

Goodman Data Centre Project

 Location ARTARMON, NSW	 Sector DATA CENTRE	 Size 53, 751 M ² GFA	 Timeframe 8 DAYS
 Building 6 LEVELS	 Software COSTX + AGTEK	 Feature (265 LITRES) ROUGHLY 2,650 VINYL RECORDS WORTH	

A state-of the art, six-level hyperscale data centre at 2 Lanceley Place, Artarmon. At 53,751 sqm, this is the kind of project where the numbers either hold the whole thing together or quietly unravel it.

We measured the full Structural, Architectural, Civilworks, and Earthworks scope in 10 days, running CostX and Agtek across every discipline simultaneously. The client walked away with a budget they could write contracts against.

**Did you
know?**

The floor spec called for Liquid Vinyl Anti-static coating across more than one hectare of surface area at just 2mm thick. That's 265 litres of compound, enough PVC to press roughly 2,650 vinyl records. Quantity surveying rarely gets more rock and roll than that.
