

Vulcan Seals Type 260B

Ebara®

Technical Data Sheet

Product Description

The Vulcan Seals Type 260B Ebara® range of elastomeric diaphragm double-ended seals, with boot stationaries at the oil side and bezel stationaries at the impeller side, to suit the seal chamber of various Ebara® and Tsurumi® submersible pumps. Suitable for submersible pumps, with the hard silicon carbide faces with bezel plate used at the impeller end of the installation, and the Carbon Ceramic faces at the bearing oil chamber end of the seal chamber. Vulcan Seals Type 260B Ebara® seals are supplied with replacement bezel-holding plates and car screws.

Why Choose the Vulcan Seals Type 260B Ebara®?

The Vulcan Seals Type 260B Ebara® seals are supplied complete with bezel plates for the inboard stationary.

Pump Ranges

The Ebara® pump model includes the following pump ranges: Certain Ebara® "DL", "DS" and "DW" range models.

Standard Face Material Combinations

Elastomers	Rotary Face	Stationary Face	Metals	Complete Seal Code
Viton™/FKM	VSR1 Silicon Carbide / VCP1 Carbon	VSR1 Silicon Carbide / VAW1 Ceramic	304 Stainless Steel	.V.WA.
