SECTION 1

Website

Add personality to your website to **stand out from the crowd**

Create a Website that Converts

1. Master the 5-Second Test

Create an instantly clear website that communicates who you are, what you do, and your unique value in less than 5 seconds. Use scannable, engaging content that immediately speaks to potential clients' needs.

Always test your website with someone outside the financial industry to ensure it passes the 5-second clarity test and effectively communicates your value.

2. Simplify Navigation

Optimize your website structure with **no more than 5 main pages**, with special emphasis on the: **Home, About/Team, and Contact/Get Started** (the 3 most visited sections that will likely determine whether a prospect becomes a client).

61%

say that if they don't find what they're looking for within 5 seconds, they'll go to another site*

<p>Before your brain reads anything your eyes scan it. Your eyes then call up your brain and say either "Hey, this looks easy to read!" or "Don't go there soldier". When you dump a lot of words into one long mega-paragraph, your eyes say, "Stay away". Your brain says "Roger that". And no matter how good the copy is, it won't get read.</p>	<p>Everyone scans!</p> <p>Hierarchy of text with bold headlines.</p> <ul style="list-style-type: none">Concise bullet points.Use white space.

3. Audience-Focused Messaging

Transform your website copy by focusing on your clients' perspectives and needs. Eliminate industry jargon and utilize behavioral science techniques.

Replace "We" statements with "You" language that speaks directly to your prospects' desires and challenges, example: "We provide retirement services" to "Your trusted resource for achieving retirement goals."

4. Add Engaging Elements

Remember, people connect with people. Integrate videos, personal stories, and interactive elements that showcase your personality and help visitors connect with you beyond traditional service descriptions.

- Quality comments over high-volume reactions
- Carousel and video formats that provide comprehensive information
- Posting during peak engagement times for your network

- Personalize every connection request with a thoughtful message
- Consider connecting with potential clients, centers of influence (COI), local charities or groups and professionals in complementary fields
- Engage with their content before and after connecting to build that online relationship
