

Deposition Intelligence

Structured insight from deposition transcripts

Turn deposition transcripts into actionable intelligence with AI-driven summaries, timelines, and event insights. Surface critical facts, admissions, and contradictions to shape strategy faster and with confidence.

As legal technology evolves rapidly, Consilio Labs helps clients move forward with confidence by developing AI solutions grounded in real legal needs. Through structured Alpha and Beta programs, innovations are tested and refined alongside experts to ensure they deliver practical value clients can trust. Every solution is built with security, defensibility, and measurable impact at the core.

OFFERING AT GLANCE

Secure Private Infrastructure

Deposition Intelligence operates within Consilio's secure, privately hosted environment, keeping sensitive testimony and case data protected at all times. Analysis is performed without reliance on public cloud AI services, supporting strict security and regulatory requirements. This foundation ensures transcript intelligence is generated appropriately for high-stakes, confidential matters.

Testimony Intelligence

Large volumes of deposition transcripts can be processed in a single workflow to surface key facts, events, and testimony across witnesses. Deposition Intelligence automatically generates structured summaries, executive briefs, and thematic insights, turning hours of manual transcript review into actionable intelligence. This approach helps teams quickly understand what happened, who was involved, and what matters most.

Chronological Event Reconstruction

Key facts and testimony are organized into clear, chronological timelines that reconstruct events across multiple depositions. This consolidated view helps legal teams see how testimony aligns, overlaps, or diverges over time. By connecting witness statements into a unified sequence, teams gain faster clarity and stronger foundations for case strategy.

Comprehensive Deposition Analysis

Deposition Intelligence generates configurable executive briefs that surface key facts, events, admissions, contradictions, and corroborating testimony across deposition transcripts. This structured analysis highlights where testimony aligns, where accounts conflict, and where critical issues emerge, while linking insights directly back to source testimony for validation. Legal teams can tailor each brief to focus on strategic priorities that support stronger strategy.

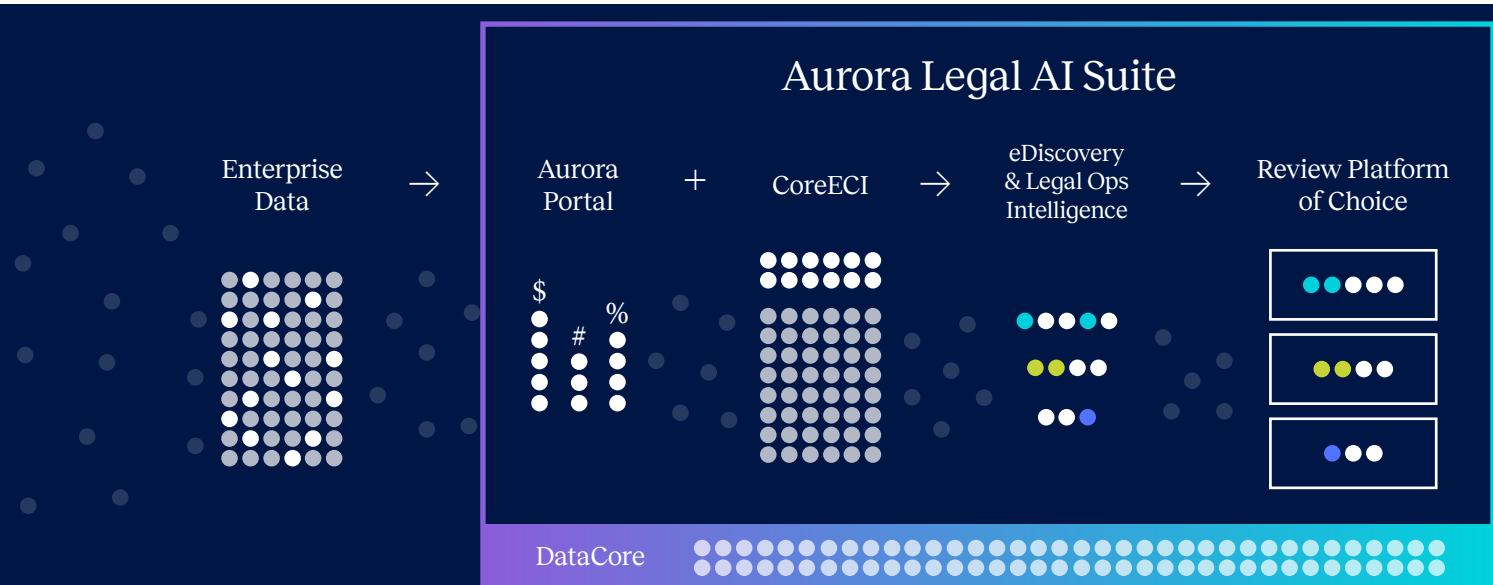

Expert Guided Oversight

Consilio's AI and analytics experts guide every stage of the workflow, from initial configuration through refinement and quality control. The team works closely with counsel to tailor analysis and adjust focus as strategy evolves. This human oversight ensures insights remain accurate, transparent, and defensible throughout the process.

Aurora Legal AI Suite delivers specialized AI capabilities across the full legal workflow, from early investigation through review, privilege, and legal operations. Purpose-built for legal teams, Aurora connects data, AI, expert review, and delivery into a coordinated workflow that reflects how legal work actually happens, with expert-guided, transparent processes that ensure speed, quality, and defensibility from pilot to production.

EDISCOVERY INTELLIGENCE SOLUTIONS

- AI Investigate - Natural-language Q&A to explore a corpus, tag/cull, and promote to review.
- AI Summarize - Rapidly summarizes documents to prioritize deeper review and accelerate case understanding.
- TrueLaw AI Narratives - Automatically builds insight reports with timelines, patterns, key players, and more.
- AI PrivGen - Drafts standardized privilege log descriptions at the document level for faster logs.
- AI PrivDetect - Assigns privilege likelihood scores (Low, Medium, High) for documents for QC or tiered workflows.
- AI Review - Drafts standardized privilege log descriptions at the document level for faster logs.

LEGAL OPS INTELLIGENCE SOLUTIONS

- Deposition Intelligence (Beta) - Turn deposition transcripts into structured, citable insight without losing context.
- Extract Intelligence (Beta) - Transform unstructured legal documents into structured, actionable data without predefined templates.
- PII Intelligence (Alpha) - Detect, classify, and redact sensitive personal data across documents accurately, visually, and at scale.
- Protocol Intelligence (Alpha) - Turn complex protocols into structured issues and expert-ready questions grounded in precedent and regulation.
- Tariff Intelligence (Alpha) - Provides statistical analysis and decision support for trade compliance and tariff audit workflows.
- Subpoena Intelligence (Alpha) - Streamline response from intake to payment accurately and defensibly.
