Consilio's AI & Analytics Team helps legal teams modernize privilege log drafting through AI-powered privilege descriptions. By combining deep review expertise, advanced analytics, and generative AI, we enable clients to accelerate one of the most time-consuming steps in document review while maintaining control and accuracy. Our experts guide each engagement with defensibility and precision in mind, ensuring AI-generated descriptions are human-reviewed, consistent, and aligned with legal strategy.

This approach helps clients reduce reviewer fatigue, improve accuracy across entries, and complete privilege logs faster without compromising quality or oversight.

An Expert-Guided, AI-Enhanced Approach

Every engagement begins with a collaborative consultation between Consilio's AI & Review experts and counsel to define privilege log objectives, clarify workflows, and align on desired outcomes. This upfront collaboration ensures that every privilege description is intentional, defensible, and tailored to the unique needs of the matter. Our team draws on extensive experience supporting complex reviews to anticipate challenges, streamline decision points, and guide teams through best practices for defensible privilege logs.

From there, we apply a proven workflow that combines powerful automation with expert legal oversight to generate high-quality draft narratives. The result is a consistent, human-reviewed privilege log that captures the necessary context with precision and clarity, helping teams complete logs faster, and improve overall quality across entries.

Flexible Privilege Workflows

Consilio supports both managed and client-directed approaches to privilege log creation, ensuring efficiency, accuracy, and defensibility in every engagement. Each workflow is designed to meet clients where they are, providing the right balance of automation, oversight, and control to fit any review model.

CONSILIO-MANAGED WORKFLOW

Consilio's experienced Review Managers oversee the privilege log drafting process from start to finish. AI-generated descriptions are integrated into the review layout as read-only text, allowing reviewers to accept, refine, or rebuild language through structured log fields. Once validated, final entries are compiled by Consilio's Review team to ensure consistency and quality across all descriptions. This approach gives clients the benefit of expert guidance throughout the process, reducing time spent on manual drafting while maintaining full defensibility. Each engagement is tailored to the client's needs, ensuring that quality standards and privilege determinations align with the overall review strategy.

AI PrivGen: Intelligent Privilege Logging Technology

AI PrivGen is Consilio's proprietary technology used by our review managers and privilege experts to streamline and strengthen privilege log creation. Instead of manually drafting each description, the team leverages the AI engine to generate clear, consistent description based on the actual content of each document.

- **AI-Assisted Description Drafting** - Generates first-draft privilege descriptions based on document content, legal context, and privilege patterns, reducing manual drafting.
- **Scalable for High-Volume Matters** - Supports large Second Requests, investigations, and complex litigations without sacrificing accuracy or consistency across entries.
- **Improved Speed Without Sacrificing Quality** - Accelerates log creation while maintaining human judgment and quality control at every step.
- **Customizable to Case Needs and Client Preferences** - Output language can be tailored to specific privilege standards or client formatting preferences while still leveraging AI efficiency.

CLIENT-MANAGED WORKFLOW

For clients managing their own privilege log review, this workflow provides flexibility and control while maintaining efficiency and defensibility. AI-generated descriptions appear in both editable and read-only fields, giving counsel the ability to refine or replace suggested text while retaining access to the AI-generated version for reference. The client team owns every stage of the process, from validation to final log assembly. This model empowers legal teams to streamline privilege log workflows using their preferred approach while maintaining transparency and confidence in every entry.

Human Oversight & Risk Mitigation

At Consilio, every privilege analysis combines the precision of AI with the discernment of experienced legal professionals. Automation accelerates narrative generation, while human expertise ensures accuracy, quality, and defensibility. Each entry is reviewed and validated by attorneys who understand the nuances of privilege and the importance of precision in every assertion.

This approach transforms privilege logging into a more efficient, consistent, and reliable process. Clients experience faster completion times and reduced reviewer fatigue as teams shift focus from repetitive drafting to higher-value analysis. Built-in quality controls and guided workflows promote consistency across entries and give counsel confidence that every privilege log can withstand scrutiny.

By pairing advanced AI with trusted human oversight, Consilio helps clients achieve faster privilege log creation, less fatigue, greater consistency, and fully defensible outputs through flexible workflows that adapt to every review model.

Why Choose Consilio?

Trusted Expertise

Over a decade of leadership in document review and AI technology.

Proven AI Solutions

Custom-built AI algorithms developed in-house, hosted on our secure private cloud.

Unmatched Support

Dedicated AI Guides, Review Managers, and Analytics Experts work with you at every step.

Get Started:

Consilio's AI and Analytics solutions help legal teams uncover insight faster, strengthen control, and drive smarter outcomes. Experience AI built for the way you already work, secure and efficient, and designed for confidence at every stage.
