Tariff Intelligence

Early insight into trade compliance risk

Turn large trade datasets into clear compliance insight using statistical analysis and anomaly detection. Identify tariff classification risk, flag potential issues, and generate audit-ready outputs that support regulatory submissions while reducing manual review effort.
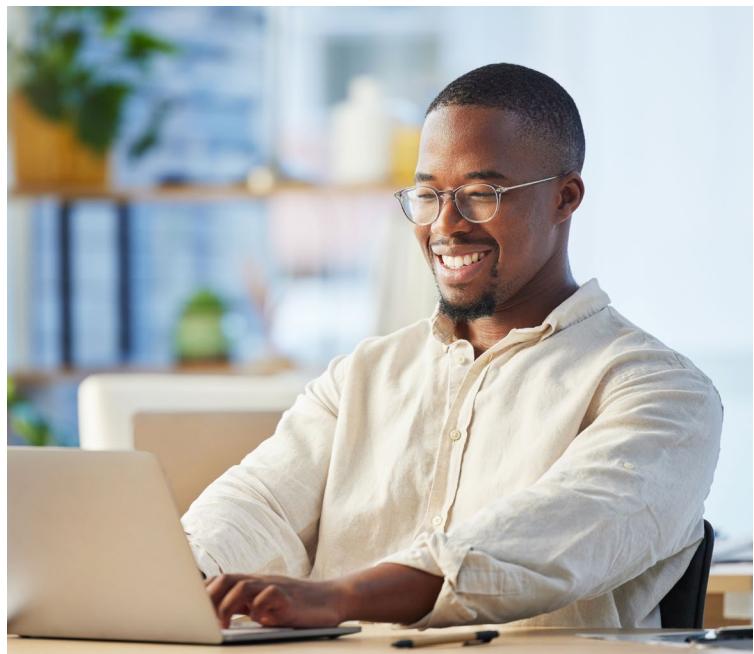

Consilio LABS

As legal technology evolves rapidly, Consilio Labs helps clients move forward with confidence by developing AI solutions grounded in real legal needs. Through structured Alpha and Beta programs, innovations are tested and refined alongside experts to ensure they deliver practical value clients can trust. Every solution is built with security, defensibility, and measurable impact at the core.

OFFERING AT GLANCE

Secure Private Infrastructure

Tariff Assist runs entirely within Consilio's secure, privately hosted environment to protect sensitive trade and customs data at all times. Analysis is performed without public cloud AI services, supporting strict security and regulatory requirements. This foundation ensures compliance insights are generated appropriately for high-stakes audits and regulatory matters.

Statistical Trade Analysis

AI-powered statistical analysis processes large trade datasets to identify patterns, trends, and outliers across import and export transactions. The system analyzes tariff classifications, duty rates, country of origin, and transaction values to surface risk indicators that would take weeks to uncover manually. This cross-transaction analysis provides portfolio-level visibility into overall trade compliance posture.

Risk & Anomaly Detection

Advanced anomaly detection identifies potential compliance risks such as tariff classification errors, valuation discrepancies, country of origin inconsistencies, and unusual transaction patterns. Risk scoring prioritizes the highest-impact issues for audit-focused review, allowing teams to focus effort where exposure is greatest. This targeted approach reduces manual population review while improving audit readiness and defensibility.

Compliance Reporting

Automated compliance reporting produces audit-ready documentation for regulatory submissions and customs defense. Reports include validated statistical methods, prioritized risk findings with supporting evidence, and clear summaries to guide remediation. Exportable formats and preserved audit trails support both internal reviews and regulator-facing requirements with confidence.

Expert Guided Oversight

Consilio's trade compliance and AI experts guide every stage of the workflow, from initial data setup through risk validation and regulatory reporting. The team works closely with customs counsel to calibrate analysis parameters, validate findings, and align outputs with jurisdiction-specific requirements. This expert oversight ensures results remain accurate, transparent, and defensible throughout the process.

Consilio

Aurora Legal AI Suite delivers specialized AI capabilities across the full legal workflow, from early investigation through review, privilege, and legal operations. Purpose-built for legal teams, Aurora connects data, AI, expert review, and delivery into a coordinated workflow that reflects how legal work actually happens, with expert-guided, transparent processes that ensure speed, quality, and defensibility from pilot to production.

