WHITEPAPER BY Playearnode

1. INTRODUCTION

1.1 VISION AND MISSION

VISION

To transform global entertainment by establishing skill betting as a mainstream phenomenon, where anyone can wager freely, compete with talent, and unlock high-reward opportunities (x10, x100, x1000).

$PND envisions a world where gaming, betting, and e-sports converge into an inclusive, engaging ecosystem driven by innovative betting models and cutting-edge technology, empowering players to redefine competition through skill, not chance.

MISSION

To democratize skill betting by delivering accessible, gamified experiences that blend poker's strategic depth, e-sports' excitement, and casual gaming's fun. Through games like CorgiInSpace, 1VSALL, and Mystery 3, powered by flexible betting systems, $PND enables players to bet any amount and aim for substantial wins.

We are committed to evolving our betting mechanics, launching captivating games, and fostering a vibrant Telegram community, ensuring players worldwide can compete, win, and shape the future of skill-driven entertainment.

1.2 Why $PND?

$PND redefines competitive gaming by addressing a critical gap: the inability to bet freely on personal skills without pro-level barriers. Unlike chance-based casinos or rigid e-sports platforms, $PND offers flexible betting models—dynamic pools and live 1VSALL—allowing wagers in USD (fiat/crypto) with multipliers up to x1000.

Our games, built by passionate gamers, combine addictive gameplay with strategic depth, appealing to casual players, e-sports fans, and bettors. A Telegram-driven community, robust tokenomics (100B $PND, 60% for players, 0.5% burn per bet), and planned AAA partnerships position $PND to capture a $600B gaming and betting market.

$PND isn't just a platform—it's where skill pays big.

2. Problem and Solution

2.1 Limitations of Current Betting

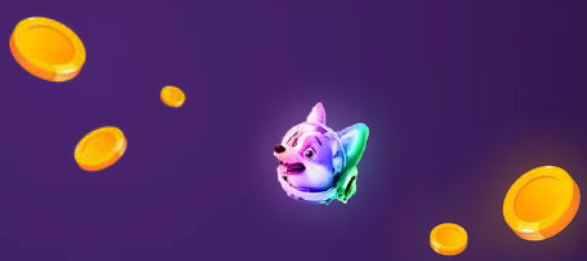
The $400B betting industry frustrates millions by prioritizing chance over skill. Casinos and sportsbooks rely on random outcomes—slots, dice, or unpredictable results—favoring the house and limiting player control. E-sports betting, while growing, imposes rigid wager structures, alienating casual gamers who want to monetize their talents.

Becoming a professional gamer, the only viable path to profit from skills, is an elite, high-barrier pursuit for less than 0.1% of 3B gamers. Existing platforms lack accessible, skill-driven betting systems with flexible stakes and high-reward potential, stifling demand for strategic, fun experiences and leaving a $600B gaming and betting market largely untapped.

2.2 The $PND Solution

$PND revolutionizes gaming by enabling anyone to bet on their skills with unmatched flexibility. Past skill-betting platforms failed due to rigid models that capped rewards and lacked mainstream appeal. $PND's dynamic pools (score-based) and 1VSALL (live) systems let players wager any amount, targeting multipliers like x1000.

For example, in 1VSALL, a $10 bettor defeating a $100 opponent earns $10, creating a skill-driven economy. Our team's gaming expertise ensures addictive, strategic gameplay, while a hybrid fiat/crypto platform broadens access. With Telegram's viral community and DAO governance, $PND transforms an unfulfilled dream into a global, player-centric betting ecosystem.



3. $PND Ecosystem

3.1 CorgiInSpace

CorgiInSpace, launching on a Telegram mini-app in Q3 2025, is an arcade game with simple, addictive gameplay, spearheading $PND's skill betting revolution. Players aim for high scores, competing to beat opponents' scores or protect their pool. The dynamic pool system allows USD (fiat/crypto) bets of any size.

For example, Player A bets $20 with a score of 100; Player B bets $5 and scores 102, winning $10 ($5 + $5 from A).
A leverage system (e.g., x10) cycles gains for up to $20 * 2^10 ($20,480).

Pools clear in ~10 minutes, with unclaimed funds withdrawable after 1 hour. Airdrop farming and NFT skins drive viral adoption via Telegram.

