Company & Mission

NORWEGIAN CRAFT. GLOBAL EXCELLENCE

Svemko is one of Europe's leading silencer manufacturers, trusted by hunters, sport shooters, military and law enforcement professionals who demand uncompromising performance. At Svemko, we create silencers that combine world-class engineering with the rugged spirit of the outdoors.

Our goal has always been clear: **to make the best silencers in the world.** Achieving that requires more than advanced materials or precision machines—it requires passion, discipline, and a culture of continuous improvement. At Svemko, every product carries the mark of Norwegian craftsmanship and an innovation mindset that drives us forward.

OUR MISSION

We are dedicated to delivering silencers that exceed expectations—silencers that give hunters and shooters an advantage in performance, reliability, and handling. For us, success is measured in the trust of our customers: hunters who rely on our silencers in the field, marksmen who push their limits on the range, and professionals who need equipment they can depend on in every condition.

OUR HOME

Nestled between fjords and mountains, you will find our headquarters and the Svemko factory in Osterøy, 40 minutes outside of Bergen, Norway. Osterøy reflects the environment that inspires us: strong, resilient, and uncompromisingly authentic. Here, we bring together design, development, production, and testing under one roof. This closeness ensures that every Svemko product stays true to our values of quality, trust and accountability.

PEOPLE AND EXPERTISE

Behind every silencer is a team of skilled engineers, CNC-operators, and technicians who share a deep respect for the craft. We have brought together some of the most competent people in the industry, equipping them with state-of-the-art tools and giving them the freedom to innovate. This blend of experience and curiosity has allowed Svemko to stay at the forefront of silencer design for over a decade.

A LASTING PROMISE

At Svemko, we are proud of what we create, but never satisfied with standing still. We continue to refine, test, and evolve, ensuring that every new product raises the standard even further.

Whether on the hunt, at the range, or in professional use, a Svemko silencer isn't just a piece of equipment—it's a promise of performance, reliability, and trust.

Technology & Materials

OVER A DECADE OF ENGINEERING. PERFECTED IN EVERY DETAIL

At Svemko, we see a silencer not as a simple accessory, but as a precision-engineered instrument. Every model we produce represents the culmination of over a decade of research, rigorous testing, and constant refinement. Our development process is guided by a single goal: to achieve the perfect harmony of materials, geometry, and performance.

The result is a product line that covers every need—from compact hunting silencers to advanced systems developed from military-grade research. Whether in the mountains, at the range, or in professional use, Svemko silencers are engineered to deliver absolute reliability, consistency, performance and precision.

EVERY SVEMKO SILENCERS HAS A TITANIUM CORE

At the heart of all Svemko silencers lies a Grade 5 titanium core, which includes all the baffles, the chamber wall and the blast chamber as well as the threads. Known for its exceptional strength-to-weight ratio and ability to withstand extreme heat, titanium is an ultimate material for silencer construction. Titanium is both precious and challenging to work with. By leveraging the unique properties of this precious metal, Svemko's products are not only remarkably robust, but also incredibly lightweight.

PRECISION MANUFACTURING—THE ART OF CNC MACHINING

Every Svemko silencer is produced in the Svemko Factory, ensuring total control over the manufacturing process. Continuous investments in state-of-the-art CNC machining, automated production systems, and advanced quality control have taken our precision to the next level.

All components are programmed and machined in-house by our skilled CNC-operators. The machining of our components, particularly those of titanium, requires exceptionally qualified and trained machine operators.

Every silencer—and every single component—is proudly manufactured in-house at the Svemko factory in Osterøy, Norway.

HAND-ASSEMBLED

Svemko silencers consist of many unique CNC machined parts. Every part is meticulously assembled by our highly skilled technicians and each step is closely monitored and continuous quality checks are performed. All parts are inspected at multiple stages and no product leaves without a full inspection, tolerance clearance, marking, and final approval.

MADE IN NORWAY

Every silencer is proudly made at the Svemko factory in Osterøy, Western Norway. From R&D and design, CNC machining of every part, to assembly and laser engraving, all steps are conducted at our state of the art factory. Our commitment to sustainability and innovation ensures that each Svemko product delivers lasting performance—built to thrive in demanding environments around the world, yet true to our Norwegian roots.

THE SVEMKO STANDARD

From compact models like the Nano 1.0 to cutting-edge systems like the Genesis, every silencer we make reflects the same uncompromising standard: precision engineering, durability and Norwegian manufacturing excellence.

When you choose Svemko, you're choosing more than a silencer. You're choosing years of expertise, the highest-grade materials, and the forefront of silencer technology.

Why Svemko?

Svemko has won several comparison tests for our silencer models. Svemko silencers have market leading performance due to our unique technology and use of high-quality materials. We offer multiple silencer models suitable for the smallest and up to some of the biggest calibers. Svemko silencers also cover all of the most popular thread sizes.