Aurora Legal AI Suite

Enterprise Data → Aurora Portal + CoreECI → eDiscovery & Legal Ops Intelligence → Review Platform of Choice

DataCore
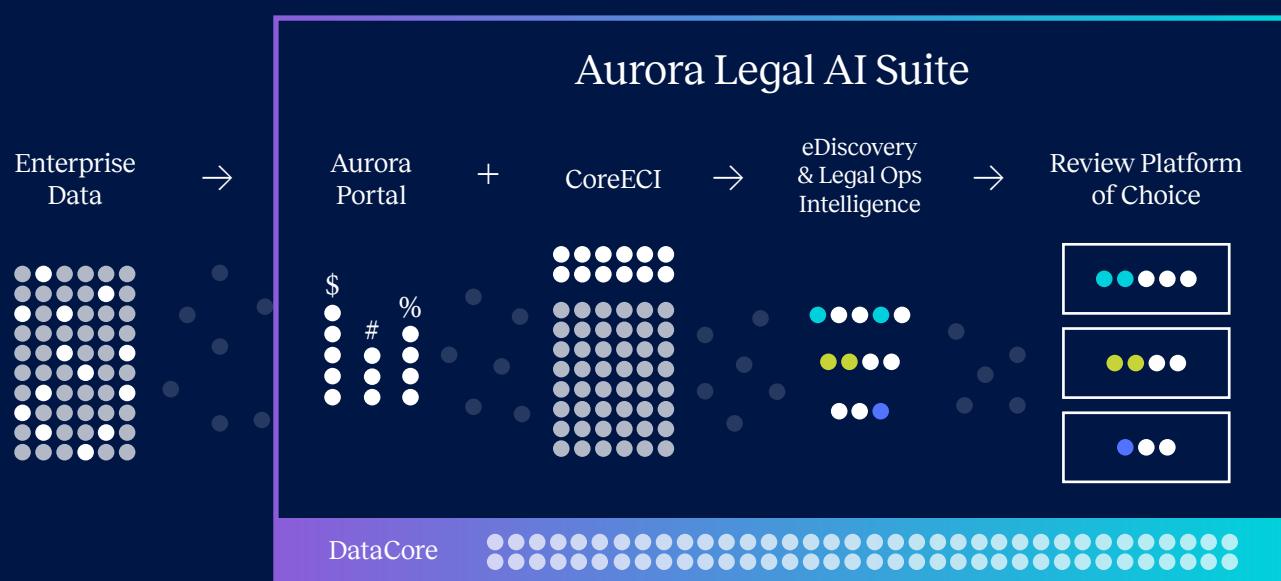

EDISCOVERY INTELLIGENCE SOLUTIONS

- **AI Investigate** - Natural-language Q&A to explore a corpus, tag/cull, and promote to review.

- **AI Summarize** - Rapidly summarizes documents to prioritize deeper review and accelerate case understanding.

- **TrueLaw AI Narratives** - Automatically builds insight reports with timelines, patterns, key players, and more.

- **AI PrivGen** - Drafts standardized privilege log descriptions at the document level for faster logs.

- **AI PrivDetect** - Assigns privilege likelihood scores (Low, Medium, High) for documents for QC or tiered workflows.

- **AI Review** - Drafts standardized privilege log descriptions at the document level for faster logs.

LEGAL OPS INTELLIGENCE SOLUTIONS

- **Deposition Intelligence (Beta)** - Turn deposition transcripts into structured, citable insight without losing context.

- **Extract Intelligence (Beta)** - Transform unstructured legal documents into structured, actionable data without predefined templates.

- **PII Intelligence (Alpha)** - Detect, classify, and redact sensitive personal data across documents accurately, visually, and at scale.

- **Protocol Intelligence (Alpha)** - Turn complex protocols into structured issues and expert-ready questions grounded in precedent and regulation.

- **Tariff Intelligence (Alpha)** - Provides statistical analysis and decision support for trade compliance and tariff audit workflows.

- **Subpoena Intelligence (Alpha)** - Streamline response from intake to payment accurately and defensibly.