2.2 The $PND Solution

$PND revolutionizes gaming by enabling anyone to bet on their skills with unmatched flexibility. Past skill-betting platforms failed due to rigid models that capped rewards and lacked mainstream appeal. $PND's dynamic pools (score-based) and 1VSALL (live) systems let players wager any amount, targeting multipliers like x1000.

For example, in 1VSALL, a $10 bettor defeating a $100 opponent earns $10, creating a skill-driven economy. Our team's gaming expertise ensures addictive, strategic gameplay, while a hybrid fiat/crypto platform broadens access. With Telegram's viral community and DAO governance, $PND transforms an unfulfilled dream into a global, player-centric betting ecosystem.

3. $PND Ecosystem

3.1 CorgiInSpace

CorgiInSpace, launching on a Telegram mini-app in Q3 2025, is an arcade game with simple, addictive gameplay, spearheading $PND's skill betting revolution. Players aim for high scores, competing to beat opponents' scores or protect their pool. The dynamic pool system allows USD (fiat/crypto) bets of any size.

For example, Player A bets $20 with a score of 100; Player B bets $5 and scores 102, winning $10 ($5 + $5 from A).
A leverage system (e.g., x10) cycles gains for up to $20 * 2^10 ($20,480).

Pools clear in ~10 minutes, with unclaimed funds withdrawable after 1 hour. Airdrop farming and NFT skins drive viral adoption via Telegram.

3.2 1VSALL

1VSALL, launching in Q1 2026, is a live, high-skill game capitalizing on CorgiInSpace's community. Its immersive map and gameplay, kept secret for launch hype, deliver a competitive experience blending e-sports intensity with mainstream fun.

Players wager USD (fiat/crypto), risking chosen amounts. If Player A ($10) defeats Player B ($100), A earns $10; B loses $10 and respawns. Random jackpots, funded by 5% bet fees, boost excitement.

Optimized for instant engagement, 1VSALL leverages $PND's Telegram base for a vibrant launch, appealing to casual and e-sports players with its high-reward, skill-driven model.

3.3 MYSTERY 3

Mystery 3, debuting in Q1 2026, is a community-chosen game selected via a DAO vote by $PND holders (5,000+ tokens). Inspired by Golf Battle's precision-based fun, the final concept will emerge from community proposals, ensuring resonance with our Telegram audience.

Built with player feedback, Mystery 3 will feature dynamic pools or 1VSALL betting, offering USD (fiat/crypto) wagers with x10-x1000 multipliers. With NFT skins and airdrop rewards, it balances accessibility and depth, prioritizing quality to drive engagement and sustain $PND's curated, high-volume game ecosystem.

3.4 Platform and NFT Marketplace

The $PND Platform, launching in Q1 2026 on web and mobile (iOS/Android), is a user-friendly hub for betting and gaming, supporting USD (fiat via Stripe) and crypto ($PND, USDT, BTC).

Hosting CorgiInSpace, 1VSALL, and Mystery 3, it offers diverse gameplay—arcade, competitive, strategic—for broad appeal. Chatrooms, leaderboards, and shareable clips foster engagement.

The NFT Marketplace enables trading of rare skins (e.g., “Corgi Legends”) with $PND/USD (0.5% fee), offering perks like boosted odds. By Q4 2026, NFTs will integrate with AAA games and metaverses, driving scalability and style.

3.5 Dynamic Pools and Matchmaking

Dynamic pools enable score-based betting in games like CorgiInSpace, where players wager USD (fiat/crypto). A $20 bet with a 1,000 score faces a $5 challenger; the winner earns $10, with excess bets forming new pools. In 1VSALL, live bets (e.g., $10 vs. $100) yield the lower amount. Ties return bets.

Optimized matchmaking ensures fair, skill-based matchups, clearing pools in ~10 minutes, with unclaimed funds withdrawable after 1 hour. This flexible system maximizes engagement and liquidity, scaling $PND’s skill betting revolution.

3.6 Developer and Community-Driven Ecosystem

$PND prioritizes quality over quantity, curating high-volume, addictive games powered by robust betting models (dynamic pools, 1VSALL). Our DAO (5,000+ $PND holders) proposes and votes on new games, ensuring community alignment. Selected concepts are developed with player feedback, guaranteeing engagement.

