Ama guide to the evaluation of permanent impairment

The Washburn Law Journal publishes one volume per academic year, comprising three issues, with subscription rates ranging from \$30.00 to \$35.00, depending on residency. Limited individual copies of Volume 49 are available for \$15.00 each. Prepayment is required, and all shipping charges are included in the price. For inquiries regarding subscriptions, contact Washburn Law Journal at journalclaims@washburnlaw.edu or 785.670.1692. To subscribe, provide your name, shipping address, billing address (if different), contact person, and phone number. AMA Guides to the Evaluation of Permanent Impairment serve as a reliable framework for assessing permanent impairment, widely used by physicians, patients, and legal communities since 2008. AMA Guides Digital offers access to current impairment rating information online, featuring updates for 2021, 2022, 2023, and the all-new AMA Guides Sixth 2024, along with the AMA Guides Newsletter. The updated AMA Guides Sixth Edition (2024) builds upon the changes issued in AMA Guides Sixth 2023. It applies current practices to musculoskeletal content (Chapters 15, 16, and 17), featuring significant changes to impairment rating methodology. The AMA Guides Newsletter provides updates, authoritative guidance, and interpretations for users of fourth, fifth, and sixth editions. More than 40 states and several countries recognize the AMA Guides as an authority on evaluating permanent impairment, requiring raters to use the latest edition. Looking for information on disability evaluation? Want to discuss it with the AMA? Contact us at . Get easy access to the AMA Guides to the Evaluation of Permanent Impairment 6th Edition, 2021 tables. Jump to Chapter: Conceptual Foundations and Philosophy or start with Practical Application of the Guides. Access the guides for a better understanding of permanent impairment evaluation in different systems such as: Cardiovascular System Pulmonary System Digestive System Urinary and Reproductive Systems Skin Hematopoietic System Endocrine System Ear, Nose, Throat, and Related Systems Visual System Central and Peripheral Nervous System Mental and Behavioral Disorders Upper Extremities Lower Extremities Spine and Pelvis Visit the following chapters for more information: Chapter 1: Conceptual Foundations and Philosophy Chapter 2: Practical Application of the Guides Chapter 3: Pain-Related Impairment Chapter 4: The Cardiovascular System Chapter 5: The Pulmonary System Chapter 6: The Digestive System Chapter 7: The Urinary and Reproductive Systems Chapter 8: The Skin Chapter 9: The Hematopoietic System Chapter 10: The Endocrine System Chapter 11: Ear, Nose, Throat, and Related System Chapter 12: The Visual System Chapter 13: The Central and Peripheral Nervous System Chapter 14: Mental and Behavioral Disorders Chapter 15: The Upper Extremities Chapter 16: The Lower Extremities Chapter 17: The Spine and Pelvis Access the tables for a better understanding of impairment classification: Table 1-1: Self-Care Table 1-2: Hierarchy of Study Types Table 1-3: ICF Codes and Functional Levels Table 1-4: Sample Impairment Function Classification Table 1-5: Generic Template for Impairment Classification Grids Table 1-6: General Principles for Calculating Impairment Chapter 2: Practical Application of the Guides Tables Chapter 3: Pain-Related Impairment Tables Chapter 4: The Cardiovascular System Tables Chapter 5: The Pulmonary System Tables Table 4-1: NYHA Functional Classification of Cardiac Disease Table 4-2: Relationship of METs and Functional Class According to 5 Treadmill Protocols Table 4-3: Energy Expenditure in METs During Bicycle Ergometry Table 4-4: Methodology for Determining the Grade in an Impairment Class Table 4-5: Criteria for Rating Permanent Impairment due to Valvular Heart Disease Table 4-6: Criteria for Rating Impairment due to Coronary Artery Disease Table 4-7: Criteria for Rating Impairment due to Cardiomyopathies Table 4-8: Criteria for Rating Impairment due to Pericardial Heart Disease Table 4-9: Criteria for Rating Impairment due to Dysrhythmias Table 4-10: Classification of Blood Pressure for Adults Table 4-11: Criteria for Rating impairment due to Hypertensive Cardiovascular Disease Table 4-12: Criteria for Rating Impairment due to Peripheral Vascular Disease - Lower Extremity Table 4-13: Criteria for Rating Impairment due to Peripheral Vascular Disease - Upper Extremity Table 4-14: Criteria for Rating Impairment due to Diseases of the Pulmonary Artery Table 4-15: Cardiac Impairment Evaluation Summary Chapter 5: The Pulmonary System Tables Table 5-1: Impairment Classification of Dyspnea (Adapted) Table 5-2: Impairment Classification for Prolonged Physical Work Intensity by Oxygen Consumption Table 5-3: Methodology for Determining the Grade in an Impairment Class Table 5-4: Criteria for Rating Permanent Impairment due to Pulmonary Dysfunction Table 5-5: Criteria for Rating Permanent Impairment due to Asthma Table 5-6: Scale for Judging Capabilities of Subjects With Cancer Table 5-7: Pulmonary Impairment Evaluation Summary Chapter 6: The Digestive System Tables Table 6-1: Impairment Classification of Gastrointestinal Symptoms Chapter 7: The Urinary and Reproductive Systems Tables Table 7-1: Impairment Classification of Urine Output Chapter 8: The Skin Tables Table 8-1: Impairment Classification of Skin Lesions Chapter 9: The Hematopoietic System Tables Table 9-1: Impairment Classification of Anemia Chapter 10: The Endocrine System Tables Table 