MARKET LEADING PERFORMANCE

The construction of our silencers are designed to achieve the best combination of performance, weight and strength. A result that has taken a decade to perfect. With a Svemko silencer you will experience extreme sound suppression, recoil reduction and precision.

NO FIRST-ROUND POP (FRP)

Svemkos advanced silencer design enables close to zero First-Round Pop (FRP), which is a common problem in more traditional silencers where the first shot is louder than subsequent shots. This is a familiar issue in more conventional designs, where the first shot can be up to 10 dBc higher than the second shot.

AEROSPACE-GRADE TITANIUM CONSTRUCTION

Svemko silencers are made with a Titanium grade 5 core construction. All silencers consist of multiple precision machined parts to ensure optimal performance. Every core component which is in contact with the hottest gunpowder gas is produced in titanium grade 5. This prevents burnout and increases the life of the silencer, which is a challenge with silencers produced with aluminum cores.

CALIBER CHANGE

The modular architecture of Svemko silencers offers unparalleled flexibility, whether you're hunting in the field or target shooting at the range. All Svemko silencers have the option of caliber change, and you can easily unscrew the module with the included tools.

QUICK MOUNT SYSTEM

The Svemko Quick Mount is a quick-detach system for our silencers, and is available for all our models. The system allows you to quickly attach and detach your silencer with a 90° twist. It's made from hardened steel and has several innovative details.

EASY-TO-CLEAN

Maintenance of Svemko silencers is a breeze, thanks to their easily detachable modules and steel mesh-free construction.

BUILT TO LAST

Svemko silencers are built to thrive in the most challenging environments, offering unparalleled reliability and resilience that caters perfectly to the needs of discerning hunters seeking uncompromising performance. Through our tireless commitment to quality and innovation, we have raised the bar for what is possible in the silencer industry.

THE SVEMKO WARRANTY

Svemko is proud to develop and produce quality products with a long lifespan. We therefore offer extra warranty time when registering your product. In addition, we supply spare parts indefinitely. A silencer from Svemko never expires.

FULL-TITANIUM SILENCERS

PURE SERIES

The Svemko Pure series is made out of 100% aerospace-grade titanium and delivers market leading performance.

The Pure technology and design evolved based on years of development of a silencer for the Norwegian Armed Forces in collaboration with Norwegian Defence Research Establishment (FFI).

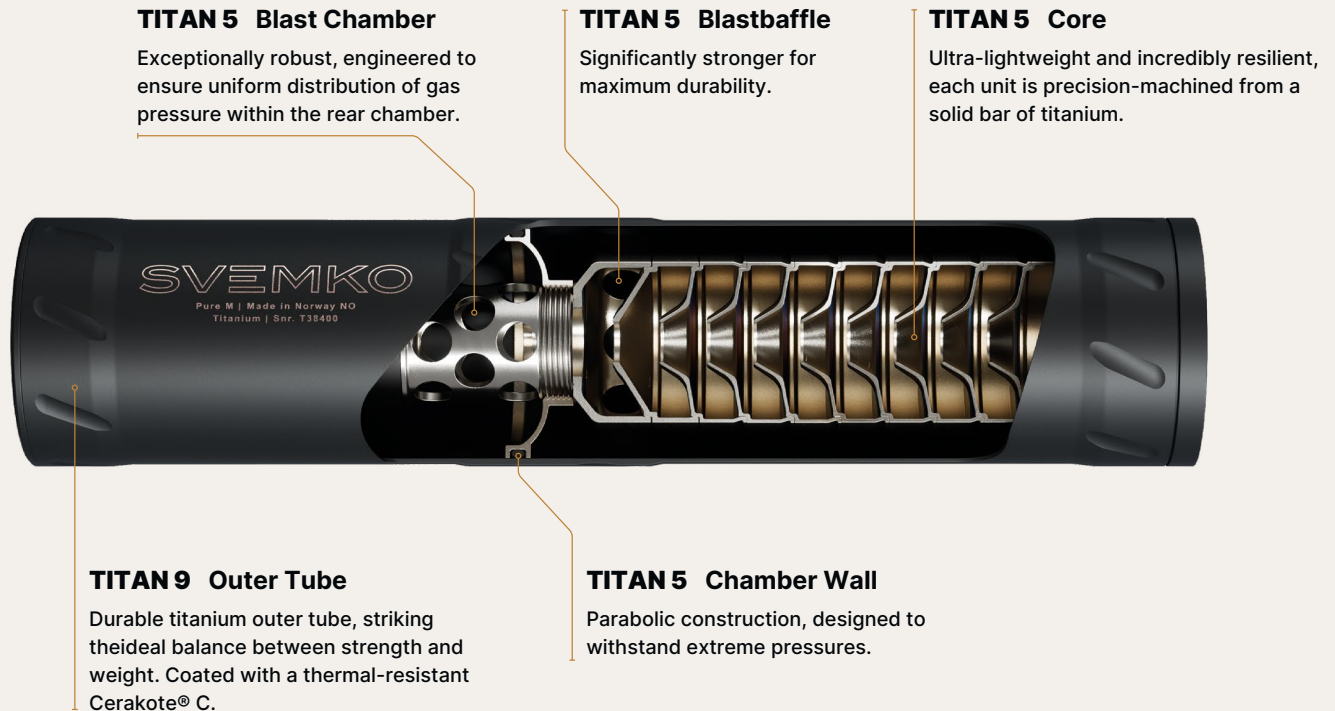

With the Svemko Pure Series our aim was to create a silencer for passionate and experienced hunters and shooters, that would take performance to a whole new level without compromising on weight or size.