By Q3 2026, a $PND Developer Kit and Creator Fund (50M $PND) will empower third-party developers to build approved games, sharing 40% of revenues. Collaborations with AAA titles (e.g., FPS, battle royales) will integrate $PND's betting system, with jackpots funded by 5% fees. This curated ecosystem drives scalability and mainstream adoption.

4. Market and Growth Strategy

4.1 Market Analysis

The $600B gaming ($200B) and betting ($400B) markets offer a vast opportunity for $PND.

Gaming engages 3B players, driven by mobile and casual titles, while betting thrives on sports and casinos but lacks skill-based options. E-sports ($2B, 20% annual growth) signals demand for competitive platforms, yet casual gamers can't easily monetize skills. $PND targets this niche, combining gaming's engagement with betting's rewards.

Comparable platforms like Axie Infinity (2.5M users) and DraftKings ($7B revenue) prove viability. By 2027, $PND aims for 100M users and $6B in bets, capturing 1% of the market.

4.2 Target Audience

$PND targets diverse groups:

- **Casual Gamers (18-35, 2B):** Mobile/PC players betting on CorgiInSpace and Mystery 3 for fun and rewards.
- **Competitive Gamers (16-30, 500M):** E-sports fans drawn to 1VSALL's skill-driven battles.
- **Bettors (21-45, 200M):** Seeking skill-based alternatives with USD (fiat/crypto) wagers.
- **Crypto Enthusiasts (18-40, 300M):** Attracted to $PND's tokenomics, NFTs, and Telegram airdrops.

With accessible design and inclusive betting, $PND projects 100M users by 2027, uniting these segments in a skill-driven ecosystem.

4.3 Acquisition Strategy

$PND's multi-channel strategy targets 100M users by 2027:

- **Telegram:** CorgiInSpace beta (Q3 2025) with airdrops and NFTs, targeting 500K members by Q4 2025 via Telegram's 900M+ base.
- **Mainstream Ads:** $2M for TikTok/YouTube/TV campaigns, $1M for streamers (e.g., Ninja), and $1M for events like $PND Launch Party (Q1 2026).
- **Gaming Partnerships:** AAA collaborations (Q3 2026) to integrate $PND betting into popular titles.
- **Crypto Incentives:** 30% presale bonuses for 1,000,000, investors (Q4 2025) and Binance/Coinbase listings (Q1 2026).
- **Community:** DAO votes and weekly Telegram tournaments drive retention.

5. Tokenomics

5.1 $PND Token Overview

The $PND token (100'000'000'000 total supply) powers the $PND platform, enabling bets, NFT purchases, and rewards across games.

The platform is powered by Ethereum (ERC-20) for its core economy, with additional support for USDT on ERC-20, TRC-20, and TON. The BETA version runs on TON only, enabling instant onboarding and low-fee gameplay via Telegram. Utilities include betting, NFT skins, staking (15-25% APY), DAO governance (500'000+ tokens). Burns (0.5% per bet) reduce supply, enhancing value. Launching with a Q4 2025 presale, $PND drives a community-focused, skill-based betting economy.

5.2 Distribution

$PND's 100'000'000'000 tokens are allocated as:

- Community (60%, 60B): Giveaways, staking, and in-game rewards, vesting over 3 years.
- Marketing (25%, 25B): Campaigns, partnerships, and events, vesting over 2 years.
- Liquidity (15%, 15B): DEX/CEX listings (Binance, Q1 2026), with 15B sold in Q4 2025 presale ($15M at $0.001).

5.3 Utilities

$PND's utilities drive demand:

- **Betting**: Wagers in games alongside USD (fiat/crypto).
- **NFT Purchases**: Buy/trade skins on the NFT Marketplace.
- **Staking**: 15-25% APY with perks (boosted odds, rare NFTs).
- **Governance**: DAO voting for 500'000+ token holders.

5.4 Burn Mechanisms

$PND burns 0.5% of every bet (USD/$PND) across games, removing tokens from circulation. Monthly buyback-and-burn events starting Q1 2026, reported via DAO.

Projected to reduce supply by 30% in three years, this deflationary model drives token value, incentivizing players and investors in a high-value ecosystem.

