

BUSINESS SIM MANAGEMENT PLATFORM

ANY SIM. ONE PLATFORM. FULL CONTROL.

SIMcontrol is the enterprise grade platform that makes business SIM connectivity management simple, secure and predictable—across prepaid, contract and IoT global roaming.

One dashboard. Real-time control. Zero bill shock.

THE SMARTER WAY TO MANAGE BUSINESS SIMS—AT SCALE

Deploying connected devices should be about outcomes, not admin. SIMcontrol brings every SIM type and mobile network into a single view with real-time control, automation, and clear costs. Whether you're connecting 100's or 100 000's of SIMs, you get the visibility to act and the tools to scale—without lock-ins or surprises. What you'll notice immediately

- **Single source of truth** - All SIMs and networks in one account.
- **Real-time control** - Quotas, rules, and alerts you can act on instantly.
- **Automation** - Top-ups, caps and bulk actions that remove manual work.
- **Transparent costs** - Pooled data options and usage controls to eliminate bill shock.
- **Carrier-agnostic** - Work with multiple Tier-1 networks and keep your platform. Use your existing SIMs or order from us in bulk.

WHAT MAKES **SIMCONTROL** DIFFERENT?

BUILT TO GIVE YOU CONTROL — NOT LOCK YOU IN

Proven at scale

Over 1 million SIMs under management for 2,000+ companies. Designed for high-volume operations and enterprise governance.

Carrier-agnostic, multi-country

Manage local and roaming SIMs in one place. Namibia and roaming options for broader Africa & global coverage in 180+ countries.

No long-term contracts

Scale up or down on your terms. Move between products without rebuilding your stack—keep the platform.

Tier-1 support

Expert technical connectivity support with fast turnaround from real people who know connected SIMs..

PRODUCTS AT A GLANCE

Pick the best SIM type for the job.

Whatever your deployment needs, we will help you choose the best SIM. Your team still works from the same SIMcontrol dashboard and APIs.

Prepaid SIMcontrol

Ultimate flexibility.

Automate recharges and set rules for usage, spend and destinations. Ideal for rapid rollouts and field teams.

Best for: variable usage, large fleets, and projects that need simple budget control.

Why it's better: automate the busywork and keep costs predictable.

Contract SIMcontrol

Data contracts—without the catch.

Centralise your business data contracts across networks. Get SIM-level visibility, spending caps, and proactive alerts and eliminate overuse.

Best for: stable monthly usage with predictability requirements.

Why it's better: clear reporting and controls that stop bill shock.

IoT Roaming SIMcontrol

Global reach. Local-like control. Without the risk.

IoT roaming with smart network fallback and dual-network resilience—managed from one dashboard.

Best for: cross-border logistics, global devices, local network redundancy.

Why it's better: one bill, one platform, multiple networks that “just work”.

PLATFORM HIGHLIGHTS

Real-time visibility and full control, across every SIM

- **Unified dashboard** – See, search and action SIMs across networks, countries and products.
- **Quotas & rules** – Set per-SIM and bulk policies for spend, data caps, barred destinations, roaming rules and device locks.
- **Automation** – Automated Top-ups and alerts so ops teams spend less time in spreadsheets.
- **Bulk actions** – Provision, bar/unbar, and update rules at fleet scale.
- **APIs** – Provision, monitor and report programmatically; push events into your own systems.
- **Detailed reporting** – Cost tracking and exportable usage history.
- **Role-based access** – Scoped permissions with audit logs for enterprise governance.

NETWORK COVERAGE

Run Prepaid SIMcontrol across major mobile networks and the technologies your devices already use.

SIMcontrol integrates with leading operators so you don't juggle multiple dashboards or contracts.

WHERE SIMCONTROL FITS

Industry deployments we run everyday

**TRUCKING
& LOGISTICS**

**COURIER
& DISTRIBUTION**

**POS, FINTECH
& RETAIL**

**SECURITY
& CCTV**

**FACTORY
AUTOMATION**

**TEMPERATURE
MONITORING**

**UTILITIES, ENERGY
& SMART METERS**

**SMART
AGRICULTURE**

EV CHARGING

SEAMLESS API INTEGRATION

Our powerful APIs let you plug SIMcontrol directly into your existing systems.

From CRMs and billing tools to custom dashboards. Automate everything from usage rules to reporting, manage SIMs at scale, and access real-time data where it matters most.

Connect your platforms. Automate your workflows. Stay in control.

FAST TO START. EASY TO SCALE.

Onboarding & migration

1

Sign up

Online in minutes

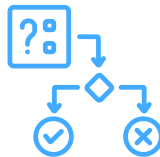

2

Pilot

Try the platform with a handful of SIMs (bring your own, or order new)

3

Configure rules

Recharges and alerts aligned to your workflows.

4

Order SIMs or migrate existing

We supply SIMs in bulk or move your existing SIM estate.

5

Go LIVE

Dashboards, users and APIs ready; support on standby.

SUPPORT & SERVICE

Tier-1 technical support with fast turnaround

You'll speak to real people who run connected SIM deployments all day. From planning and rollout to troubleshooting, our team is geared for business-critical operations.

- Named contacts and quick response
- Help Centre and guided training for admins
- Enterprise escalation procedures

TRUST & PROOF

Proven with leading enterprises

A platform designed around operational reality: fewer tickets, faster changes, clean reporting.

What our customers say:

"Rolled out in weeks, not months. Costs are predictable, and our teams actually use the dashboard."

"One view across contracts, prepaid and roaming stopped the bill shock immediately."

PRICING & TERMS

Predictable costs. No surprises.

We keep pricing SIMple: choose the network and product that fits (Prepaid, Contract, IoT Roaming), then apply the rules and quotas you need. Where eligible, pooled data reduces waste; alerts and caps kill over-spend.

- No long-term lock-ins
- Scale up or down on demand
- One invoice across products and networks

REQUEST A SIM ESTATE ASSESSMENT

Fast answers. Real support.

We'll review your SIM estate, use case and network requirements — then recommend the best setup.
