Roblox assassin exotic knife value list

Roblox assassin value list. Roblox assassin values.

****Rewritten Text.**** Exotics are super rare and valuable knives in Assassin! that usually have high demand in trading. They're special because they can have custom designs instead of textures and colors. Shadow is one such Exotic Knife that was initially found in the Elite Case but is now available for purchase in the Timed Shop. Interestingly, its current value is 1. Another notable Exotic is Doombringer, which seems to be a slightly rusted metal knife with a jagged blade and a skull-shaped hilt adorned with polished steel horns. Currently, Doombringer is unboxable in Exotic Cases or Case #2 and is used to craft the Mythic Dark Horse. The Value List website, run by Zickoi, keeps track of all cosmetics in Assassin!, including their values and demand among players. It also provides a list of owners who've obtained the mythical Ban Hammer, which can only be gotten by contributing to the game's development. Knives play a significant role in Assassin! with different rarities like Common, Rare, Legendary, Exotic, Mythic, and Dream. Gilded is currently a Tier 1 Exotic worth another Tier 1 Exotic. This knife has a unique gold appearance with wings on its hilt and a round ruby. Steampunk: Dark Blade is an Exotic Knife that can be obtained by opening the Elite Case. The knife's current value stands at 1. Trivia: The Proton Exotic Knife is currently valued at 1 Tier Exotic. To obtain this knife, one needs to craft a Legendary Case using six legendary knives. Alternatively, it can be traded for, with its current worth being 1 exotic. Interestingly, the name "Proton" originates from real-life subatomic particles. In fact, two other knives that share similarities with Proton, namely Electron and Neutron, are also subatomic particles.
