Trump university diploma pdf

Donald Trump, the former President of the United States, has had his college degree scrutinized. Despite claims that he does not have a college degree, it's actually true - Donald John Trump earned a bachelor's degree in economics from Wharton School at University of Pennsylvania in 1968. Before attending Wharton, Trump spent two years at Fordham University where his grades were considered respectable. However, he did not graduate from there and instead received his degree from Wharton. His education background is a topic of interest among Americans and people worldwide. so concerned about trump's college degreeOver many years, several blog posts, articles, and forums have been created to discuss the academic backgrounds of various presidents. Typically, people would look at old yearbooks and policies without much attention.However, Donald Trump's case was unique because his claims about President Obama's academic records sparked curiosity about his own educational achievements. This ignited interest among people who wanted to learn more about his academic history.During the presidential campaigns, Donald Trump's college degree became a topic of discussion. It is ironic given that he criticized and questioned Barack Obama's academic records, claiming them to be inferior. Trump even ridiculed Obama for not being remembered by most of his Columbia classmates and questioned his Columbia and Harvard certifications.However, Trump's vocal criticism against Obama raised suspicions and led to a background check on his education. It was found that both Obama and Trump attended less competitive universities in their first two years; Obama attended Occidental and Trump attended Fordham. Both later transferred and earned their bachelor's degrees from ivy schools, with Obama graduating from Columbia and Trump from Pennsylvania. Neither graduated with honors, and Trump wasn't well remembered by most of his Pennsylvania classmates.While Obama went on to earn a "magna cum laude" from Harvard law school, Trump did not attend any graduate school. Despite Trump's claims of academic superiority, the evidence suggests otherwise.Initially, Donald Trump's college degree was not a topic of discussion. However, he brought attention to it by speculating about Barack Obama's GPA. He then urged the media to report that he was first in his class at the Wharton School of the University of Pennsylvania.In addition to lying about his grades, Trump threatened legal action against his alma mater if they released his GPA. This lie was amusing to people. Why would he lie about something so inconsequential? As a result, interested parties decided to investigate his education.They discovered that Trump had indeed lied about his GPA. He did not graduate with honors, as he claimed. To graduate with honors from the Wharton School, a student's GPA must be at least 3.40. Trump's GPA was either average or below average.It's also possible that he received a sanction for student conduct violations or academic integrity issues, but there is no concrete evidence of this.At the age of 72, some wondered why Donald Trump was fixated on his GPA, a rather childish preoccupation for someone of his age. Many successful public figures have amassed wealth and achieved success without having a college degree, such as Bill Gates. Trump, who is older and more experienced, should have recognized this. Grades are not necessarily indicative of future success.In addition to his fixation on GPA, Trump has also been obsessed with his IQ, even though it is a self-reported measure with no objective way to verify it. Trump has claimed to have a higher IQ than others, which he uses to dismiss their views without engaging with them directly.As of 2021, the net worth of Donald John Trump is estimated to be around \$2.4 billion, according to Forbes. However, his net worth has fluctuated over the years, and there Donald Trump's financial dealings have been under scrutiny due to varying estimates of his net worth. His business ventures encompassed real estate development, hotels, golf courses, and a television show called "The Apprentice." He also authored several books, but faced financial setbacks including bankruptcies for some of his companies. Trump did not attend public schools as he was privately schooled by his wealthy father's means, yet records from this time are scarce regarding any academic achievements or recognition. Even his college years remain somewhat unclear due to insufficient documentation. The lack of transparency surrounding Trump's educational background didn't seem to bother many of his supporters during the campaign. However, some argued that his business successes were proof enough of his presidential qualifications. Nevertheless, the inability to thoroughly review his academic record raised concerns and undermined his political standing among academics and professionals, as it made him appear untrustworthy.
