

GenAI CONSULTING FOR LEGAL

# Practical adoption. Governed outcomes.

## How We Help

Generative AI presents a major opportunity for legal teams but without the right governance, use-case design, and adoption support, implementations often stall or create new risk.

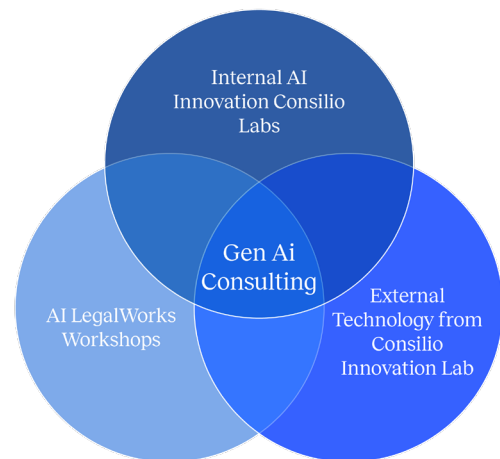

Consilio GenAI Consulting helps legal teams adopt Generative AI safely, strategically, and with confidence. We focus on embedding GenAI into real legal workflows where it delivers measurable value, while maintaining control over data, accuracy, and decision-making.

This is not experimentation for experimentation's sake. It's consulting-led GenAI adoption that stands up to scrutiny.

## Where GenAI Delivers Value

We help clients apply GenAI across high-impact use cases relevant for the specific needs of legal teams, including:

- Contract review, comparison, and risk assessment
- Bulk document analysis and summarisation
- M&A due diligence and divestments
- Litigation preparation and early case assessment
- Compliance, obligations tracking, and regulatory review

## What Clients Achieve

Up to 70–80% reduction in time spent on contract review tasks

Faster bulk reviews with high accuracy and consistency

Reduced reliance on manual legal review for low-risk work

Improved compliance through embedded play-books and risk rules

# Our GenAI Consulting Capabilities

We work with leading legal GenAI partners and also design and build bespoke CoPilot-based GenAI solutions where off-the-shelf tools are not the right fit.

## 1. GenAI Strategy & Vendor Selection

We help clients cut through a crowded GenAI market and select the right approach aligned to legal risk, data sensitivity, and use cases.

- GenAI vendor selection (standalone and CLM-embedded solutions)
- Structured tools evaluations and scoring frameworks
- Clear recommendations for piloting and deployment

*Confident, defensible GenAI selection that legal leadership can stand behind.*

## 2. Readiness and Set Up

Successful GenAI adoption depends on what happens before deployment.

- Data readiness and content scoping
- Governance frameworks and guardrails
- Accuracy, evaluation, and human-in-the-loop controls
- Use-case prioritisation based on client needs
- Change management and user adoption strategy
- Value realisation strategy
- Stakeholder alignment across legal, IT, and compliance

*Legal team is enabled with GenAI that is explainable, defensible, and trusted by client stakeholders.*

## 3. Use-case Development & Workflow Design

We work hands-on with legal teams to define where GenAI should—and should not—be used.

- Use-case prioritisation based on risk and value
- Workflow design aligned to legal processes
- Clear success metrics and ROI expectations

*GenAI applied where it genuinely improves legal delivery.*

## 4. Custom-built GenAI solutions for Legal and Business

Purpose-built for your priority use cases and workflows using legal generative AI or enterprise AI (CoPilot, ChatGPT etc.)

- Designed around your data, workflows, and security requirements
- Self-service powered by GenAI gives business direct access to legal expertise without overwhelming the legal team
- Legal policy embedded directly into business workflows – legal stays in control

*Consistent application of legal standards at scale.*

## 5. Implementation, Training & Adoption

We don't leave clients with tools they don't use.

- Implementation support and configuration
- Prompt coaching/development GenAI playbooks tailored to legal client contract types
- Training, change management, and adoption support

*Lawyers confidently using GenAI in day-to-day work.*

## Why Work With Consilio

- **Legal-first GenAI Expertise**  
We focus exclusively on legal use cases combining legal judgment, operational insight, and technical expertise.
- **Consulting-led, Not Tool-led**  
We start with outcomes, workflows, and risk not vendor demos.
- **Flexible by Design**  
We're not tied to a single GenAI model or vendor supporting best-of-breed tools and custom CoPilot GenAI solutions tailored to your legal environment.
- **Governance by Design**  
Controls, explainability, and oversight are built in from day one.
- **Part of a Broader Transformation Journey**  
GenAI consulting seamlessly ladders into Consilio Legal Transformation Services, supporting technology, operations, and managed delivery at scale.

## Start with GenAI. Scale with Confidence.

If your legal team is exploring GenAI but wants to avoid false starts, unmanaged risk, or low adoption, Consilio GenAI Consulting can help you move forward with clarity and control.

Talk to us about a governed GenAI pilot or proof of value.
