

Vulcan Seals Type C18  
Sulzer®  
Technical Data Sheet

Product Description

The **Vulcan Seals Type C18 Sulzer®** is a compact design enclosed rubber bellows seal, with a boot mounted stationary to meet the specific dimension requirements of Sulzer® A.B.S.® brand submersible pumps fitted with original part numbers 11100107, 11100108, or 11110168. The **Vulcan Seals Type C18 Sulzer ABS®** is suitable for lubricating oil circulation duty as the upper seal in the submersible pump.

Why Choose the Vulcan Seals Type C18 Sulzer®?

The **Vulcan Seals Type C18 Sulzer®** offers the design benefits of the Vulcan Seals Type 18 but with fitting dimensions specific to the requirements of these submersible pump ranges.

Pump Ranges

The Sulzer® (former ABS®) pump model includes the following pump ranges: Submersible pumps fitted with the part numbers stated in the table above, especially AFP series models.

Compliance & Certificates

Also available with built materials that adhere to the above compliance standards and certificates. Please enquire about your requirements.

Standard Face Material Combinations

Elastomers	Rotary Face	Stationary Face	Metals	Complete Seal Code
Nitrile	VCP1 Carbon	VSR1 Silicon Carbide	304 Stainless Steel	.N.D.
Nitrile	VSR1 Silicon Carbide	VSR1 Silicon Carbide	304 Stainless Steel	.N.S.

Dimensional Data

DØ (Metric)	Seal Size Code	D1 (mm)	D3 (mm)	L1 (mm)	L2 (mm)	OEM Part Number
