Consilio's AI & Analytics team brings together deep legal expertise and advanced AI to help clients see what others miss. With more than 45 attorneys and technologists worldwide, our team combines analytics, automation, and data science to transform complex datasets into clear, defensible insight that drives smarter strategy and faster outcomes.

Experts in both the industry's leading technologies and Consilio's own proprietary tools, our team delivers a powerful toolbox of solutions adaptable to any matter. From early case assessment to review optimization, we help clients uncover key facts sooner, streamline workflows, and achieve meaningful efficiency without sacrificing accuracy or control.

Smarter Workflows and Stronger Outcomes

Consilio's AI & Analytics team partners with legal professionals to tackle complex discovery challenges through a consultative, technology-forward approach. As one of the world's largest and most capable legal services providers, we combine deep expertise with proven technology to deliver actionable intelligence, measurable efficiencies, and a consistently exceptional client experience.

Built by attorneys, data scientists, programmers, and prompt engineers, our approach fuses deep legal understanding with technical innovation to uncover key facts, streamline workflows, and strengthen defensibility at every stage of discovery.

At the center of this innovation is an ecosystem of proven AI solutions designed to work the way legal professionals already work. Secure, intuitive, and adaptable to each matter, these solutions enable faster insight, smarter strategy, and stronger control across the discovery lifecycle.

Service Offerings

Consilio's AI & Analytics team delivers a full spectrum of solutions that combine advanced analytics, automation, and expert consulting to drive smarter, defensible outcomes. Each engagement is tailored to client goals, data complexity, and matter requirements, ensuring precision, transparency, and measurable efficiency at every stage.

EARLY CASE INTELLIGENCE

Gain clarity from the start with analytics that identify key documents, custodians, and data patterns to guide strategy and validate collection scope.

TRADITIONAL CULLING

Streamline large datasets through email threading, non-substantive content bucketing, and optimized search term design to focus review on what matters most.

WORKFLOW CONSULTING

Partner with experts who design and validate efficient, defensible workflows, ensuring cost-effective processes from search term analysis to ESI protocol support.

Popular Use Cases

Engagements provide key deliverables designed to give counsel a clear, data-backed foundation for early strategy across a number of use cases, including:

- Regulatory Investigations
- Compliance Investigations
- Second Requests (2R)
- Civil Investigative Demands (CID)
- Deposition Prep
- Internal Investigations
- Whistle Blower Investigations
- Complex Litigations
- Multi-District Litigations
- Joint Defense Groups
- Incoming Production Analysis

CUSTOM DATA SOLUTIONS

Solve complex data challenges with tailored workflows for specialized sources, sensitive data scans, and large-scale breach or regulatory reviews.

ADVANCED ANALYTICS

Accelerate insight with TAR, CMML, and Generative AI that enhance prioritization, privilege analysis, and overall discovery accuracy.

REVIEW SUPPORT

Improve review precision and efficiency with smart batching, prioritization, and integrated tools like iPriv and iQC for consistent results.
