LEGAL AI

Extract Intelligence

Actionable data from unstructured documents

Transform inconsistent legal documents into structured datasets using AI-powered schema generation and field-level extraction. Surface critical data from contracts, invoices, medical, and financial records to accelerate analysis and support faster decisions.

Consilio LABS

As legal technology evolves rapidly, Consilio Labs helps clients move forward with confidence by developing AI solutions grounded in real legal needs. Through structured Alpha and Beta programs, innovations are tested and refined alongside experts to ensure they deliver practical value clients can trust. Every solution is built with security, defensibility, and measurable impact at the core.

OFFERING AT GLANCE

Secure Private Infrastructure

Extract Intelligence runs entirely within Consilio's secure, privately hosted environment, ensuring sensitive document data remains protected at all times. Analysis is performed without reliance on public cloud AI services, supporting strict security, privacy, and regulatory requirements. This foundation gives legal teams confidence that extracted data is handled appropriately for high-stakes, confidential matters.

Adaptive Schema Generation

Turn inconsistent documents into structured, usable data without manual setup or rigid templates. AI-powered schema generation and field-level extraction adapt to the unique structure of each document set, producing reviewable and editable outputs aligned to matter-specific needs. Legal teams move faster from documents to analysis while maintaining accuracy, control, and defensibility.

Consistent Data Extraction

Once schemas are defined, AI processes documents in batch to extract structured data with source citations preserved. Field-level citations support fast validation and defensibility, while reviewers can easily verify and edit extracted values as needed. Clean, structured outputs can then be exported to CSV or Excel to support downstream analysis and workflows with confidence.

Comprehensive Document Analysis

Handle diverse document types including financial statements, contracts, property records, medical files, and investigative materials. The system identifies key entities, dates, amounts, obligations, and relationships across inconsistent formats, creating structured data from complex source documents. This approach supports faster matter analysis, clearer reporting, and more consistent downstream workflows.
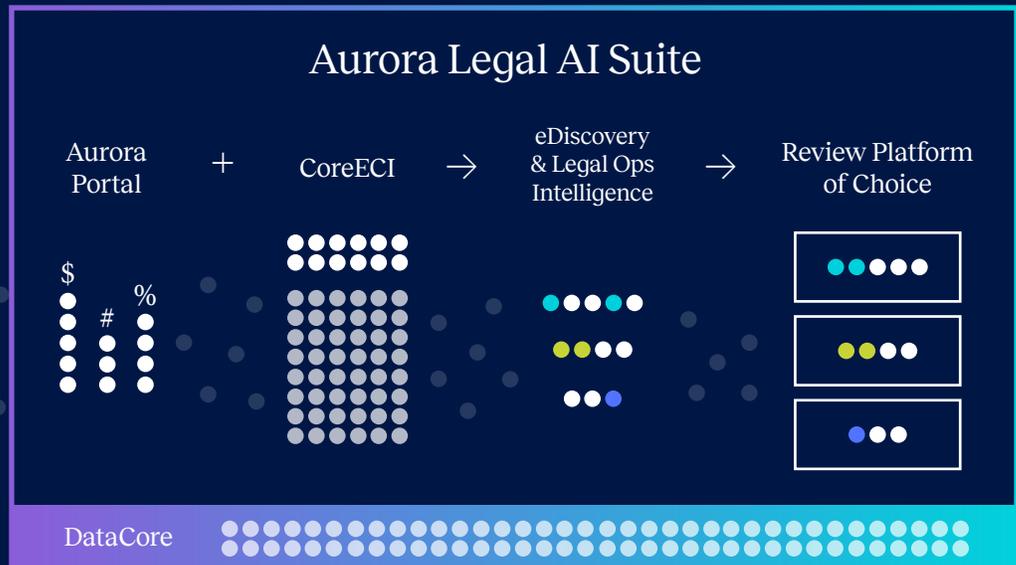

Expert Guided Oversight

Consilio's AI and analytics experts guide every stage of the workflow, from initial schema setup through ongoing refinement and quality control. The team works closely with legal teams to tailor extraction parameters and adapt focus as matter needs evolve. This expert oversight ensures extracted data remains accurate, transparent, and defensible from start to finish.

Consilio

Aurora Legal AI Suite delivers specialized AI capabilities across the full legal workflow, from early investigation through review, privilege, and legal operations. Purpose-built for legal teams, Aurora connects data, AI, expert review, and delivery into a coordinated workflow that reflects how legal work actually happens, with expert-guided, transparent processes that ensure speed, quality, and defensibility from pilot to production.

Aurora Legal AI Suite

Enterprise Data → Aurora Portal + CoreECI → eDiscovery & Legal Ops Intelligence → Review Platform of Choice

DataCore

EDISCOVERY INTELLIGENCE SOLUTIONS

- **AI Investigate** - Natural-language Q&A to explore a corpus, tag/cull, and promote to review.

- **AI Summarize** - Rapidly summarizes documents to prioritize deeper review and accelerate case understanding.

- **TrueLaw AI Narratives** - Automatically builds insight reports with timelines, patterns, key players, and more.

- **AI PrivGen** - Drafts standardized privilege log descriptions at the document level for faster logs.

- **AI PrivDetect** - Assigns privilege likelihood scores (Low, Medium, High) for documents for QC or tiered workflows.

- **AI Review** - Drafts standardized privilege log descriptions at the document level for faster logs.

LEGAL OPS INTELLIGENCE SOLUTIONS

- **Deposition Intelligence (Beta)** - Turn deposition transcripts into structured, citable insight without losing context.

- **Extract Intelligence (Beta)** - Transform unstructured legal documents into structured, actionable data without predefined templates.

- **PII Intelligence (Alpha)** - Detect, classify, and redact sensitive personal data across documents accurately, visually, and at scale.

- **Protocol Intelligence (Alpha)** - Turn complex protocols into structured issues and expert-ready questions grounded in precedent and regulation.

- **Tariff Intelligence (Alpha)** - Provides statistical analysis and decision support for trade compliance and tariff audit workflows.

- **Subpoena Intelligence (Alpha)** - Streamline response from intake to payment accurately and defensibly.