6. Use of Funds

6.1 Fund Allocation

$PND will raise $15M via a Q4 2025 presale (15B tokens at $0.001). Allocation:

- **Marketing (40%, $6M):** $2M for ads (TikTok, YouTube), $1M for streamers, $1M for events (Launch Party, Q1 2026).
- **Development (30%, $4.5M):** CorgiInSpace beta (Q3 2025), platform (Q1 2026), 1VSALL, Mystery 3.
- **Liquidity (20%, $3M):** DEX/CEX listings (Binance, Q1 2026).
- **Operations (10%, $1.5M):** CertiK audits, Curaçao/Malta licenses, team costs.

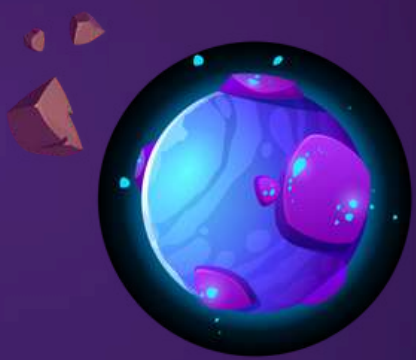
This fuels $PND's growth into a skill betting leader.

6.2 Transparency and Governance

$PND ensures trust through transparency. Fund use ($15M) and burns (0.5% per bet) are tracked on a public dashboard, audited by CertiK.

The DAO (500'000+ $PND holders) votes on major decisions, including game development and significant expenditures. Monthly Telegram AMAs and detailed updates maintain open communication.

This governance model aligns incentives, fostering accountability and driving $PND's mission to lead skill-based betting.



7. Roadmap

7.1 Key Milestones

- **Q3 2025:** CorginSpace beta on Telegram include our innovative betting system, with airdrops farming, targeting 100K players.
- **Q4 2025:** $15M presale (15B $PND), CorginSpace 1.0, 200K $PND tournament, 500K Telegram members.
- **Q1 2026:** Full platform launch with CorginSpace, 1VSALL, Mystery 3, NFT Marketplace, CEX listings, 1M users.
- **Q2 2026:** Burn events start, Creator Fund launch, 1VSALL World Championship (5M $PND prizes).
- **Q3 2026:** AAA game betting integration, NFT metaverse utility.
- **2027:** 10M users, $5B bets, leading skill betting platform.

7.2 Long-Term Vision

By 2027, $PND aims to lead skill-based betting with 10M users and $5B in bets. Our ecosystem will expand via DAO-voted games and AAA partnerships, integrating betting into major titles and metaverses.

New betting models and high-quality games will sustain engagement, while burns (0.5% per bet) enhance $PND's value.

We envision a global movement where players bet, win, and shape competitive gaming, redefining entertainment through skill and community.

8. Team and Advisors

8.1 Core Team

- **Founder & CEO (Reveal in Q4 2025):** A 25-year-old French entrepreneur with $10M in business revenue and $2M liquidity by age 20. An NFT pioneer with top collections, he scaled startups via marketing, sold a finance web app in 2023, and now leads $PND with tech-marketing expertise, fully focused on mainstreaming skill betting.

- **Co-Founder & COO:** A high school partner with 7+ years scaling business, specializing in operations, logistics, and project management, ensuring $PND's execution.

- **Development Team:** 10+ years in game dev, with experience in arcade and competitive titles, actively recruiting elite remote developers for speed and innovation.

Identities will be unveiled via Q3 2025 marketing and Q4 2025 AMAs.

8.2 Strategic Advisors

$PND's lean team leverages AI for execution, bypassing early advisors. Post-Q1 2026 launch, we'll recruit experts, targeting gaming executives (e.g., ex-Epic Games), blockchain leaders (e.g., ex-Binance), and betting specialists to guide scaling.

This strategic approach ensures focus on delivery now, with high-impact expertise later to drive $PND's global growth.

8.3 Initial Partnerships

$PND launches without partners, prioritizing execution to prove our vision. CorginSpace, 1VSALL, and Mystery 3, backed by our Telegram community, will drive organic growth.

Post-Q1 2026, we'll target partnerships with indie studios, AAA titles (e.g., FPS developers), and blockchain platforms (e.g., Solana) to integrate $PND betting, amplifying reach and reinforcing our community-driven mission.

