can Measure

98.6% Classification Accuracy at Scale
(Validated by Tolly Group)

Performance at Petabyte Scale
across globally distributed environments

Integration-First Architecture with 100+ native connectors

Proven Operational Efficiency: Reduce audit prep from weeks to hours

Unlock Your AI Future

AI will only go as far as your data foundation allows. Itouch.io helps you prepare that foundation, so your teams can move faster, stay compliant, and innovate without hesitation.
