## Proven Impact Where Cyber Risk Is Highest

*Experience that scales with volume, complexity, and scrutiny*

Our Cyber Response team supports the full spectrum of cyber incidents. From a single 1GB mailbox to 100TB+ global, multi-region environments, we scale the right response based on the incident's size, risk profile, regulatory exposure, and insurer requirements. Our team has successfully delivered on over 1,000 cyber incident matters, applying repeatable, statistically validated workflows built to withstand regulatory, legal, and insurer scrutiny enabling fast, accurate, and defensible outcomes at any scale.

This cyber expertise is underpinned by the strength of the broader Consilio platform. With over 25 years of experience, Consilio is a global legal solutions provider with 6,000+ professionals worldwide, trusted by the majority of the Fortune 500 and all of the Am Law 100. Operating across 11+ countries and 31+ languages, Consilio brings unmatched scale, security, and operational rigor to complex, data-intensive and cross-border matters.

## How We Help You Navigate a Cyber Incident

Clear, defensible support from impact assessment through reporting

### 1. Data Processing, Advanced Data Mining and Expert-led AI

AI-enabled sensitive data scanning, advanced analytics, and custom scripting to identify high-risk data and reduce review scope without compromising defensibility.

### 2. Document Review & Data Extraction

Expert-led review of structured and unstructured data to accurately extract notification-required information across jurisdictions and data types.

### 3. Reporting & Notification Readiness

Consolidated, regulator-ready reporting that links impacted individuals to underlying documents designed to support client and/or counsel notification decisions, insurer review, and regulatory scrutiny.

## Specialized & Extended Services

- **Defensible forensic data collection** and Threat Actor file listing analysis
- Dedicated **cyber-focused delivery teams**
- **Secure private-cloud infrastructure** with zero subcontracting
- **Flexible cyber and privacy staffing** (privacy officers, lawyers, analysts)
- **Proactive consulting & Pre-breach services:** Information governance, data mapping, M365 / Purview support
- **Integrated partnerships across the cyber response ecosystem** (forensics, notification, call centers, credit monitoring)
- **Full support downstream** for class action, litigation, and related eDiscovery services

## Selected Case Studies

### Global Technology Company

Following a large-scale ransomware incident spanning the US and EU, Consilio managed the secure collection, reduction, and cross-border review of massive, distributed data sources coordinating global teams to deliver rapid, defensible insight at scale.

~50TB of data  
1.6M documents reviewed  
500+ reviewers across the US, EU, and India

### Global Entertainment Company

Terabytes of cloud-based, structured data  
Custom applications developed to handle complex query requests, support ongoing analysis, and enable post-incident activities.

### Healthcare Organization

1.5M documents reviewed in 30 days  
Custom geolocation scripts supporting notification decisions.

### Insurance Engagement

500M+ documents processed  
Review population reduced to 725k  
Multiple waves of notification reporting delivered.

## Trusted By:

- Leading breach coaches and privacy law firms
- Corporate legal, CISO, risk, and compliance teams
- Cyber insurance carriers and claims partners
- Incident response and cybersecurity partners

Consilio is approved by ~30 cyber insurance carriers and is a preferred, repeat partner for complex, high-stakes cyber matters.

## Why Work With Consilio

- **Proven, Regulator-Ready Accuracy**  
Statistically validated, repeatable workflows designed to stand up to scrutiny from regulators, insurers, and external counsel.
- **Global Scale with Secure Delivery**  
4,500+ active review professionals operating exclusively in secure private-cloud environments never outsourced.
- **Bespoke Workflows and Expertise**  
Unlike providers built on standardized, one-size-fits-all models, Consilio designs incident-specific workflows to handle complex data sources and atypical formats, backed by the scale and depth of the largest eDiscovery and document review platform globally.
- **Consultative Partnership**  
Our specialists act as advisors not order takers, challenging assumptions, guiding defensible approaches, and proactively controlling scope, cost, and risk.
- **Cost Predictability Under Pressure**  
Transparent pricing and proactive spend reporting that maintains alignment with policy limits, budget concerns, and risk exposure.
- **Governed AI + Human Expertise**  
Proprietary AI-enabled data scanning and analytics, paired with expert oversight to improve precision, reduce false positives, and preserve defensibility.