All silencers have the possibility for caliber change, combined with the Svemko Quick Mount Adapter it makes it an extremely flexible silencer system. The Pure Series consist of 3 different models, and they all come with an included tool as well as a 8-year warranty.

Warranty

PURE L Over-barrel

The Pure L is the flagship model of the Pure series and delivers an unmatched performance of 35–40 dBc (.308W) sound suppression and incredible recoil reduction. The Pure L has a diameter of 52 mm, and a weight of only 370 grams. It has the volume to handle the largest and most powerful calibers. Perfect for hunting as well as long range shooting.

SPECIFICATIONS

Added length	167 mm
Overall length	240 mm

TITANIUM CORE SILENCERS

1.0 SERIES

The Svemko 1.0 series is based on 7 years of development. All silencers in the 1.0 series have a Titanium grade 5 core construction including a titanium blast baffle and blast chamber. They feature a chamber wall with a parabolic construction made out of highly corrosion resistant aluminum, designed to withstand extreme pressures. The outer tube is extremely strong and made of highly corrosion-resistant 6082-T6 aluminum.

All silencers have the possibility for caliber change, combined with the Svemko Quick Mount Adapter it makes it an extremely flexible silencers system. The 1.0 series consist of 6 different models, with 4 over-barrel, and 2 front-mounted silencers, and they all come with an included tool as well as a 4-year warranty.

TITAN 5 Blast Chamber

Exceptionally robust, engineered to ensure uniform distribution of gas pressure within the rear chamber.

TITAN 5 Blast Baffle

Significantly stronger for maximum durability.

Outer Tube

Extremely strong outer tube made of highly corrosion-resistant 6082-T6 aluminium.

Chamber Wall

Parabolic construction made out of 6082-T6 aluminium. Designed to withstand extreme pressures.

TITAN 5 Core

Very light and resilient. Machined from a solid bar of titanium.

ULTRA 1.0 Over-barrel

The Ultra 1.0 is the flagship model of the 1.0 series and is developed for hunters and long range shooters who want unparalleled noise reduction and performance. It delivers unmatched performance of 35–39 dBc (308W) noise reduction as well as extreme recoil reduction. The Ultra 1.0 is ideal for the most powerful calibers.

SPECIFICATIONS

Added length	179 mm
Overall length	270 mm

MAGNUM 1.0 Over-barrel

The Magnum 1.0 is the perfect silencer for hunters and long range shooters who want the best combination of performance and durability without adding too much weight. With a diameter of 49 mm and weight of only 350 grams, the Magnum 1.0 is a favorite among hunters and long range shooters using magnum calibers.

SPECIFICATIONS

Added length	139 mm
Overall length	229 mm
Diameter	49 mm

HUNTER 1.0 Over-barrel

Hunter 1.0 (prev. Hunter 1.0 Standard) is our best-selling silencer. It has won multiple large comparison tests. Weighing only 285 grams, this silencer meets all needs, with both low weight that barely affects the balance of the rifle, as well as extreme performance of 31–34 dBC (.308 Win.).

SPECIFICATIONS

Added length	139 mm
Overall length	220 mm
Diameter	46.5 mm

MICRO 1.0 Front-Mounted

The Micro 1.0 is the largest front-mounted silencer in the 1.0 series. The extra length and the advanced construction provide excellent performance. It delivers extreme performance with 31–35 dBc (.308 Win.) sound reduction. Its low weight of only 267 grams means that it has less effect on weapon balance.

SPECIFICATIONS

Added length	173 mm
Overall length	194 mm
Diameter	46.5 mm

TITANIUM CORE SILENCER WITH MUZZLE BRAKE

FLEX SERIES

The Svemko Flex is an innovative silencer solution for hunters, sport shooters, and anyone who values maximum flexibility without compromise.

It features a titanium grade 5 muzzle brake combined with a detachable titanium core silencer. When used with only the muzzle brake, you'll experience extremely pleasant shooting behavior with up to 50% recoil reduction. It's ideal for situations in the shooting cinema or at the range when you shoot several shots in a short amount of time.

For hunting, simply attach the silencer to the muzzle brake and enjoy the complete performance of the Svemko Flex with excellent noise reduction and performance.

The silencer attaches to the muzzle brake with a Click-Lock for optimal stability and precision.

