Front End Developer
In office, based in Prague

About the Company

1touch.io is a U.S.-headquartered and Israeli-based technology. The company ensures automated, real-time discovery, mapping, and tracking of sensitive personal data flow. The company has designed an AI-based sustainable data discovery and management platform, which is called Inventa, to ensure the privacy, security, and governance of data. Our target market is large, distributed, hybrid customers that hold petabytes of information in different structures and forms in different locations - on-prem and cloud.

About the Product

The Product can deliver a very accurate master catalog of sensitive data usage to allow businesses to manage data security/compliance to complement their infrastructure-based security/compliance programs. It is a fully automated solution that covers data in any format, be it structured or unstructured, data-in-motion or data-at-rest, both known or unknown. It covers all aspects of data processing in one place and aggregates that into a master catalog containing all the customers' or employees' information.

About the Role

We are seeking a talented Front-End Developer to join our team and play a key role in designing, developing, and optimizing user-facing applications. The ideal candidate has a strong eye for design, a solid understanding of modern web technologies, and the ability to translate business requirements into intuitive, responsive, and scalable interfaces.

Responsibilities

- Develop, test, and maintain responsive web applications using modern front-end frameworks and technologies.
- Collaborate with designers, back-end developers, and product managers to deliver seamless user experiences.
- Translate UI/UX wireframes into functional, high-quality code.
- Optimize applications for speed, scalability, and accessibility.
- Implement best practices in coding, testing, and performance optimization.

- Stay current with industry trends, emerging tools, and front-end development best practices.
- Troubleshoot and debug issues across browsers and devices.

Qualifications

- 6+ years of professional experience in frontend development
- Bachelor's degree in computer science or a related field
- Strong proficiency in Angular (v15+) and TypeScript
- Solid understanding of RxJS, NgRx/Signals, and reactive programming
- Experience with HTML5, CSS3/SCSS, responsive design
- Strong knowledge of RESTful APIs and integration patterns
- Familiarity with unit testing (Jest, Jasmine, Karma, Cypress, or similar)
- Strong problem-solving and debugging skills
- Ability to write clean, maintainable, and scalable code
- Proficiency with version control (Git)
- Hands-on experience with Figma (design handoff & collaboration)
- Familiarity with Jira (Agile workflows, task management)

Nice to have

- Experience with i18n / localization in Angular apps
- Familiarity with NestJS (or similar backend frameworks)
