

Bring your AI to your matters

Aurora Connect lets the AI assistants your teams already use reach live matter data at Consilio — under your permissions, with citations, and without a second copy of your data.

 Aurora Connect for Claude

 Aurora Connect for OpenAI

 Good afternoon

Build a report identifying stakeholders opposed to the proposed corporate restructuring initiative, summarize their concerns, and prepare a counter-analysis supported by evidence and opposing viewpoints from other stakeholders.

Used Aurora Connect integration, viewed a file, created a file >

Here's your report. It covers:

 Stakeholder Opposition Analysis [Download](#)

Opposition section — Key stakeholders opposed to the proposed corporate restructuring initiative, including their primary concerns, strategic objections, and operational risk arguments documented throughout the workspace.

Counter-analysis section — Structured rebuttals supported by evidence, internal communications, and perspectives from other stakeholders that

Build your analysis on evidence governed in Aurora

Ask about the record without assembling documents for a separate AI tool. Aurora Connect makes your indexed matter data available for investigation through your assistant, so you can focus on what the evidence means for the case.

WHY AURORA CONNECT

Stay in control of your matter data

Work from live matter data under your workspace permissions, without a second repository to govern. Responsive information reaches your assistant under your organization's agreement with the AI provider.

Ground case discussions in cited evidence

AI Investigate returns findings with source references. Examine the supporting documents before using those findings to test a position or prepare for a case discussion.

Change assistants without moving your matters

Aurora Connect's open-standard MCP gives you flexibility to work with supported AI assistants while your matter repository remains at Consilio.

ASK MORE OF YOUR MATTER DATA

"Find and list all of my active Coho Capital matters."

Find the matter you need

Start with a client name to locate relevant matters and focus on the work at hand.

"What workspaces are in matter A12345?"

Get to the relevant documents

Find the workspaces associated with your matter so you can direct your questions to the right document collection.

"When was the settlement first proposed in A12345?"

Trace the answers to its source

Explore what happened, then follow the citations to assess the supporting evidence.

EXAMPLE USE CASES

Build and test a case theory

Examine supporting and conflicting evidence, then draft a findings memo or factual background that separates documented facts from open questions.

Assess an incoming production

Identify key issues, conflicting accounts, and apparent gaps in an indexed production to focus further investigation and document review.

Investigate internal allegations

Organize findings into supported allegations, counter-evidence, and questions requiring further investigation.

Prepare a review handoff

Group priority Document IDs by issue and propose search criteria for the review team to verify and run in its review platform.

Start your next investigation with Aurora Connect