All silencers have the possibility for caliber change. The Flex Series consist of 3 different models, and they all come with an included tool as well as a 4-year warranty.

Outer Tube

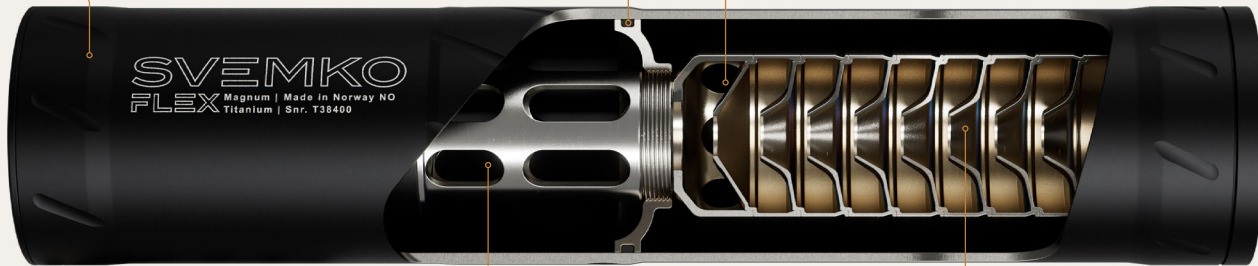

Extremely strong outer tube made of highly corrosion-resistant 6082-T6 aluminium.

Chamber Wall

Parabolic construction made of 6082-T6 aluminium. Designed to withstand extreme pressures.

TITAN 5 Blast Baffle

Significantly stronger for maximum durability.

Click-Lock™ Ring

The Click-Lock Ring enables the silencer to remain securely attached under all conditions.

TITAN 5 Blast Chamber

Exceptionally robust, engineered to ensure uniform distribution of gas pressure within the rear chamber.

TITAN 5 Core

Very light and resilient. Machined from a solid bar of titanium.

TITAN 5 Muzzle Brake

Highly effective muzzle brake with conical connection for quick attachment of the silencer.

FLEX MAGNUM Over-barrel

The Magnum is the flagship of the Flex series and delivers 34–37 dBc (.308W) noise reduction, despite its weight of only 350 grams. It's an optimal silencer for hunters and long range shooters looking for an extreme performance and recoil reduction in one flexible system. The Flex Magnum works with calibers such as .300 Win. Mag.

FLEX MUZZLE BRAKE Over-barrel

The Svemko Flex muzzle brake is made from Grade 5 titanium and provides extremely comfortable shooting characteristics, with recoil reduction of up to 50% when used without a silencer. It is ideal for situations in an indoor shooting range or on the shooting range when multiple shots are fired in a short period of time.

For hunting, simply attach the silencer to the muzzle brake and enjoy the full performance of the Svemko Flex with excellent noise reduction and performance.

SILENCER FOR LONG-RANGE SHOOTERS

NEW

GENESIS PRO (PREV. GENESIS)

The best silencer we've ever made becomes even better. The Genesis becomes Genesis Pro - which includes the brand new Svemko suppressor brake.

With Genesis Pro, we wanted to create something that really pushed the boundaries of silencer technology. The silencer is designed for long-range shooters who demand only the absolute best and is based on years of development of a military silencer for the Norwegian Armed Forces.

This front-mounted full-titanium silencer delivers cutting-edge performance for long-range shooters. Due to its unique design in grade-5 titanium with double blast chambers and double chamber walls, as well as an Inconel core optimizer, Svemko Genesis sets a new standard.

It is tested and approved for up to 40 shots with .338 Lapua Magnum before cooling. To handle the extreme temperatures, it has specially developed custom titanium grade 5 sealing rings to close the chambers. Due to its modular design, you can attach it on top of a high performance 17-4PH stainless steel muzzle brake or use only the muzzle brake.

With the brand new and included Genesis Suppressor Brake at the end, you get up to 50% recoil reduction on large calibers, and minimal ground disturbance due to the design of the gas ports.

TITAN 5 Double Blast Chamber

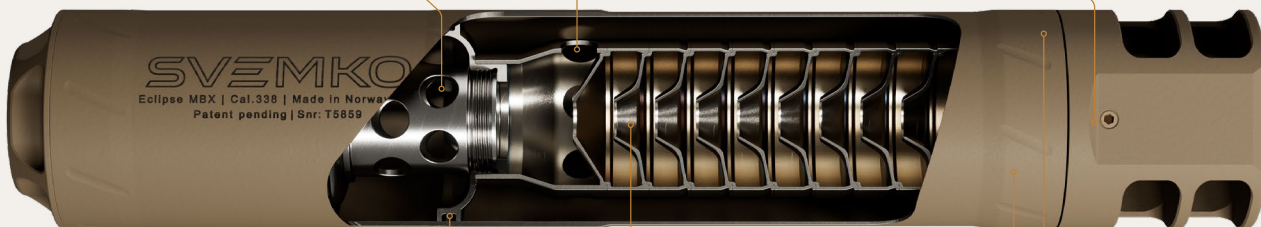

The double blast chamber is extremely robust enabling uniform distribution of gas pressure in the rear chamber.

