

# Protocol Intelligence

## Discovery clarity from complex protocols

Convert dense legal and regulatory protocols into structured issues, entities, and expert-ready deposition questions. AI analyzes clinical, pharmaceutical, product, and compliance protocols to support faster discovery strategy and expert preparation while maintaining defensibility.

As legal technology evolves rapidly, Consilio Labs helps clients move forward with confidence by developing AI solutions grounded in real legal needs. Through structured Alpha and Beta programs, innovations are tested and refined alongside experts to ensure they deliver practical value clients can trust. Every solution is built with security, defensibility, and measurable impact at the core.

### OFFERING AT GLANCE

#### Secure Private Infrastructure

Protocol Intelligence runs entirely within Consilio's secure, privately hosted environment to keep sensitive protocol data and case strategy protected. Analysis is performed without public cloud AI services, supporting strict security and regulatory requirements. This foundation gives legal teams confidence that protocol analysis is handled appropriately for high-stakes, confidential matters.

#### Domain-Aware Analysis

AI analyzes each protocol to determine the relevant legal and industry domain, ensuring analysis is grounded correctly from the start. It then references applicable regulations, industry standards, and workspace-specific precedent to inform results. This approach mirrors how subject matter experts evaluate protocols, rather than applying generic AI interpretation.

#### Entity & Issue Extraction

AI transforms complex protocols into structured components essential for litigation, including key entities, legal and regulatory issues, strategic priorities, and timelines. This shared, structured view helps teams align quickly and turn dense technical protocols into clear, litigation-ready insight. By organizing information the way legal teams think and work, it supports more focused discovery planning and expert preparation from the start.

#### Expert Question Generation

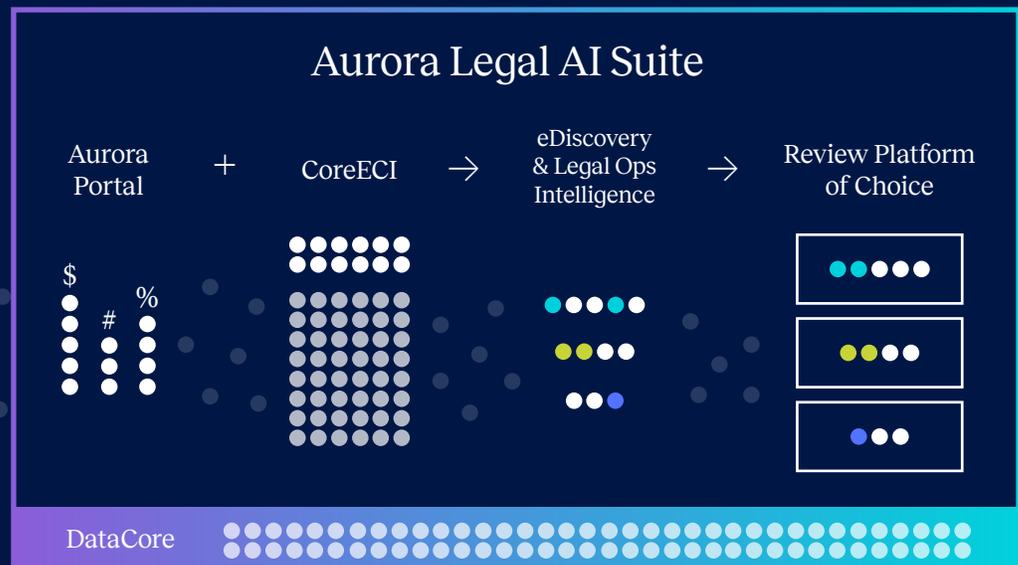

Using extracted entities and expert-grounded context, AI generates tailored deposition questions and document requests organized by legal issue and strategic focus. Each question is grounded in relevant regulations and precedent, with supporting citations to enable fast validation and use in discovery and depositions. The result is faster expert preparation and sharper questioning, with legal judgment always in the lead.

#### Expert Guided Oversight

Consilio's AI and legal domain experts guide every stage of protocol analysis, from initial context setup through structured extraction and question development. The team collaborates closely with legal teams to validate outputs, refine discovery focus, and ensure questions align with overall case strategy. This human-in-the-loop approach delivers transparency, control, and confidence throughout the process.

Aurora Legal AI Suite delivers specialized AI capabilities across the full legal workflow, from early investigation through review, privilege, and legal operations. Purpose-built for legal teams, Aurora connects data, AI, expert review, and delivery into a coordinated workflow that reflects how legal work actually happens, with expert-guided, transparent processes that ensure speed, quality, and defensibility from pilot to production.

## EDISCOVERY INTELLIGENCE SOLUTIONS

- AI Investigate - Natural-language Q&A to explore a corpus, tag/cull, and promote to review.
- AI Summarize - Rapidly summarizes documents to prioritize deeper review and accelerate case understanding.
- TrueLaw AI Narratives - Automatically builds insight reports with timelines, patterns, key players, and more.
- AI PrivGen - Drafts standardized privilege log descriptions at the document level for faster logs.
- AI PrivDetect - Assigns privilege likelihood scores (Low, Medium, High) for documents for QC or tiered workflows.
- AI Review - Drafts standardized privilege log descriptions at the document level for faster logs.

## LEGAL OPS INTELLIGENCE SOLUTIONS

- Deposition Intelligence (Beta) - Turn deposition transcripts into structured, citable insight without losing context.
- Extract Intelligence (Beta) - Transform unstructured legal documents into structured, actionable data without predefined templates.
- PII Intelligence (Alpha) - Detect, classify, and redact sensitive personal data across documents accurately, visually, and at scale.
- Protocol Intelligence (Alpha) - Turn complex protocols into structured issues and expert-ready questions grounded in precedent and regulation.
- Tariff Intelligence (Alpha) - Provides statistical analysis and decision support for trade compliance and tariff audit workflows.
- Subpoena Intelligence (Alpha) - Streamline response from intake to payment accurately and defensibly.
