

“Alvys is giving us the capability to take our business from \$50 million to \$100 million.”

Adam Blanchard

CEO, Double Diamond Transport & Tanager Logistics

Why this \$50M hybrid carrier ditched their legacy TMS

Inefficient operations, lack of visibility and integrations, and excessive costs hindered Double Diamond Transport's ability to scale and provide top-notch service to customers.

Company Size:
100+ trucks

Company Type:
Hybrid

Location:
San Antonio, TX

Challenges

Their outdated, costly TMS hindered operational efficiency and scalability with separate systems for brokerage and carrier divisions, complicating management and doubling expenses.

Solution

With Alvys, both businesses are on a single platform with one subscription, enhancing visibility, reducing costs, and eliminating fees for users and integrations.

Results

Alvys TMS has enabled Double Diamond Transport to grow to over 100 trucks, achieve \$50 million in annual revenue, and a 99% on-time delivery rate.

“Alvys has gone out of its way to develop this platform **for freight people, by freight people**. When you're talking to the development team, it's freight people who understand what we're doing on a day-to-day basis and what our needs are.”

John Bejin

Director of Operations,
Tanager Logistics

“When we looked at Alvys, there was just no question that this is on the forefront of transportation management software in our industry. Alvys is giving us **everything we need in one platform** that's cloud-based, that anybody can work in in a very intuitive manner.”
