Metal Detector with Depth Read-Out You can use the RadioShack Metal Detector to search for coins, jewelry, gold, and other treasures almost anywhere. This advanced metal detector is easy to use and provides great results when searching for small objects like gold nuggets or tiny pieces of jewelry. The metal detector has several features: * A Dual Liquid Crystal Display that shows the type of metal being detected and the depth of the target item. * Slow Sweep Discrimination that distinguishes between different metals, even at slow speeds. * Three-Tone Audio Discrimination that sounds distinct tones for different categories of metal objects to make identification easier. * An Eight Inch Waterproof Search Coil that lets you use your detector in any weather conditions.