TITAN 5 Blast Baffle

Significantly thicker wall thickness for maximum durability.

7075-T6 Suppressor Brake

Up to 50% recoil reduction. Angled gas ports provides zero ground disturbance.

SVEMKO
Eclipse MBX | Cal.338 | Made in Norway
Patent pending | Snr: T5859

TITAN 5 Core

Super light and extremely robust. Machined from a solid bar of titanium.

TITAN 9 Outer Tube

Extremely robust, lightweight, and highly stable.

17-4PH Muzzle Brake

Enables up to 60% recoil reduction and has a conical connection for silencers.

TITAN 5 Double Chamber Wall

Parabolic construction for extreme strength.

Inconel Core Optimizer

Innovative technology that balances pressure and temperature during shooting.

NEW

GENESIS PRO Front-Mounted

The best silencer Svemko's ever made. The silencer is designed for long-range shooters who demand only the absolute best and is based on years of development of a military silencer for the Norwegian Armed Forces. The Genesis delivers unmatched performance with 30–34 dBc (.338 LM) sound reduction and excellent recoil reduction. It comes in both Black and Flat Dark Earth (FDE) color. It's approved for up to 40 shots with .338 LM before cooling. With the new included Svemko suppressor brake it reduces recoil by up to 50%.

GENESIS PRO HARDCASE, ACCESSORIES AND MOUNTING TOOLS

When you buy a Genesis silencer a hardcase is included that contains:

- An adjustable torque wrench
- A Kevlar mirage cover that matches the color of the suppressor
- A magnetic level to ensure perfect mounting of the muzzle brake
- All necessary mounting tools
- Shims for precise adjustment of the Genesis muzzle brake
- Suppressor Brake
- Mirage band
- Mirage band screw for attaching the mirage band

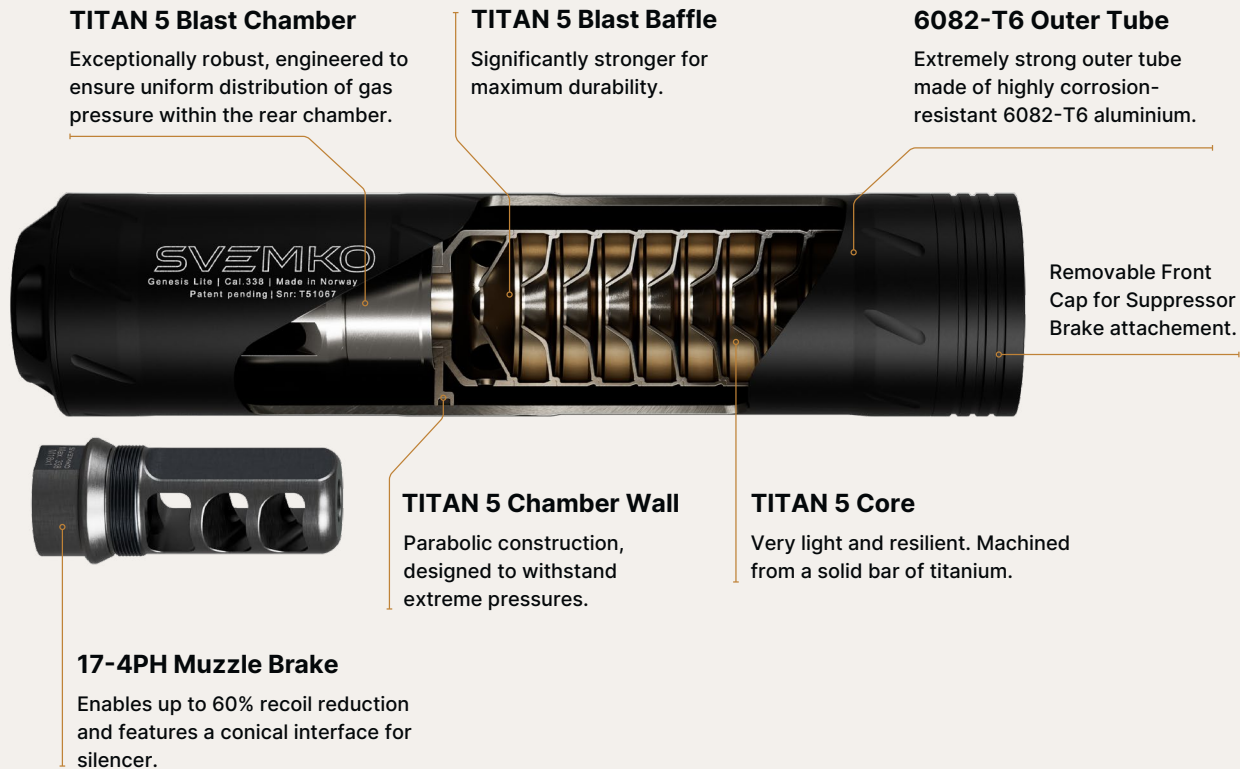

NEW

GENESIS LITE

With the Genesis Lite, we set out to create a silencer that combines advanced performance with low weight and excellent shooter comfort—an option for shooters who want maximum precision and balance without compromise. Genesis Lite builds on the same engineering heritage as the Genesis Pro, developed over several years in collaboration with the Norwegian Armed Forces. The silencer is optimized for PRS and long-range shooting, where fast handling, precision, and proper rifle balance are essential.

