

SEA BIOLOGICS DIRECTORY:

50+
COMPANIES

TO WATCH IN SOUTH EAST ASIA

OVERVIEW

Southeast Asia is entering a transformative phase in biologics development, manufacturing, and commercialization. Once viewed primarily as an emerging pharmaceutical market, the region is now evolving into a strategic hub for vaccines, biosimilars, cell therapy, bioprocessing, and biotech innovation.

With a population exceeding 680 million, expanding healthcare access, rising chronic disease burdens, and increasing government support for life sciences, Southeast Asia presents one of the strongest long-term growth opportunities in global biologics.

The SEA Biologics Directory is designed to be the definitive market guide for executives, investors, suppliers, CDMOs, regulators, and innovators seeking to navigate this high-growth region.
