

AI-ENABLED REVIEW FOR AUTOMOTIVE LITIGATION

Accelerated Investigations & Responsiveness Review

🌐 consilio.com
✉ info@consilio.com

Automotive litigation often involves massive, technical productions spanning engineering records, warranty data, field reports, regulatory materials, communications, and product histories. Consilio combines Aurora Legal AI solutions with automotive-focused legal and analytics expertise to help teams quickly understand what was produced and surface the facts, documents, and patterns that matter.

By turning dense production sets into interactive, source-backed narratives and timelines, teams can move from intake to strategic assessment faster. The result is a clearer view of the production, stronger early case direction, and greater confidence in next steps.

Automotive-focused expertise, AI-enabled insight

Automotive matters require teams to evaluate large, technical document populations while maintaining legal strategy, review quality, and defensibility. Consilio combines deep OEM litigation experience, expert-led analytics services, and **Aurora Legal AI Suite** across three AI-enabled review options: privilege review, responsiveness review, and combined responsiveness and privilege review. Each option pairs technology with attorney validation, sampling, reporting, and analytics expertise to reduce review burden, surface key documents faster, and support confident, defensible decisions.

FIND RELEVANT DOCUMENTS FASTER

AI Review helps teams quickly classify automotive documents by relevance, identifying which records warrant attorney attention and which can be deprioritized. Results are organized in an interactive workspace with relevance calls, document metadata, model details, and filtering tools, giving teams a faster, clearer way to assess large production sets while maintaining review visibility and control.

Issue Outline

Internal emails discussing early reports or complaints of Trailblazer braking failures

Description

Over the past three weeks, six customer complaints about brake performance on 2022 Trailblazers, well above normal rate. Similar patterns confirmed by regional managers with multiple dealerships reporting soft or spongy and harder to push brake pedal complaints across nearly a dozen cases in two weeks.

Meeting minutes where potential safety defects in Trailblazer brakes were raised or dismissed

Direct evidence of meeting minutes not present, but email threads reference technical and regional meetings for investigation escalation.

Correspondence between engineering and legal teams regarding NHTSA reporting requirements

No direct correspondence in this batch about NHTSA reporting, but Diana Martinez and Tom Richardson referenced corporate technical investigation, and con...

Timeline or summary documents tracking customer complaints about Trailblazer brakes

CUSTODIAN ANALYSIS & TIMELINE DEVELOPMENT

AI Narratives turns custodian-specific documents into structured timelines, relationship insights, and behavioral patterns that help teams understand each person's role in the matter. By linking key actions back to supporting documents and emails, teams can quickly assess what a custodian knew, when they knew it, and how their communications may shape the broader case narrative.

ISSUE OUTLINING & KEY DOCUMENT MAPPING

AI Narratives organizes relevant documents into issue-focused outlines, helping teams quickly see how facts, communications, complaints, and timelines connect across a production. Each issue summary links back to supporting documents, giving counsel a clearer path from review results to case strategy, deposition preparation, and further investigation.

Human Oversight & Risk Mitigation

Consilio pairs AI-enabled review with experienced legal and analytics professionals to help teams move faster without sacrificing quality, judgment, or defensibility. AI accelerates document classification, pattern identification, and workflow efficiency, while human experts validate results, review edge cases, and guide sampling, reporting, and escalation protocols.

This approach is especially important in automotive matters, where technical records, engineering communications, warranty materials, field reports, regulatory documents, and privilege-sensitive communications require industry-specific context. By combining Aurora Legal AI solutions with automotive review expertise, attorney oversight, and documented quality controls, Consilio helps teams reduce review burden while maintaining confidence that decisions are supported by a defensible process.

Why Choose Consilio?

Trusted Expertise

Over a decade of leadership in document review and AI technology.

Proven AI Solutions

Custom-built AI algorithms developed in-house, hosted on our secure private cloud.

Unmatched Support

Dedicated AI Guides, Review Managers, and Analytics Experts work with you at every step.

Get Started:

Consilio's Automotive AI solutions help legal teams uncover insight faster, strengthen control, and drive smarter outcomes. Experience AI built for the way you already work, secure and efficient, and designed for confidence at every stage.
