DataCore

Unified Intelligence Across the Aurora Experience

Aurora Legal AI introduces a unified intelligence layer across the legal lifecycle, connecting investigation, review, and legal operations into a single, consistent experience. It brings together data, workflows, and AI to create shared context and continuity across every stage of a matter. By eliminating duplication and reducing operational friction, teams gain greater visibility, consistency, and control. The result is faster, more informed, and defensible outcomes at enterprise scale.

OFFERING AT GLANCE

Orchestrated Across Data, AI, & Review

Aurora connects collections, processing, AI, and expert review into a seamless workflow, eliminating handoffs and fragmented tools from intake through delivery.

Built on Secure, Private Infrastructure

Built on privately hosted infrastructure, keeping sensitive data within controlled environments. By avoiding public cloud AI services, teams reduce risk while maintaining compliance with strict security and regulatory standards.

Expert-Guided AI with Built-In Defensibility

Built with legal experts, Aurora delivers transparent, explainable outputs with human oversight embedded, ensuring defensibility across every workflow.

Built for Scale & Real-World Deployment

Production-ready AI designed for high-volume matters and enterprise deployment, enabling teams to move from pilot to full-scale adoption without friction.

Innovation Continuously Delivered

Aurora delivers new AI capabilities grounded in real legal needs and validated through Consilio Labs, ensuring solutions are practical, secure, defensible, and ready for real-world deployment.

Consilio®

eDiscovery Intelligence Solutions

AI Investigate
AVAILABLE

Surface key insight faster using natural language exploration that prioritizes what matters most.

`AURORA CORE ECI` `RELATIVITY SERVER` `AURORA VERITY REVIEW`

AI Narratives
AVAILABLE

Transform complex documents into structured case narratives that support clear storytelling.

`RELATIVITY ONE` `RELATIVITY SERVER` `AURORA VERITY REVIEW`

AI Summarize
AVAILABLE

Deliver consistent, source backed summaries at scale so teams move from review to strategy faster.

`AURORA CORE ECI` `RELATIVITY SERVER` `AURORA VERITY REVIEW`

AI PrivGen
AVAILABLE

Generate defensible privilege descriptions faster with AI that understands legal context.

`CONSILIO PRIVATE DC` `RELATIVITY SERVER` `AURORA VERITY REVIEW`

AI PrivDetect
AVAILABLE

Surface priority review areas with AI-driven privilege risk scoring.

`CONSILIO PRIVATE DC` `RELATIVITY SERVER` `AURORA VERITY REVIEW`

AI Review
AVAILABLE

Drive consistent coding decisions with guided AI workflows built for defensible review.

`CONSILIO PRIVATE DC` `RELATIVITY SERVER` `AURORA VERITY REVIEW`

Legal Ops Intelligence Solutions

Extract Intelligence
BETA

Convert unstructured documents into analysis ready data without manual schema design.

`AURORA LEGAL AI SUITE`

Deposition Intelligence
BETA

Turn transcripts into structured timelines and citable insight without manual reconstruction.

`AURORA LEGAL AI SUITE`

Protocol Intelligence
ALPHA

Translate complex protocols into structured issues and expert ready guidance.

`AURORA LEGAL AI SUITE`

Subpoena Intelligence
ALPHA

Orchestrate subpoena workflows with structured tracking, automation, and defensible oversight.

`AURORA LEGAL AI SUITE`

Tariff Intelligence
ALPHA

Reveal compliance risks through structured analysis of trade and tariff data.

`AURORA LEGAL AI SUITE`

PII Intelligence
ALPHA

Detect and classify sensitive data to accelerate defensible redaction workflows.

`AURORA LEGAL AI SUITE`

Consilio Innovation Lab

Consilio Innovation Lab provides a hands-on environment to explore emerging AI technologies, where clients can test real-world use cases alongside experts to validate workflows, assess impact, and make informed decisions with confidence.

Consilio LABS

As legal technology evolves, **Consilio Labs** develops AI solutions grounded in real legal needs, validated through Alpha and Beta programs with experts to deliver practical, secure, and defensible outcomes with measurable impact.
