The watch's mode button cycles through different functions every few seconds, showing the time, alarm time, stopwatch, and other settings. To access the alarm function, press the lap/reset button repeatedly while holding it, then press the start/stop button to toggle the alarm on or off. A series of presses will change the alarm indicator's status with each click. The hourly chime can be turned on or off by pressing the mode button while holding the lap/reset button and checking if all day-of-week indicators are lit (beep is on) or not (beep is off). To set the time in military format, press the start/stop button three times when setting the time, which will cause the display to switch between 12-hour AM/PM and 24-hour military time. The "H" indicator denotes military time, while "A" and "P" signify AM and PM respectively. The AW21312W has a 4-button design, featuring Light, Mode, Start/Stop, and Lap/Reset buttons. To turn off the set alarm, press buttons 3 and 4 simultaneously, causing the alarm icon to appear or disappear. To disable the hourly chime, press button 4 while holding down button 2; this action turns the chime off. Conversely, pressing button 4 and holding it while activating button 2 reinstates the chime. For digital watches, users must first press button 2 until the alarm time is displayed, then navigate to settings using buttons 3 and 2. The AW60458W sport watch enables hourly chime disablement by accessing CLK mode and pressing both LAP/RESET and MODE buttons.
