FLAVORING GUIDE _____

ORDERING INFORMATION _____ 25

Treatment Options

Our treatment plans start with the individual needs of the pet. We provide custom tailored solutions in consultation with the pet owners. ←

CAPSULES We offer a wide range of capsule sizes, tailored compound medications, and customized strengths. For pets on multiple medications, we can provide each prescription in uniquely colored capsules for easy identification.

TABLETS Micro tablets are small, quick-dissolving, and easy to administer, making them a top choice for many pet owners. They are available for a wide range of medications.

OTIC GELS Otic ear packs are an ideal solution for pets with chronic ear infections. This lanolin-based product typically includes three key medications: an antifungal, a steroid, and an antibiotic. Veterinarians have the flexibility to customize the formulation by adding or removing medications as needed. Designed as a one-time, in-clinic application, it lasts 10-14 days, eliminating the need for daily at-home treatments. This improves efficacy and ensures better compliance for both pets and their owners.

SUSPENSIONS Pharmacists have a deep understanding of drug stability in various formulations. For many animals, liquid medications are the only viable option, making it essential to ensure compounded medications are stable in liquid form. Once stability is confirmed, appropriate medications can be suspended into a liquid and enhanced with flavoring to improve palatability.

Whether your pet prefers a savory meaty or fishy taste, or something sweet and salty, we offer over 30 flavors to suit a wide range of species and preferences.

Our oral suspensions come in amber bottles with easy-to-use caps and oral syringes, ensuring precise dosing while minimizing waste and mess. We are confident our oral suspensions will meet the needs of every pet owner and their beloved animals.

TRANSDERMALS Transdermal gels are one of the easiest yet most underutilized methods for delivering pet medications. These gels allow medications to be absorbed through the animal's skin, eliminating the need to administer pills. Pharmaceutically compounded transdermal gels provide a stress-free solution for both pets and their owners. Many commonly prescribed feline medications, such as methimazole, prednisolone, and amitriptyline, are available in this convenient format.

WE CAN DO MORE....

The following represents our main compounded medications and forms. This list is not exhaustive and we can oftentimes combine medications to suit your patients' needs. If you do not see what you're looking for, please contact us as we may be able to help.

We're a full-service veterinary pharmacy that specializes in compounded, commercial and over-the-counter medications for all animals. With over 20 years of experience, we bring you and your patients the highest level of quality and personalized care.

Our Mission

To deliver outstanding care for animals and their caregivers by creating customized and personal solutions and providing unparalleled service.

Why us?

- ✓ **Custom Medications**
With our custom compound medications, we can change dosage, form, and flavor.
- ✓ **Pharmacist Support**
Text, call, or email us – we'll answer any questions you have
- ✓ **Fast Delivery**
Industry-leading turnaround times and delivery over all of California.
- ✓ **Quality Guaranteed**
We utilize a third-party analytics lab for robust testing and validation

How We Help Animals & Their Owners

- High-quality, custom compounded and commercial medications
- Fast delivery (1-2 days) anywhere in California
- 5-star customer service. We're here for anything you need.
- Easy communication, including proactive wellness checks and refill reminders
- Complete care packages with everything patients and caregivers need

How it works

01

You submit a prescription

You can submit a prescription via call, email, fax, or through our online portal. The pet owner can also drop it off at our location!

02

We text your clients a checkout link

Your client will confirm and place the order and choose between free delivery and pickup options.

03

We deliver to your client's home

Or if they prefer they can pickup conveniently from our location in Burbank, CA

04

They treat their pet

Everything they need to administer the medication is included.

05

We follow up and check in

From wellness checks to refill reminders, our proactive check-ins reduce calls to your practice and help make sure your clients stay compliant with their at-home care.