This front-mounted silencer features a 6082-T6 aluminum outer tube and end cap to reduce weight while retaining the robust core technology Svemko is known for. Whereas the Genesis Pro features dual blast chambers and titanium in all external components, the Genesis Lite employs a simpler and lighter chamber design that delivers an ideal balance of performance, precision, and weight savings.

Despite its minimal weight, the Genesis Lite offers impressive sound suppression. And when maximum recoil reduction is required, it can be further upgraded with our new Suppressor Brake, which mounts directly to the front of the silencer to provide exceptional control and shooting comfort.

NEW

GENESIS LITE Front-Mounted

The new Genesis Lite is designed for long-range shooters who want a premium high performance silencer for standard as well as larger magnum calibers. It delivers up to 37 dBC on .308W and only weighs 363 grams. The new Svemko suppressor brake (bought separately) delivers exceptional recoil reduction (50%) on the shooter and zero ground disturbance due to the angled gas ports.

GENESIS MUZZLE BRAKE AND SUPPRESSOR BRAKE

GENESIS MUZZLE BRAKE*

The Genesis Muzzle Brake is made from extremely strong 17-4PH stainless steel and has a weight of only 82 grams. It enables up to 60% recoil reduction and features a conical connection for optimal performance and precision. The Genesis Muzzle Brake disperse gasses in two angled directions enabling optimal performance and recoil reduction.

GENESIS SUPPRESSOR BRAKE**

The brand new Genesis suppressor brake will revolutionize your shooting experience. It provides up to 50% recoil reduction and due to the design with angled gas ports it provides minimal ground disturbance. It is made from corrosion resistant 7075-T6 Aluminium and only weighs 65 grams.

*The Genesis Muzzle Brake is sold separately.

