

Vulcan Seals Type 278
Eureka®
Technical Data Sheet

Product Description

The Vulcan Seals Type 278 is an elastomeric diaphragm seal, with an extended taper spring and smooth outer profile boot mounted stationary, to specifically suit the dimensions of certain "CA" series centrifugal pumps.
Suitable for a wide range of water and bilge transfer duties, especially in the marine industry.

Why Choose the Vulcan Seals Type 278 Eureka®?

Featuring the design benefits of the Vulcan Seals Type 20 range with fitting dimensions suitable for the seal chambers of these popular pumps.

Pump Ranges

The Eureka® pump model includes the following pump ranges: "CA-Series".
