John d rockefeller the secret covenant

A circulating conspiracy theory claims that John D. Rockefeller, a renowned American business magnate and philanthropist, penned a "Masonic Creed" that outlines the alleged goals of a shadowy organization aiming to enslave humanity. The supposed creed begins with the ominous statement: "We will keep their lives short and their minds weak while pretending to do the opposite." However, experts have debunked this claim as a fabrication, tracing its origins back to an anonymous email posted on a financial website in 2002. The text, supposedly written by Rockefeller, describes various methods for subtly controlling people's minds and bodies. It mentions using soft metals, aging accelerators, and sedatives in food, water, and air to make individuals lose their mental faculties. The supposed author also claims that these nefarious tactics will be disguised as solutions to common problems. Despite its widespread dissemination online, the text has been thoroughly discredited due to several inconsistencies. Firstly, it references modern inventions, such as video games, which did not exist during Rockefeller's lifetime. Secondly, the origins of the text are unknown, and it was not discovered in any archived documents or biographies about Rockefeller. We thank you for your emails regarding our piece on the Secret Covenant, but unfortunately, we don't know who authored it as they left an unusable email address. The text was submitted through one of our forms without any additional information. As there's no evidence that the author has insider knowledge of a secret global order aiming to enslave humanity, this text likely belongs to someone familiar with Illuminati lore rather than being written by Rockefeller himself. Our research suggests that the Secret Covenant is actually the Credo displayed in bronze letters at the Rockefeller Library. The text itself is an excerpt from John D. Rockefeller's beliefs, emphasizing individual worth, responsibility, and the pursuit of happiness. It highlights the importance of hard work, thriftiness, truth, and justice as well as the significance of keeping promises and living in harmony with God's will.