**The Genesis Silencer Brake is included in Genesis Pro and sold separately for Genesis Lite.

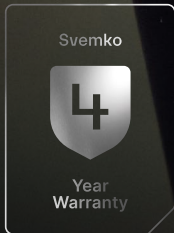

SILENCER FOR SEMI-AUTOMATIC RIFLES

FLUX SERIES

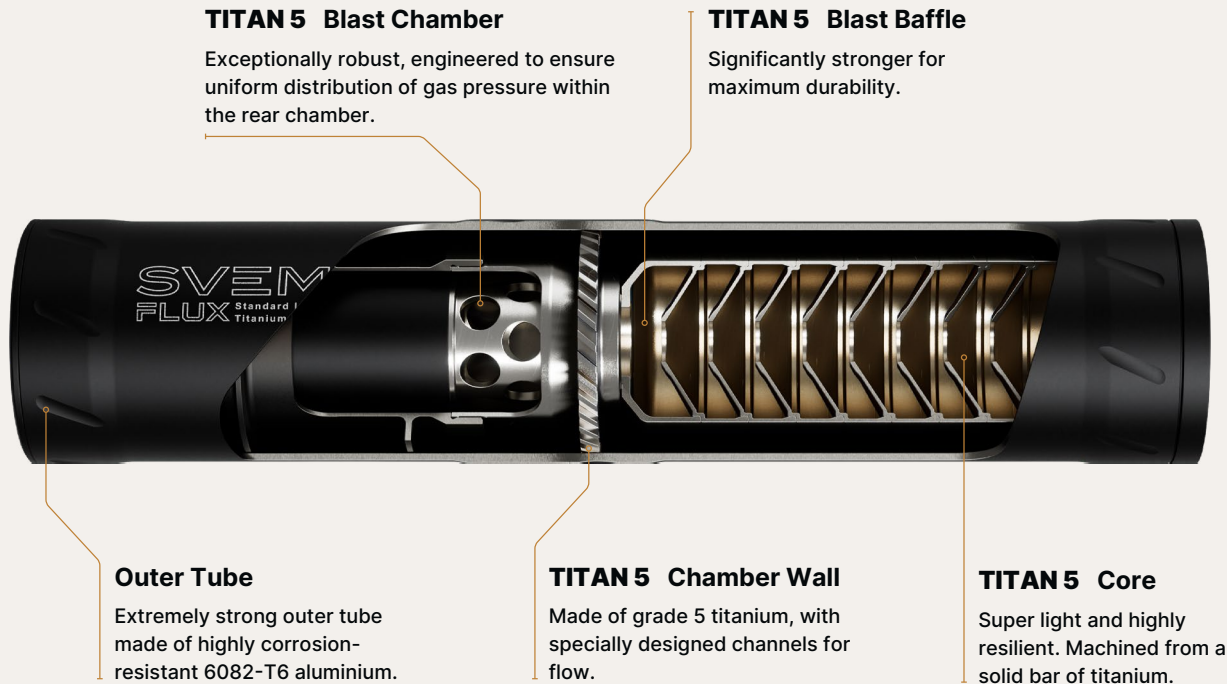

The Flux Hunter (prev. Flux Standard) is a titanium core silencer for semi-automatic rifles. Constructed with a grade 5 titanium core, it is both lightweight and extremely durable. It has undergone years of testing and refinement to optimize its design, delivering optimal suppression and minimal blowback.

HOW THE FLUX TECHNOLOGY WORKS:

The gas from the barrel is directed backwards into the silencer, where the temperature and velocity are at their highest. The purpose is to cool it down and reduce the velocity without building up excessive pressure. Once the gas has reached the back of the silencer, it is directed forward on the inside of the outer tube through circular channels that further cool down the gas and reduce its velocity. The gas then proceeds forward, at which point the temperature is significantly lower. When it reaches the front section, the gas is directed into a diffuser that guides it out of the muzzle of the silencer.

FLUX HUNTER Over-barrel

The Flux Hunter (prev. Flux Standard) is ideal for hunting with semi-automatic rifles. It has undergone years of testing and refinement to optimize its design, delivering optimal suppression and minimal blowback. It delivers extreme performance with 26–30 dBc noise reduction (.308 Win.) and only weighs 320 grams.

NEW

ROGUE SERIES

Introducing the all-new Rogue 556 Silencer: engineered specifically for AR15 rifle systems to deliver unmatched performance. The system is based on our military technology and features an advanced flow-through geometry. The silencer is crafted from titanium grade 5 and stainless steel, ensuring durability and precision. With a weight of only 295 grams the Rogue 556 is extremely light.

Our new patented AccuLock™ system enables a 90 degree rotation for mounting on the flash hider/brake. The system has a new innovative built-in locking mechanism that keeps the silencer securely in place. The Rogue 556 offers versatile mounting options, including both a flash hider and a muzzle brake, making it the ultimate choice for professional shooters.

Svemko

Year
Warranty

TITAN 5 Blast Chamber

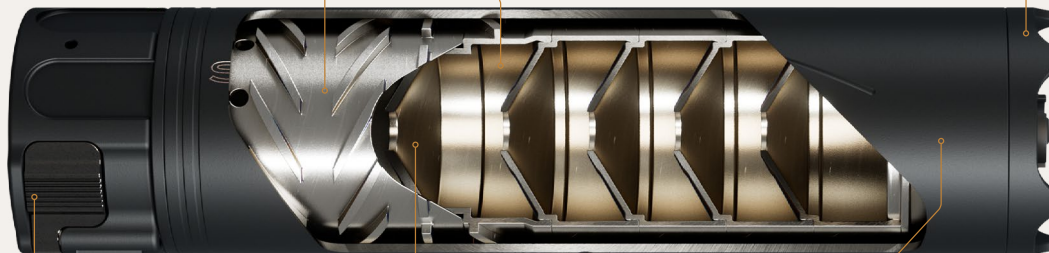

Precision-machined from solid titanium bars for maximum strength and performance. The helical channels in the flow-through system significantly reduce blowback for improved performance.

TITAN 5 Core

Provides the silencer with a lightweight design while ensuring exceptional durability.

TITAN 5 End Cap

Engineered with advanced construction for optimal gas flow.

Svemko AccuLock™

The new patented QD system allows for quick and secure attachment of the silencer to the flash hider or brake with a simple 90-degree twist. Featuring an innovative locking mechanism, that ensures a secure fit during use.

17-4PH Blast Baffle

An extra-strong blast baffle ensures maximum durability and strength, paired with flow-through channels for efficient pressure relief.

TITAN 9 Outer Tube

Offers an ideal balance of lightweight design and exceptional strength.

NEW

ROGUE 556 Front-Mounted

The new Svemko Rogue 556 silencer features advanced flow-through technology, and delivers excellent performance of 24–26 dBc sound reduction while weighing only 295 grams. The system comes with two mounting options, a flash hider and a muzzle brake. Our new patented AccuLock™ system enables a 90 degree rotation for mounting on the flash hider/brake.

QUICK-MOUNT, MUZZLE BRAKES & ACCESSORIES

QUICK MOUNT SYSTEM

QUICK MOUNT ADAPTER FOR SILENCERS AND MUZZLE BRAKES.

