

Liquid total mixed ration

DFA III

Molasses

Promote calcium absorption

Cow Riser VIII[®]

~ For excellent post-calving recovery ~
Preventing hypocalcemia just by giving them something to drink.

Let's add calcium!

Cow Riser VIII neo[®]

Improved convenience

Betaine

~ Surviving the perinatal period ~
Cow Riser is now easier to use

The mineral absorption enhancer using oligosaccharides (DFA III) is **our original product!** DFA III, calcium, magnesium, and betaine **prevent peripartum diseases** caused by hypocalcemia. Molasses and alcohol provide energy for cows after calving and contribute to a smooth post-calving recovery.

Cow Riser VIII®

Cow Riser VIIIneo®

Main ingredients (Cow Riser VIII)

Molasses, oligosaccharides (DFA III), calcium, magnesium, alcohol

Basic information

Uses For calving cows
Packing 12 bottles/box
Shape Bottle
Remarks Handle Cow Riser VIII with care in winter to avoid solidification of sediments.

Main ingredients (Cow Riser VIII neo)

Molasses, oligosaccharides (DFA III), calcium, magnesium, alcohol, betaine

Usage

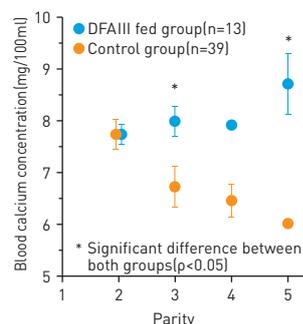

Feed one bottle per day for 3 days (3 bottles total) post-calving. It is recommended to feed Ca supplement separately.
 Hold the cow steady and administer orally from the bottle container. Be careful not to aspirate.
 For cows who do not like bottles, pour it into a container such as a bucket and let them drink.

Feeding effect of Cow Riser

DFA III in Cow Riser is an oligosaccharide characterized by its lack of decomposition by rumen, and is produced by enzymatic synthesis from inulin contained in chicory root.

DFA III widens the intercellular spaces in the duodenum, facilitating the passage of Ca and promotes its absorption from the intestinal tract into the blood vessels.

Fed DFAIII 50 g/day during the dry period and DFAIII 90 g and 100g of carbonic acid Ca after calving and 6 hours after calving to multiparous cows, there was no decrease in the blood Ca concentration immediately after calving due to increased parity, indicating that the DFAIII had an effect of promoting Ca absorption (Figure).

Sato et al., 2007. Japanese Journal of Veterinary Clinics Vol 78(1):37-43

Product information related to DFAIII

For farms with a large number of cows, we recommend the Cow Riser Dice, a Cubitainer product of the Cow Riser VIII neo. We also have "Nitten Genki Dama," a solid feed containing DFA III and molasses.
