Home » Play » Character » Levelling Levelling Leveling in RIFT offers two primary methods: Instant Adventures (IA) and questing. IA provides faster leveling, but gear drops are random and less frequent. You'll often quest with others, though you may not find them chatty as they're leveling an alt while watching TV! IA is easy, offering little challenge, which can make it feel repetitive. To mix things up, consider other activities or questlines. On the other hand, leveling through questing takes longer but provides a steady stream of gear items. You'll explore more of the map, open portals, and enjoy the storyline. Questing will be necessary regardless. IA is only suitable for levels up to 65; after that, you'll need to level through questing as you require notoriety from level 65-70 zones. How do you level fast to 65? Some players have achieved this using Intrepid Adventures (IA) until reaching level 50, when a new XP bar appears. The remaining XP will fill the new bar. You can continue doing IA, but it may slow down significantly after hitting level 65.