Quick-Mount (QM) is a quick-detach system for Svemko silencers and muzzle brakes, and is available for most models. The QM Adapter allows you to quickly attach and detach your silencer with a 90° twist. It is made out of hardened steel and is extremely strong and durable. The QM system lets you use a single Svemko silencer across multiple rifles– even when they have different thread types.

Compatibility

QM is a dedicated interface: It can't be used on silencers delivered with standard direct threads; you choose the Quick-Mount version at purchase.

Adapter bought separately: The QM adapter is bought separately from the Quick-Mount-configured silencer. You can also buy additional adapters if you want to use one silencer for multiple rifles.

THREADS

M13×1	M14×1	M14×1.5	M15×1	M16×1	M17×1	M18×1
M18×1.5	1/2"-20	1/2"-28	5/8"-24			

The Svemko Quick Mount is small in size but has some innovative details;

Safe Pin

- Ensures correct installation of the silencer
- Prevents damage to threads

Allen Key Attachment

- Flexible solution for an easy assembly
- Easily remove the Quick Mount adapter if it gets stuck inside the silencer or muzzle brake

Conical Shoulder

- Provides optimal precision and ensures that the silencer doesn't come loose

ATLAS MUZZLE BRAKE

The Atlas is a pure titanium grade 5 Muzzle Brake, and is designed specifically for long-range shooters. Its design is incredibly effective and delivers extreme performance with up to 60% recoil reduction. It weighs only 66 grams and has a total length of 81 mm.

The Muzzle Atlas has 5 openings on each side disperse gasses in two angled directions enabling optimized performance.

The muzzle brake is adjustable with a round lock-nut. There is also a hole for attaching a mirage band. The screw is included and located at the included mounting tool.

VELOCITY MUZZLE BRAKE

The Velocity Muzzle Brake is crafted from titanium grade 5, making it incredibly lightweight and durable. Its design allows for superior recoil reduction compared to conventional muzzle brakes or suppressors. The Velocity 1.0 can be used with a fixed thread or the Svemko Quick Mount adapter.

Accessories & Modules

EXTRA MODULES FOR CALIBER CHANGE

Every Svemko silencer offers caliber change. With the included tools, simply unscrew the module and replace it with a different caliber module. Also unscrew the module for easy cleaning.

Coupled with the Quick-Mount Adapter, the system is versatile and adaptable, compatible with various firearms for seamless interchangeability.

SVEMKO MIRAGE COVERS

Svemko offers high-quality custom mirage neoprene covers for our silencer models by Niggeloh, Made in Germany. Mirage significantly reduces and delays the effects of mirage from the silencer. They also protect the silencer from scratches and reduce noise from the silencer hitting branches when hunting in the forest.

SVEMKO EXTREME HI-TEMPERATURE MIRAGE COVERS (PURE & GENESIS)

For the Pure and Genesis models we offer custom hi-temperature mirage covers by Armageddon Gear, Made in the U.S. These covers can handle extreme heat and have a design that ensures no contact areas between the nylon shell and a hot silencer. They also feature a khaki Kevlar lining as well as a Kevlar cord. The adjustable cord ensures custom fit and retention.

TWIG DEFLECTOR

All our over-barrel silencers come with a standard plastic insert that you can mount at the back of your silencer. The TwigDeflector is designed to prevent branches and bushes from getting caught in the transition area between the barrel and the silencer.

MIRAGE RING AND MIRAGE BAND **NEW**

The Svemko Mirage Band is designed to reduce mirage from the silencer barrel, effectively blocking rising mirage from distorting your view through the optic.

It's constructed with a durable, heat-resistant fabric and high-quality double velcro for fastening allows for fast mounting, secure tensioning, and easy adjustment to fit different barrel profiles—no tools required. All hard-parts are made from CNC-machined aluminium including the mounting interface providing rigid support and long-term durability.

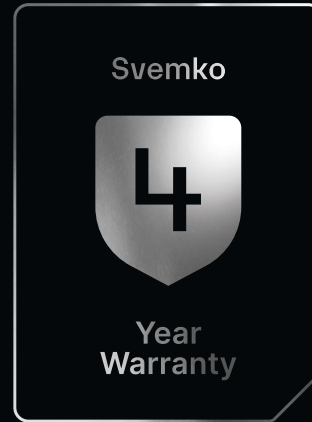

It mounts directly to the Svemko Mirage Ring (sold separately), as well as the Genesis Suppressor Brake and the Atlas Muzzle Brake (mirage screw is included).

The Svemko Warranty

Svemko develops and produces high-quality products with a long lifespan. We stand by the quality and durability of every product we make. All Svemko silencers and muzzle brakes come with an extended warranty option, the Svemko Warranty.

4 Year Warranty:

1.0 Series | Flex Series | Genesis Lite | Flux | Rogue | Velocity

8 Year Warranty:

Pure Series | Genesis Pro | Atlas

Please note, we offer the Svemko Warranty as an extended warranty option when registering your product at www.svemko.com.

In addition, we supply spare parts and accessories for our silencers indefinitely.