9. Compliance, Security, and Risks

9.1 Regulatory Framework

$PND commits to compliance, securing a **Curaçao gaming license** by Q4 2025 for the Q1 2026 launch, supporting USD (fiat via Stripe) and crypto ($PND, USDT, BTC) betting.

A **Malta Gaming Authority license** is planned for Q2 2026 to enter regulated markets. **KYC/AML** protocols for fiat transactions align with global standards. Ongoing regulatory monitoring ensures adaptability, prioritizing player safety and legal integrity in a mainstream ecosystem.

9.2 Security Measures

$PND counters cheating and cyberattacks with CertiK-audited smart contracts (pre-Q4 2025 presale, Q1 2026 launch), multi-signature wallets, and KYC/AML for fiat.

Advanced encryption and anti-DDoS protect data and bets. AI-driven anti-cheating systems detect violations, enforcing severe penalties (bans, fund forfeiture). Regular third-party penetration testing ensures resilience, safeguarding players and investors for a fair betting experience.

9.3 Risks and Mitigation

- **Regulatory Risk:** Evolving betting laws may restrict operations. Mitigation: Secure Curaçao/Malta licenses, retain legal counsel, and adapt KYC/AML protocols.
- **Cheating Risk:** High-reward betting attracts cheaters. Mitigation: AI monitoring, severe penalties, and CertiK audits ensure fairness.
- **Competition Risk:** Gaming/betting platforms may compete. Mitigation: Unique betting models and AAA partnerships create a moat.
- **Tech Scalability Risk:** High user volume may strain servers. Mitigation: Invest $1M in cloud infrastructure and stress testing.

Transparency via DAO reporting mitigates trust risks, ensuring $PND's stability.

10. Community and Traction

10.1 Community Strategy

$PND's Telegram-centric community drives viral growth to 100M users by 2027:

- **Telegram Hub:** CorginSpace beta (Q3 2025) with airdrops targets 500K members by Q4 2025. Weekly AMAs, mini-games, and NFT drops sustain engagement.
- **DAO Voting:** 500'000+ $PND holders shape games (e.g., Mystery 3).
- **Tournaments:** Events like Q4 2025's 200K $PND tournament boost participation.
- **Transparency:** Monthly burn and fund updates build trust.

This grassroots strategy scales $PND's skill betting ecosystem.

10.2 Initial Traction

By Q3 2025, CorginSpace beta targets 100K players via Telegram airdrops and NFTs. The Q4 2025 presale aims for $15M (15B $PND, 1,000,000 investors with 30% bonuses), growing Telegram to 500K members.

A 200K $PND tournament amplifies hype. Post-Q1 2026 launch, the platform expects 1M users in six months, rivaling Notcoin's 35M growth, driven by Telegram and mainstream ads, establishing $PND as a skill betting leader.

11. FAQ and Appendices

11.1 Frequently Asked Questions

- **What is $PND?**

A skill-based betting platform launching Q1 2026, enabling wagers on CorginSpace, 1VSALL, and Mystery 3 with USD (fiat/crypto) and $PND.

- **How do I join the presale?**

Buy 15B $PND tokens at $0.001 via website/Telegram in Q4 2025. First 1,000,000 get 30% $PND bonus.

- **How does airdrop farming work?**

Play CorginSpace beta (Q3 2025) to earn points and farm coins, convertible to $PND in Q1 2026.

- **Is betting fair?**

AI-driven anti-cheating and optimized matchmaking ensure fairness, with bans and forfeiture for violators.

- **What are the risks?**

Regulatory, cheating, and competition risks are mitigated by licenses, audits, and unique models (see 9.3).

11.2 Glossary

- **$PND Token:** Native cryptocurrency (100'000'000'000 supply) for betting, NFTs, staking, governance.
- **Dynamic Pools:** Score-based betting with USD/$PND (e.g., $10 vs. $20 pool).
- **1VSALL:** Live betting where players earn the lower wager (e.g., $10 vs. $100).
- **NFT Skins:** Tradable cosmetics with perks, bought with $PND/USD.
- **DAO:** Governance by 500'000+ $PND holders for game/platform decisions.
- **Burn:** Token removal (0.5% per bet) to increase value.
- **Airdrop Farming:** Earning points convertible to $PND via gameplay.

PS from Founder: Am here to win and we gonna win together!