10-1: Impairment Classification of Hypothyroidism Chapter 11: Ear, Nose, Throat, and Related Systems Tables Chapter 12: The Visual System Tables Chapter 13: The Central and Peripheral Nervous System Tables Chapter 14: Mental and Behavioral Disorders Tables Chapter 15: The Upper Extremities Tables Chapter 16: The Lower Extremities Tables Chapter 17: The Spine and Pelvis Table A-1: ICF Codes and Functional Levels Table A-2: Sample Impairment Function Classification Table A-3: Generic Template for Impairment Classification Grids Table 6-1: Desirable Weights for Men by Height and Body Build Table 6-2: Desirable Weights for Women by Height and Body Build Table 6-3: Methodology for Determining the Grade in an Impairment Class Table 6-4: Criteria for Rating Permanent Impairment due to Upper Digestive Tract (Esophagus, Stomach and Duodenum, Small Intestine, and Pancreas) Disease Table 6-5: Criteria for Rating Permanent Impairment due to Colonic and Rectal Disorders Table 6-6: Criteria for Rating Permanent Impairment due to Anal Disease Table 6-7: Impairments From Surgically Created Stomas Table 6-8: Criteria for Rating Permanent Impairment due to Liver Disease Table 6-9: Criteria for Rating Permanent Impairment due to Biliary Tract Disease Table 6-10: Criteria for Rating Permanent Impairment due to Herniation Table 7-1: Methodology for Determining the Grade in an Impairment Class Table 7-2: Criteria for Rating Permanent Impairment due to Upper Urinary Tract Disease Table 7-3: Criteria for Rating Permanent Impairment due to Urinary Diversion Disorders Table 7-4: Criteria for Rating Permanent Impairment due to Bladder Disease Table 7-5: Criteria for Rating Permanent Impairment due to Urethral Disease Table 7-6: Criteria for Rating Permanent Impairment due to Penile Disease Table 7-7: Criteria for Rating Permanent Impairment due to Scrotal Disease Table 7-8: Criteria for Rating Impairment due to Testicular, Epididymal, and Spermatic Cord Disease Table 7-9: Criteria for Rating Impairment due to Prostate Disease Table 7-10: Criteria for Rating Permanent Impairment due to Vulval and Vaginal Disease Table 7-11: Criteria for Rating Permanent Impairment due to Cervical and Uterine Disease Table 7-12: Criteria for Rating Permanent Impairment due to Fallopian Tube and Ovarian Disease The following is a list of various bodily system impairments and rating criteria: Endocrine System Impairment (Chapters 10 & 15) * Disorder ratings: + Hypothalamic-Pituitary Axis + Thyroid Abnormalities + Parathyroids + Adrenal Cortex + Adrenal Medulla + Diabetes Mellitus + Hypoglycemia + Gonadal Disorders + Mammary Disorders + Metabolic Bone Disease Ear, Nose, Throat, and Related Structures Impairment (Chapter 11) * Hearing Loss Ratings: + Monaural hearing loss + Binaural hearing impairment calculation + Vestibular disorders + Facial disorders &/or disfigurement + Air passage deficits + Mastication and deglutition impairments Visual System Impairment (Chapter 12) * Visual system ratings: + Acuity-related impairment rating + Central scotomata correction + Reading acuity determination & impairment rating + Classification of visual field impairments Central and Peripheral Nervous System Impairment (Chapter 13) * Neurological disorder ratings: + Cerebral impairment combination with other neurologic disorders + Alteration in mental status, cognition, and highest integrative function (MSCHIF) rating + Aphasia or dysphasia rating + Upper extremities impairments due to CNS dysfunction + Station and gait disorders rating + Neurogenic bowel rating + Neurogenic bladder rating + Neurogenic sexual dysfunction rating Table of Contents Chapter 13: Neurogenic Pain and Dysfunction Chapter 14: Mental and Behavioral Disorders 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 The use of outdated medical guides can lead to inequitable impairment evaluations, as some injuries may experience significant long-term improvements while others do not. To address this, the AMA has established an Editorial Panel to review and revise the AMA Guides. This panel provides a transparent process for stakeholders to develop proposals for enhancements based on advances in medical science. The new content will be incorporated into the AMA Guides, with consideration given to implementation considerations that ensure equitable rating programs. The AMA is working tirelessly to bring the latest medical advancements to patients and physicians across various jurisdictions. To achieve this goal, they're simplifying access to cutting-edge medicine through digital platforms, making it easier for healthcare professionals to stay updated. These digital solutions not only enhance evaluation quality but also reduce administrative burdens on physicians. Historically, implementing new medical practices has been met with resistance due to non-medical hurdles such as regulatory and legal challenges. To better understand these obstacles, the AMA has initiated a broad discussion among stakeholders from regulatory bodies, legal communities, and international partners. This inclusive approach aims to overcome existing barriers and ensure that all members of the AMA Guides community have a say in shaping its future. The AMA is committed to engaging with various organizations to discuss how together they can advance medical practices and bring about positive change. If you're interested in participating in this conversation, please reach out to us at . To stay informed and share valuable insights with your constituents, download our AMA Guides handouts here.
